Equine Plus is formulated to support broodmares, stallions, weanlings and yearlings for healthy growth and development.

Equine Plus is specifically formulated to support broodmares, stallions, weanlings and yearlings through the critical stages of reproduction and growth. It delivers balanced nutrition to promote healthy skeletal development, muscle growth, and overall condition.

Nutritionally complete and fortified with a full spectrum of vitamins and organic trace minerals, Equine Plus is designed for optimal absorption and utilisation to meet the increased demands of breeding and growing horses.

With controlled sugar and starch (NSC) levels, Equine Plus supports metabolic health. Research has shown that excessive NSC intake in mares may be associated with an increased risk of Developmental Orthopaedic Disease (DOD) in offspring, making controlled energy sources essential during gestation and lactation.

Reproducing and growing horses are particularly susceptible to digestive challenges, including gastric ulcers and hindgut acidosis. To support gastrointestinal health, Equine Plus includes our scientifically formulated GastroPak. This blend contains high-quality natural ingredients, including a plant-derived marine mineral buffer and Diamond V XPC postbiotics, to help maintain gut integrity and microbial balance.

AVAILABLE IN:

20kg

500kg

800kg

Bulk

Key Benefits

- High protein, fibre, and controlled starch levels support optimal body condition and steady growth.
- Supports healthy foal growth and bone development.
- Provides fertility support with high-quality nutrients designed to optimise reproductive health.

Feeding Guide (Kg/day)

Bodyweight (kg)	Developmental Stage		Feeding Rates (kg/day)
100-200	Creep Feeding Foals	2-5 months of age	1.0-2.0kg
200-300	Weanlings	5-12 months of age	2.0-3.0kg
300-400	Yearlings	12-18 months of age	3.0-4.0kg
500	Dry Mare	1st and 2nd Trimester	2.0-4.0kg
500	Pregnant Mare	Last Trimester	3.0-6.0kg
500	Lactating Mare	1st 3 months	3.0-6.0kg
500	Breeding Stallion		2.0-5.0kg

Our suggested feeding rates are a **guide only**. Please consult us for individual feeding recommendations.

- Your horse should receive a minimum of 1% of their body weight in quality forage such as hay, pasture and/or chaff.
- Make changes in your horse's diet gradually over at least a two-week period.
- Be sure to always have fresh and clean water available to your horse.

Ingredients selected from:

Lupins, Vegetable Protein Meals, Lucerne, Dehulled Oats, Oat Hulls, Legume Hulls, Canola Oil, GastroPak (Gastric Buffer, Diamond V XPC), Comprehensive Vitamin and Mineral Premix, Lysine, Methionine, Calcium Carbonate, Salt, Magnesium Oxide, Monocalcium Phosphate, Vitamin E, and Biotin.

Typical Nutritional Analysis (per kg fed)

NUTRIENT LEVELS	
Digestible Energy	12MJ
Crude Protein (min)	18%
Crude Fibre (max)	15%
Crude Fat (min)	4.0%
Non-Structural Carbohydrates (max)	20%
Starch (max)	12%
Sugar (max)	8%
Salt (added)	1%
Lysine (min)	0.8%
Methionine (min)	0.4%
MACROMINERALS	
Calcium	1.1%
Phosphorus	0.7%
Sodium	0.42%
Chloride	0.71%
Magnesium	0.35%
Potassium	0.85%
MICROMINERALS	
Zinc*	175mg
Copper*	40mg
Iron	255mg
Manganese	155mg
Selenium*	1mg
Iodine	1mg
Chromium	1.2mg

*Includes organic (chelated) minerals

VITAMINS	
Vitamin A	18KIU
Vitamin D	1.8KIU
Vitamin E	255IU
Vitamin B1	20mg
Vitamin B2	20mg
Vitamin B3	65mg
Vitamin B5	19mg
Vitamin B9	6mg
Vitamin B12	50ug
Biotin	400ug
