Ewe Supplement is formulated to support ewes during late pregnancy and early lactation, when energy, protein and mineral demands increase significantly – particularly in twin- and triplet-bearing ewes.

During the final 6 weeks of gestation, up to 70% of foetal growth occurs. Insufficient nutrition during this period can compromise birth weight, lamb survival, colostrum quality, milk yield, and ewe/lamb condition/survivability. Ewe Supplement is designed to reduce metabolic stress, support foetal development and improve both ewe and lamb survival rates.

Elevated calcium and balanced phosphorus inclusion support colostrum production and skeletal integrity. Buffered ingredients assist rumen stability during grain supplementation to help reduce the risk of acidosis.

AVAILABLE IN:

Key Benefits

- Supports foetal growth during late gestation.
- Promotes colostrum quality and milk production.
- Elevated calcium to meet pre- and post-lambing requirements.
- 14% crude protein to maintain ewe condition.
- Helps reduce metabolic stress around lambing.
- Suitable for single and multiple-bearing ewes.
- Urea, medication, and antibiotic free.

Typical Nutritional Analysis *(per kg fed)*

NUTRIENT LEVELS	
Metabolisable Energy (ME)	11.5MJ
Crude Protein (min)	14%
Crude Fat (max)	2%
Crude Fibre (max)	15%
Starch (typical)	30%
NDF (typical)	20%
Urea (added)	NIL
Salt (max)	1%
Calcium (min)	1.30%
Phosphorus (min)	0.40%
Magnesium (min)	0.35%

Feeding Directions

- Ewe Supplement is safe for both ewes and lambs.
- Introduce Ewe Supplement at 250g per 50kg liveweight on day one. Increase by 100g every three days to a maximum of 1kg per 50kg liveweight per day for sheep.
- Ewe Supplement is suitable for feeding in conjunction with unlimited hay, pasture or other forage.
- Offer free-choice access to fresh and clean water at all times.
- Keep feeders clean to reduce risk of spoilage.
- Feeders should be set at throat height to reduce wastage.
- Place feed and water sources away from each other to keep water clean.

Ingredients selected from:

Cereals (and co-products), Legumes (and co-products), Vegetable Protein Meals, Calcium Carbonate, Salt, Molasses, Magnesium Oxide, Monocalcium Phosphate, Rumen Buffer, Ammonium Chloride (urinary acidifier), and Harwood Grains Sheep Vitamin and Mineral Premix.
