

# ULTRRA<sup>NPKs™</sup>

TIME-RELEASE HOMOGENEOUS NPKs

## CONTROLLED-RELEASE HOMOGENIZED NUTRIENTS

Color may vary.

### Up to 90 Day Extended Release

## Take your Landscapes & Ornamentals from Ordinary to ULTRRA

**ULTRRA NPKs™** controlled-release homogenized fertilizers set a new standard in landscape and plant nutrition. Featuring a 100% coated, homogeneous formulation enriched with micros, this granular fertilizer delivers precisely balanced nutrients for exceptional plant and ornamentals health. With optimized NPK ratios, these are perfectly crafted for nursery and ornamental applications. Coated with the latest advanced controlled-release fertilizer technology, ULTRRA NPKs products offer flexible nutrient releases that ensure consistent feeding, supporting robust growth and vivid, vibrant landscapes. Whether you're a professional in landscape, golf or sports turf management or nursery, ULTRRA NPKs are the ultimate solution for cultivating superior landscapes with ease and efficiency.

#### DESCRIPTION

ULTRRA NPKs 14-14-14

ULTRRA NPKs 20-6-9 PLUS Micro-nutrients

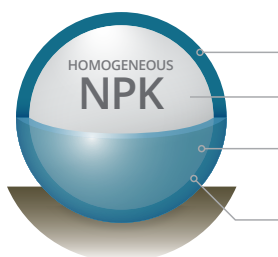

#### EXTENDED RELEASE

90 Days

90 Days

Bulk bags and 50 lb bags available.

### NPKs with Advanced Polymer Coating Technology

**Thickness of coating** determines longevity from jacket coating to 90 day release per application

**Homogeneous NPKs**

**Advanced Polymer coating** for reliable nitrogen (N) release

**Durable coating** to maintain consistent nutrient release, durability during transport, blending, application - resulting in performance you can **TRUST**.

**Low-dust granule** excellent flowability and non-clogging

### Key Benefits

#### Precision Nutrition for Superior Growth

- Homogenized NPK ensures even nutrient distribution for streak-free, complete turf nutrition.
- 100% coated, homogeneous prills enriched with micros for optimal absorption and visibility.
- Uniform prill size and coating ensure precise, consistent nutrient release.

#### Outstanding Turf Performance & Quality

- Produces uniform color, exceptional density, and strong roots for premium turf appearance.

#### Enhanced Efficiency & Lower Costs

- Prevents nutrient segregation for smooth, even application.
- Controlled-release coating reduces application frequency, saving labor, fuel, and equipment costs.

#### Sustainable, Reliable Results

- Reduces runoff, over-fertilization, and burn risks for consistent, eco-friendly turf performance.
