WELCOME

As we are sure it has been for everyone, the last 12 months has certainly been a ride. Following a seasonally beautiful spring and end to 2025, this year we have found ourselves in the midst of an extremely tough season, as have all those in our local and surrounding areas.

We hope our friends further afar have landed under some generous (and not too generous) falls of rain and are heading into a winter with full moisture profiles and paddocks of feed.

The oats that was sown pre predicted rain is yet to germinate and at the time of writing there is no winter crop. Alas, the bull preparation is a little different this year. A high roughage feed ration is their primary nutrition source as they run on the remnants of the hayed off summer pasture. Their preparation will be lighter this year heading into the photos and videos for sale, but regardless, they are still displaying their potential, and we are excited to offer this cohort to the market.

Plenty of new genetics are scattered throughout the 2026 catalogue as some of our tried and tested sires phase into retirement. We have the first offerings of new bulls from Bimbadeen, Bonox, Oaklands and Baldrige (Angus) prefixes along with progeny from home bred bulls that were used as yearlings. With the constant goal of breeding functional and fertile females in conditions that can be challenging, we have increasingly placed higher importance in the selection of sires passing semen morphology early and heading to work by 18months. In this catalogue there are 2 V bulls that achieved this at 12 months of age and have done a season of work in the 2025 spring joining.

As always, there is a variety of types on offer. We have a handful of Ultrablacks for that specific market but also some higher indicus blood bulls with the more traditional Brangus presence. We see the benefit in both these types of bull for different markets and environments and will continue to strive to breed quality sires throughout the blood percentage range that is Brangus.

The bulls have had their pre-treatments, scans and vaccinations and as a group from weaning, they have been a pleasure to handle and treat. We welcome and encourage inspections prior to sale so please give us a bell to arrange a visit if you are nearby or planning a trip. Don't let the diesel price scare you, we think there will be tremendous value for money at our sale this year, and as we have in the past, we will try and help with delivery of bulls post sale as best we can.

A significant highlight of 2025 was being awarded the champion carcass of the Bindaree Beef and Colin Say & Co Feedlot Trial and Carcass Competition. The competition is so strong in our area and against primarily Bos taurus and European breeds, it was a huge accolade for one of our Brangus carcasses to come up trumps in a field of 320 entries. With the end game being eating quality we were so elated to see the decades of breeding decisions, data measuring and recording being rewarded and recognised.

We hope to once again see the familiar faces return to this year's sale as they have in the past. It reminds us why we get out of bed each day, returning clients is simply the best feedback. If you are new, welcome to our program, we wish you well and thank you for your interest,

**Trevor and Collen Jorgensen,
and Nathan and Emily Roberts**

SALE INFORMATION

AGENT

APL Tenterfield

Ben Sharpe: 0428 364 487

ONLINE PLATFORM

Stocklive

Ben Beling: 0447 003 639

ben.beling@stocklive.com.au

AGENT REBATE

3% commission will be paid to agents who introduce a client in writing 24 hours prior to the sale, accompany them to the sale or attend and purchase on their clients behalf and settle within 7 days.

INSPECTIONS

Private inspections are welcome by appointment, please call to arrange a time and day that suits.

Pre-sale inspections will commence at 9:30am on the morning of the sale. All sale lots will be at the "Inverleigh" yards ready for viewing.

SELLING METHOD

The auction will commence at 1:00pm and be held at the "Inverleigh" shed, approximately 1km from the yards. The cattle will remain back in the inspection pens at the yards whilst the auction is occurring. There will be video footage of each lot playing on screen in the shed during the live auction and the sale will be interfaced online via Stocklive.

Buyers need to register prior to the sale either onsite or online through Stocklive. If you are joining the sale online please allow some time prior to the sale to sign up and complete your registration. This can be done in the days and weeks leading up to the sale. There is a buyer instruction sheet at the end of the catalogue to fill out on sale completion for purchasers on site.

This year we will again provide the option to pre-bid online. This will allow a safety net for those who cannot attend the sale and have unreliable internet connections. Pre-Bidding will open on Wednesday the 17th of June at midday and close 1 hour prior to the live auction at midday on Friday the 19th of June. Buyers will be able to bid on lots and nominate their ceiling price. Bids are stored within the stocklive platform only. Vendors, agents and other buyers will not be aware of other pre-bids or maximum bids. If a maximum pre-bid is passed during the auction, buyers will need to be active in the live auction if they wish to continue bidding on that lot.

