

A.J. DAVIDOFF LLC

Geologic and Geophysical Consulting Services for
The Legal, Renewable, and Oil and Gas Industries

Andrew J. Davidoff, Ph.D., PG
Geology, Geophysics, and Earth Science Expert

Dr. Davidoff is a Texas-based Professional Geologist and practicing Geophysicist with 30 years of domestic and international exploration and development experience. He brings with him a rich history of projects in the US and over 20 countries worldwide, from onshore to deep water.

Specializing in the intricate realms of the Oil and Gas and Geothermal industries, Dr. Davidoff's expertise encompasses a wide spectrum, from offshore plays to onshore developments. His skillset seamlessly integrates geological, geophysical, and reservoir engineering data to drive the success of multifaceted projects. Many of these projects include investigations surrounding Exploration and Development Wells, Injector and Producing Wells, Field Development Planning, Reserve Audits, Reservoir Damage, seismic and Hazard Survey Acquisition, processing and Interpretation, and Geothermal Development.

In addition to his industry contributions, Dr. Davidoff lends his expertise to forensic investigations. He has been retained in complex litigation matters to analyze and render expert opinions for cases involving earthquakes damage linked to fracking and injection well, and environmental issues such as river erosion, landslides. Further, his training, background and experience is directly applicable to common litigation matters such as SEC and IRS violations within oil and gas investments, implied covenant disputes and changes in sea-level.
