****Two-Tone Sinks are recommended on all Tier 3 Top Colors as well as some Tier 1 Colors such as Vulcan. Due to the product being cast onto the mold inverted, the veins will run down the sink(s) creating a rain effect. Black veins tend to be very bold and can appear very heavy in the sink(s). For this reason, many customers tend to prefer a two-tone, solid color sink(s) with the colors stated above.****