INSURANCE

Ownership passes once the animal is sold. We strongly recommend taking out insurance to protect your investment against accident and illness. A representative from WFI insurance will be present at the sale to assist with livestock insurance needs or alternatively we welcome you to source through your own trusted provider.

TRANSPORT

Buyers are invited to bring or arrange their own trucks for collection of purchases, we ask this to be completed within 7 days of the sale. Freight and transport logistics will be arranged through APL within the week following the sale, please complete the buyer instruction sheet at the end of the catalogue to ensure transport preferences are met.

We typically sell into vast areas of NSW and central and northern Queensland. We aim to work with clients and carriers to help coordinate freight options to get cattle to their new homes.

SALE DAY SAFETY

Safety is paramount and although all stock on property are scrutinized for temperament, the foreign sale day experience may cause animals to act out of character. Entry into sale pens is at your own risk and we ask that children, adolescents and those with reduced mobility do not enter the pens. If you choose to enter the pens please be mindful of your safety and respectful of the animals.

MEDIA

Photos and videos of lots will be available for viewing via Stocklive, the Australian Brangus Association webpage and links will be supplied via the Belview website. We will also be posting on social media in the lead up to the sale.

We would like to thank Matt and Shannon Sowden at Five Star Creative Promotions for their expertise in most of the livestock photography and all videography.

REFRESHMENTS

Morning tea, lunch and post-sale refreshments will be supplied with compliments by the extended Belview family.

STOCKLIVE

Steps To Register

Using your chosen device visit www.stocklive.com.au

Click **BID** located next to the sale you wish to participate in.

New Users

To create an account click **REGISTER**. Fill in your details, then click **CREATE BIDDER REGISTRATION**.

You will receive an email prompting you to confirm your account, create a password, accept Bidder Account T&C's & Privacy Policy.

Congratulations! Your StockLive account has been created.

Existing Users

LOGIN & find sale you wish to bid on, click **Request to bid** tick the box & click **Confirm Accept Terms**.

On Sale Day

Visit www.stocklive.com.au, when the sale is flashing **LIVE**, click **BID** to watch, listen & purchase.

Invoicing and delivery will be carried out as per your registration & account details by the respective selling agents.

1300 259 742

support@stocklive.com.au

www.stocklive.com.au

Level 12, 1 Eagle Street, Brisbane, QLD 4000

StockLive ABN 26 621 233 805

PRE BIDDING TIPS

Pre-bidding will allow you as a buyer to set and forget. This means that you can place a maximum bid ahead of the LIVE auction and we will do your bidding for you.

The auto-bidding will run in conjunction with the prices being bid in the LIVE auction, your maximum bid will not be the starting price. If your maximum bid is passed in the LIVE Auction you will need to be ONLINE to bid above that price.

If you need any assistance in this process or understanding how our Auction will work, please **contact the team at StockLive on 1300 259 742.**

HOW TO REGISTER

Scan the QR Code or follow these steps:

- 1 Visit www.stocklive.com.au
- 2 **New Users:** Create an account, click 'BID' to register
- 3 **Existing Users:** Click 'BID' to log in
- 4 Agree to the Terms & Conditions
- 5 Start Bidding – Once approved, bid!

*"Our purpose is to provide vendors with **maximum exposure**, buyers with **ease of purchase** and agents with **simplicity of use**."*

DIRECTIONS

The Inverleigh property is located down Michell Lane on the Delungra-Bingara Road (16km south of Delungra; 26km north of Bingara). Travel 6.79km and turn right onto Fairweather Road then follow 2km to the yard.

Should local flooding be a problem on the day there is an alternate route. This will add 45 minutes to travel time. Detailed directions will be posted to social media if required.

ACCOMMODATION

Accommodation can be found and booked at either Bingara (35minutes) Inverell or Warialda (both 45 minutes).

DIRECTIONS MAP

HERD HEALTH

VACCINATIONS

The following vaccination courses have been administered to the Bulls:

- 7-1
- Vibrio
- 3 day sickness (booster given February 2026)
- Pestigard
- 3 germ blood for tick fever (given January 22nd 2026 to all bulls)
- Botulism long range

We recommend annual boosters of Vibrio, 7-1 and Pestigard vaccines prior to joining each year. Annual boosters of 3 day sickness and botulism are also recommended if relevant to your area. Please contact us if you have any further questions regarding our vaccination program.

SEMEN & SOUNDNESS

Our bulls all undergo a Veterinary Bull Breeding Soundness Exam by Dr Mathew Verri, an accredited cattle veterinarian from the Inverell Veterinary Clinic. This exam includes a structural and reproductive soundness evaluation, scrotal measurement, semen density and motility testing and a morphology assessment. All bulls offered for sale are expected to pass a crushside assessment.

