DELIVER MORE

*There is more than one way to restore a dental implant.
You and your patients can choose to go digital and have the
implant scanned at our office; or you can take traditional
impressions in your own chair. We are here to help.*

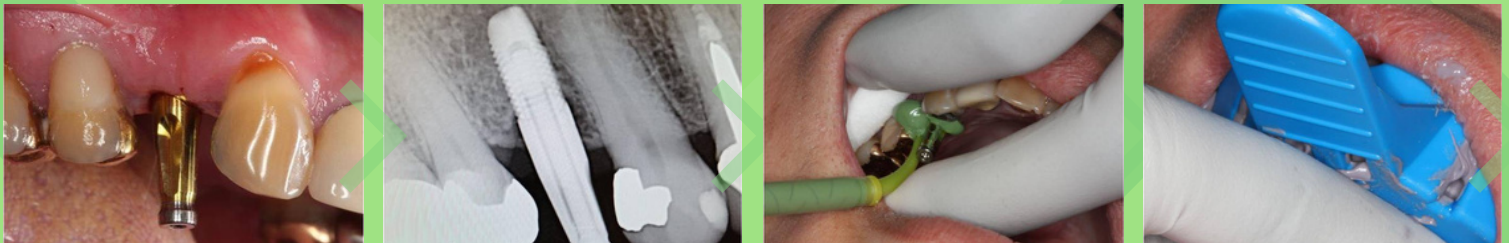

Digital scanning w/ full digital workflow

Indications: all single units, simple multi-unit bridges

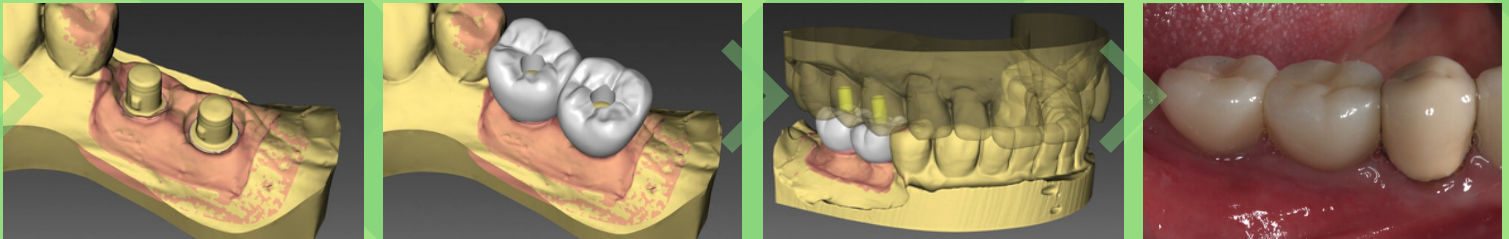

Fixture level impression w/ digitized workflow

Indications: multi-unit bridges, when physical models are preferred

Digitization of the stone cast from a fixture level impression

Optional: Custom impression coping technique

Indications: esthetic zone when tissue margin is critical
