ALZHEIMER'S TRIALS AT NDX

ADVANCING ALZHEIMER'S RESEARCH IN OUR COMMUNITY — FALL 2026

RESEARCH LEADERSHIP AT NDx

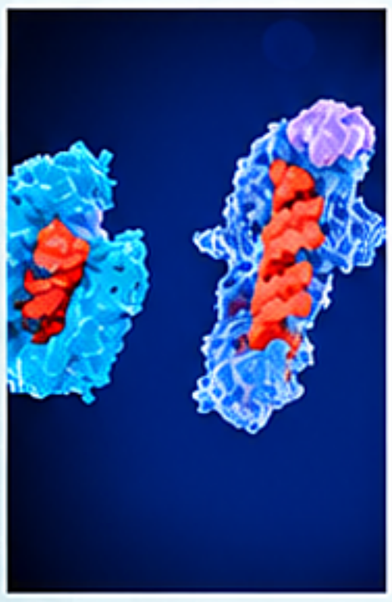

JOEL VANDERSLUIS, MD
NEUROLOGIST

Since 2016, Dr. Joel Vandersluis and NDx Clinical Research have partnered with pharmaceutical companies to bring innovative clinical trials to the Dayton community. NDx has contributed to the clinical development of multiple FDA-approved treatments, including Pimavanserin (Nuplazid), Lemborexant (Dayvigo), Rimegepant (Nurtec ODT), Donanemab (Kinsula), and Dihydroergotamine (Atzumi). Notably, **NDx was the second-highest enrolling site nationwide in the Phase II safety and efficacy trial of Kinsula**, an FDA-approved treatment for Alzheimer's disease.

Patient Focused | Research Supported

- ✓ 60+ Trials Completed
- ✓ Leading to 5+ FDA Approvals
- ✓ 25+ yrs Experience
- ✓ Diverse Indications Investigated

Current Alzheimer's Research Opportunities

Early Alzheimer's

NewAmsterdam Pharma

This study is evaluating an investigational medication that affects cholesterol processing within the brain. Researchers hope to determine whether this treatment can delay or prevent memory decline in people at increased risk for Alzheimer's disease due to APOE and family history, who do not yet have symptoms.

Mild-Mod Alzheimer's

Lighthouse Pharmaceuticals

This study is evaluating an investigational oral medication targeting inflammation that may contribute to Alzheimer's disease. The treatment focuses on a bacterium associated with gum disease that researchers believe may play a contributing role in Alzheimer's disease progression.

Additional Research Opportunities

We are also enrolling patients in studies for other neurological and psychiatric indications.

- Mild-to-Moderate Alzheimer's
- Idiopathic Neuropathy
- Alzheimer's with psychosis
- Treatment Resistant Depression
- Major Depressive Disorder

Psychiatric trials in partnership with Dr. Otto Dueno and Dayton Behavioral Care.

INNOVATIVE APPROACHES. COLLABORATIVE CARE. NEW RESEARCH OPPORTUNITIES.

Interested in Participating or Referring a Patient?

NDx Clinical Research welcomes inquiries from individuals, families, and healthcare providers interested in exploring clinical research opportunities.

For Patients and Families:
Contact us directly to learn about available studies, free cognitive assessments, and whether participation may be appropriate for you or a loved one. A physician referral is not required.

For Referring Physicians:
We value our partnerships with local healthcare providers. Our research team can help assess patient eligibility, coordinate screening visits, and provide updates throughout the referral process. Patients are typically contacted within 48 hours of referral.