Details will be included in supplementary information sheets closer to sale day and certificates will be available for viewing on sale day. We will also publish and upload all certificates to the sale page on our website as they become available.

We recommend that you monitor and check your bulls during the breeding seasons and have an annual semen test performed prior to each breeding season to identify any problems should they be present prior to joining.

A note on Morphology

Rising 2 year olds will require a qualified pass or better to be offered for sale. Some of the yearling bulls may not get there prior to the sale due to their age. They are tested at 13-15 months and still have some maturing to do.

It is recommended that bulls with a qualified pass on morphology not be used as a single sire mating for that period. The results are likely to change with subsequent evaluations so it is worth rechecking morphology results as your bulls age. For semen collection and use in AI programs bulls require a morphology pass. Our morphology samples are examined by accredited morphologists Dr Greg Powell and Dr Mathew Verri of the Inverell Veterinary Clinic.

FERTILITY GUARANTEE

Every effort is made prior to sale to ensure soundness and fertility. Should an animal be proven infertile or incapable of natural breeding within 12 months of the sale a comparable replacement or credit minus the salvage value will be offered. Please make claims in writing within 12 months of the sale accompanied by a certificate from a registered veterinarian stating the nature of the problem and prognosis if relevant.

Please note this guarantee excludes costs associated with expenses, interest or damages. Injury or loss due to accident, illness, misadventure or negligence is not covered by this guarantee.

Please monitor your animals during breeding season and if you suspect any issues don't hesitate to contact us to discuss your concerns.

BIOSECURITY

We are a cattle tick free zone and J-BAS 6 herd.

HANDLING

Low stress stock handling is important to us and we endeavor to always treat cattle calmly and with respect. Our cattle are accustomed to being worked with horses, dogs and ATV's. They are familiar with electric fences. An appropriate degree of firmness is used when required, particularly when handling bulls to ensure they do not develop bad manners.

PREPARATION

Bulls are prepared in the paddock on pastures over the summer with light supplementary feeding. With the current dry spell it is unlikely this years bulls will have access to oats crops so the high roughage ration that is provided daily in their paddocks will be their main source of nutrition.

The cattle are young and we aim to feed them so they show their potential without becoming overprepared and potentially affecting their fertility and longevity.

SUPPLEMENTARY INFORMATION

Supplementary sheets will be made available with scan data, sale weights and semen testing results prior to the sale. Scanning technician, Roger Evans will provide data for EMA, rib and rump fat and IMF% at scanning that will be performed early June. Supplementary information will be uploaded to our webpage, they can be e-mailed upon request from mid June and printed copies will be available on sale day.

SETTLING IN

Our cattle are used to running in groups. Transportation and settling into a new home can be a tricky time. Please ensure you have appropriate companions to introduce them to and a little space while they get used to their new surroundings. Treat them respectfully and provide them with a good nutritional plane so they can continue to grow out to their genetic potential over the next 12-24 months.

The yearling bulls will be ready for a light joining period by spring. Ideally the initial joining would be with another bull of similar age and size that they have been running with.

If you want to discuss management, joining, maintenance and health we are happy to take your call.

BREEDPLAN & EBVs

The Belview herd has been Breedplan recorded since 2003. If applicable, registered lots have been analysed for 200, 400 and 600 day weights along with scrotal circumference, fat, EMA and IMF. These are the traits we try to balance in our breeding selections here at Belview.

The Breedplan data published in this catalogue will be from the April 2026 group Breedplan figures. Updated data for the yearlings will be provided in supplementary information in the lead up to the sale as was run after the catalogue went to print. Please note that the figures may shift by sale day.

EXPLANATORY NOTES FOR ESTIMATED BREEDING VALUES (EBVs)

Only Brangus GROUP BREEDPLAN EBVs can be validly compared between herds.

ESTIMATED BREEDING VALUES (EBVs)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). The EBV is therefore the best estimate of an animal's genetic merit for that trait. EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. The following guide is given for interpreting accuracy.

ACCURACY RANGE INTERPRETATION

Less than 50% Low accuracy and should be considered a preliminary estimate. The EBV could change substantially as more performance information becomes available.

50 – 74% Medium accuracy, usually based on the animal's own records and pedigree.

75 – 90% Medium-high accuracy and usually includes some progeny information. Becoming a more reliable indicator of the animal's value as a parent.

90% and above High accuracy. It is unlikely that the EBV will change much with the addition of more progeny data.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

TRAITS

BIRTH

Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

GROWTH

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weights of their calves.

