Bulk

Support growth and efficient feed conversion in all poultry meat birds (including chickens, ducks, & turkeys) from 4 weeks of age.

Meat Bird Pellet is formulated to support rapid growth, efficient feed conversion, and uniform development in meat birds. The high-quality protein and balanced amino acid profile promote optimal muscle deposition and performance throughout the growing period.

This complete pelleted ration provides consistent nutrient intake and reduces selective feeding, making it suitable for both commercial operations and backyard producers. Energy and protein levels are carefully balanced to maximise growth rates while supporting bird health and vitality.

Key Benefits

- High protein and balanced amino acids for muscle growth.
- Supports rapid weight gain and feed efficiency.
- Complete ration—no supplementation required.
- Consistent pellet reduces feed wastage and sorting.
- Balanced vitamins and minerals for health and performance.
- Suitable for small-scale and commercial production systems.
- Medication and antibiotic free.

Typical Nutritional Analysis *(per kg)*

NUTRIENT LEVELS	
Energy (AME)	3050 kcal
Protein	19% (min)
Crude Fibre	3.7% (max)
Calcium	0.8%
Phosphorus	0.4%

Feeding Instructions

From around 4 weeks of age, feed pellets free-choice and provide clean, fresh water at all times.

Ingredients selected from:

Cereals (and co-products), Vegetable Protein Meals, Vegetable Oils, Calcium Carbonate, Salt, Lysine, Methionine, Threonine, Digestive Enzymes, Sodium Bicarbonate, and Harwood Grains Poultry Vitamin and Mineral Premix.
