

ABOUT NUMUNU MARTINEZ JV

Numunu Martinez JV represents the best of the JV program by partnering a rapidly growing tribal 8(a) with a remarkably skilled and well respected WOSB GC who has a stellar track record of completing federal projects on time and on budget. We offer general contracting services throughout CONUS with an emphasis on the southeast, southwest, and all of California. The Numunu Martinez JV has a strong understanding of the federal government's acquisition and compliance guidelines and adheres to these standards. This tribal 8(a) joint venture provides the federal government with unique acquisition options including direct, sole-sourced contracts that can be processed quickly once a requirement is identified. These contracts are negotiated to ensure the procuring agency meets its program needs while providing the best value to the federal government as a whole.

PERSONNEL EXPERIENCE

Numunu Martinez JV has an experienced team of Estimators, Project Management, and Field personnel with decades of government construction experience. Our personnel have worked with several government agencies including: USACE, US Air Force, NAVFAC, GSA, National Park Service, FAA, Department of Agriculture, Department of Labor, Customs and Border Protection, US Navy, DOL, Smithsonian, and NIST.

PAST PERFORMANCE

NUMUNU EXPERIENCE

EPA Facilities Operations and Maintenance, Cincinnati, OH (\$18.7M) Provided the management team and personnel to perform facilities management along with on-site physical plant operations, buildings and equipment maintenance, and complete grounds maintenance activities, including snow removal. Provided skilled boiler operators to operate the power plant on a continuous 24 hour a day basis. *Client: EPA OARM Cincinnati*

Solar irrigation Renewable Energy Project, Maricopa County, AZ (\$5.8M) This project includes the construction of a solar energy generation facility over an existing irrigation canal on the Gila River Indian Reservation in Arizona. Site improvements include galvanized steel framing founded on drilled piers for the support of solar panels. The solar array includes two hinged solar frames on either end of the irrigation canal for operation and maintenance access and all other solar frames will be fixed with pin connectors and removable for access to the canal. *Client: USACE Los Angeles District*

Drinking Water Infrastructure Improvements, New Orleans, LA (\$4.6M) The work consists of the removal and replacement of existing manually read water meters in the Donaldsonville area with new remotely read water meters using remote data collector units. Incidental work includes traffic control and removal & replacement of asphalt drives, concrete drives, and concrete sidewalks. *Client: USACE New Orleans*

MARTINEZ EXPERIENCE

IDIQ for Title I and Title II Support, Cape Canaveral, FL (\$50M) Title I and Title II services under the Spaceport Architecture Civil Engineering (SPACE) contract at the Patrick Space Force Base and Cape Canaveral Space Force Station. This design and inspection Single Award Task Order Contract provides services enabling SLD 45 to meet the ever-increasing infrastructure demands on the Eastern Range, enabling a flexible, sustainable, and efficient Spaceport. *Client: Space Launch Delta 45*

Avon Park Airfield Security Fence, Avon Park, FL (\$4.2M, 2021) Installation of over 2 miles of security fencing around the airfield. Installation of manual and automated vehicle and pedestrian crash gates, vehicle barrier cables and associated telecommunications and security control systems. *Client: Mobile District, USACE*

AUTEC Hanger and Berthing Renovations, Andros Island, Bahamas (\$1.5M, 2022) Design/Build to provide complete interior and exterior renovations to two ready-crew berthing units, including roofing, painting, flooring, gypsum board, new bathrooms & kitchens. Bid/Build to provide a new tensile fabric helicopter hanger. *Client: NAVFAC Southeast*

Trident Wharf Power Upgrades, Cape Canaveral SFS, Cape Canaveral, FL (\$980K, 2021) New medium voltage feeders and new sectionalizing switches to provide power to the Trident Wharf. Included switches and sectionalizing gear, underground conduits and feeders, and installation of new site lighting at the wharf. *Client: Space Launch Delta 45*

Construct Overhead Protection, SOUTHCOM Headquarters, Doral, FL (\$1.8M, 2020) Design/build project to install over 10,000 square feet of new aluminum and concrete walkway canopies. Martinez services included Project Management, site superintendent, site safety, and quality control for constructing the temporary walkway, relocation of sprinkler systems, and some landscaping. We also self-performed some electrical scope related to the canopy lighting and tying into the existing electrical panels. *Client: USACE Mobile District*
