Fibre Assist has been specifically formulated to meet the requirements of easy keepers and/or horses and ponies with metabolic concerns.

Fibre Assist is a low sugar and starch (NSC < 10%) and moderate protein complete feed designed to supply all your horse's nutrient needs with essential vitamins and organic minerals. With added biotin, Fibre Assist is designed to support optimal hoof health. It is ideal for horses and ponies who are:

- Requiring weight loss or are easy keepers
- Prone to laminitis
- Have a metabolic condition such as insulin resistance (IR), Equine Metabolic Syndrome (EMS) and/or Pituitary Pars Intermedia Dysfunction (PPID also known as Cushing's Disease)

Designed with a low feeding rate, it is suitable for horses who are easy keepers. Fibre Assist is formulated to balance a wide range of forages (hay, chaff and pasture) and meets the nutritional needs of your horse without the need to buy additional supplements.

Hoof and coat health is covered by Fibre Assist with added biotin, copper and zinc, which are all essential nutrients to promote healthy hoof growth and vibrant coats less prone to sun bleaching.

Added vitamin E acts as a potent antioxidant, combating inflammation and enhancing immune function.

Fibre Assist is grain and soy free. Fibre assist contains no added iron and elevated levels of magnesium, copper, zinc and vitamin E with added chromium to support metabolic health.

AVAILABLE IN:

Key Benefits

- Fully fortified complete feed with essential vitamins and minerals.
- Low-NSC, grain-free formula optimal for horses with metabolic concerns or easy-keepers.
- Supports strong hooves and shiny coats.
- Added Chromium to support metabolic health.
- Added Diamond V – XPC postbiotic to support digestive vitality.

Feeding Guide (Kg/day)

Bodyweight (kg)	Maintenance	Light Exercise
200	0.5 kg	0.5-0.75kg
300	0.5-0.75 kg	0.75-1.0kg
400	0.75-1 kg	1.0-1.5kg
500	1-1.5kg	1.5-2.0kg
600	1.5-2.0kg	2.0-2.5kg

Our suggested feeding rates are a **guide only**. Please consult us for individual feeding recommendations.

- Your horse should receive a minimum of 1% of their body weight in quality forage such as hay, pasture and/or chaff.
- Make changes in your horse's diet gradually over at least a two-week period.
- Be sure to always have fresh and clean water available to your horse.

Ingredients selected from:

Lupin Hulls, Oat Hulls, Vegetable Protein Meal, Diamond V XPC, Comprehensive Vitamin and Mineral Premix, Lysine, Methionine, Calcium Carbonate, Salt, Magnesium Oxide, Monocalcium Phosphate, Vitamin E, and Biotin.

Typical Nutritional Analysis (per kg fed)

NUTRIENT LEVELS	
Digestible Energy	10MJ
Crude Protein (min)	8%
Crude Fibre (max)	35%
Crude Fat (min)	4.0%
Non-Structural Carbohydrates (max)	10%
Starch (max)	8.5%
Sugar (max)	1.5%
Salt (added)	1%
Lysine	0.3%

MACROMINERALS	
Calcium	1.2%
Phosphorus	0.7%
Sodium	0.4%
Chloride	0.5%
Magnesium	0.4%
Potassium	0.4%

MICROMINERALS	
Zinc*	200mg
Copper*	50mg
Iron	No Added Iron
Manganese	200mg
Selenium*	0.5mg
Iodine	0.8mg
Chromium	0.75mg

*Includes organic (chelated) minerals

VITAMINS	
Vitamin A	11KIU
Vitamin D	1.1KIU
Vitamin E	300IU
Vitamin B1	25mg
Vitamin B2	30mg
Vitamin B3	75mg
Vitamin B5	20mg
Vitamin B9	7mg
Vitamin B12	13ug
Biotin	7.5mg
