Bulk

Concentrated vitamin, mineral, and protein pellet formulated to maximise growth rates and balance nutrients present in grains.

High protein inclusion removes the need to add additional protein sources in the diet, making it a flexible option for a range of grains and roughages in the ration.

Includes a rumen buffer, to help manage acidosis risk, and a urinary acidifier to assist in managing urinary calculi.

Key Benefits

- High protein content to support conversion rates.
- Complete vitamin and mineral fortification to balance grains such as wheat and barley.
- Suitable for feedlot or supplementary feeding systems.
- Palatable pelleted ration helps prevent selective feeding.
- Rumen buffers added to reduce the risk of rumen acidosis and support optimal rumen function.
- Essential oils used to improve digestive health to lower risk from pathogens and improve performance.
- Antibiotic, ionophore, and medication-free.

Typical Nutritional Analysis (per kg fed)

NUTRIENT LEVELS	
ME	10 MJ
Crude Protein	28%
Crude Fibre	8% Max
NDF	25% Max
Calcium	3.5%
Phosphorus	1%

Feeding Directions

- Lamb Feedlot Concentrate 20 is to be mixed in at a rate of 20% or 200kg per tonne of finished feed.
- For even distribution, mix Lamb Feedlot Concentrate 20 with grain via a vertical or ribbon mixer.
- Provide unlimited forage, or a minimum inclusion of 100g of fibre per head per day.
- Offer free-choice access to fresh and clean water at all times.
- Introduce Lamb Feedlot Concentrate 20/Grain mix at 0.25kg per 50kg liveweight on day one.
- Increase by 0.1kg every three days to a maximum of 1kg per 50kg liveweight for sheep.
- Keep feeders clean to reduce risk of spoilage.
- Place feed and water sources away from each other to keep water clean.

Ingredients selected from:

Cereals (and co-products), Legumes, Vegetable Protein Meals, Calcium Carbonate, Salt, Molasses, Magnesium Oxide, Monocalcium phosphate, Essential Oils, Rumen Buffer, Ammonium Chloride (urinary acidifier), and Harwood Grains Sheep Vitamin and Mineral Premix.