200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

FERTILITY

Scrotal Size EBV (cm) is calculated from the scrotal circumference measurements of males taken between 300 and 700 days of age. Values are adjusted to 400 days of age. This EBV is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate larger scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

CARCASE

Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate larger eye muscle area and therefore higher retail beef yields.

Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcass. A more positive EBV indicates higher percentage yield for the 300kg carcass weight.

SELECTION INDEXES

Domestic Steer Index - Estimates the genetic differences between animals in net profitability per cow joined for an example self replacing commercial herd (run in a temperate environment) producing steers for the domestic trade. This index assumes that steer progeny are pasture grown to feedlot entry then feedlot finished for a short (75 day) feeding period before being marketed at 490 kg live weight (265 kg HSCW and 10 mm P8 fat depth) at 15 months of age. Daughters are retained for breeding.

Export Steer Index - Estimates the genetic differences between animals in net profitability per cow joined for an example self replacing commercial herd (run in a tropical environment) producing steers for the export trade. This index assumes that the steer progeny are pasture grown and finished before being marketed at 620 kg live weight (325 kg HSCW and 16 mm P8 fat depth) at 30 months of age. Daughters are retained for breeding.

DNA

The majority of our breeder herd now have a DNA profile. All registered lots have had the Brangus Bundle of genetic tests run. Included in this is parent verification, 100K SNP, coat colour, poll status and tenderness rating. Results for each animal will be included in this catalogue. Possible variations are explained below.

GENETIC TESTING RESULTS EXPLAINED

COAT:

- **ED** – homozygous dominant black
- **ED/e** – dominant black/recessive red
- **ED/E+** – dominant black/wildtype
- **E+/e** – wildtype/recessive red
- **E+/E+** – homozygous wildtype
- **e/e** – homozygous recessive red

POLL:

- **PcPc** – homozygous poll (PP)
- **HPc** – heterozygous poll (PH)
- **HH** – horned
- **NR** – Due to failed test OR due to unresolved haplotype

TENDERNESS:

Increase in 'tenderness' is association with favourable alleles seen within the selected marker panel. In reported results, the combined genotype results have been scored between 1 to 10, where 10 has the most favourable number of alleles present

PARENT VERIFICATION SUFFIXES

The following suffixes are used to identify the parent verification status of each lot.

- **PV** – Sire and dam verified by DNA
- **SV** – Sire verified by DNA
- **DV** – Dam verified by DNA
- **#** – DNA verification has not been conducted

REGISTRATION

Please refer to the Australian Brangus Association website (www.brangus.com.au) for details on Brangus Registration Information. Registration grade of all animals is identified in the catalogue.

Bull registrations will be transferred upon request at purchase.

REFERENCE SIRE

BALDRIDGE SR GOALKEEPER
ANG19E6243 ANGUS
PcPc ED/ED

Selected for use as an AI and ET sire for his maternal strength, breed leading growth and impressive phenotype. We have truly been taken back by the thickness and growth in these calves. His grand dam being the influential Baldridge Isobel Y69, his dam Baldridge Isobel E030 exhibits outstanding foot and udder quality. His calves are consistent and at the top of the weights and scan data in their cohorts and we think they are an exciting group to offer.

Baldridge SR Goalkeeper is represented by lots 20, 28, 29, 30 & 31

BELVIEW POSEIDON
BEL18RP052
PcPc ED/ED

His sire Belview Flynn (BEL16RM012) was a North Star son we used as a yearling. Flynn's Dam, Belview Caitrina J104 (BEL13RJ104) is out of a strong female line, she is 12 years old and she weaned her 10th calf early this year and is back PTIC. Poseidon's great grandmother (J104's mother) on his sire side, Belview Yaffa E40 (BEL09RE40) retired at almost 16 years of age after losing her 14th calf.

Poseidon's Dam, Belview Zena F10 (BEL10RF10) is an old favourite, representing Belview at Beef 2012 and many other shows. She goes back to Csonka of Brinks and weaned her 11th natural calf at 13 years of age. Flushed a couple of times, we have registered 26 progeny from Zena.

Poseidon has always had a calm temperament with great structure and mobility. We simply cannot look past the female influences in his pedigree. A true work horse used over many joinings, he is now been regretfully retired and this years offerings will likely be the last chance to secure one of his sons.

Poseidon is represented by lots: 11, 13, 17, 41, 47 & 55

REFERENCE SIRES

BELVIEW T084

BEL22RT084

Pc/Pc ED/ED

Entering the sire pen as a yearling, T084 is producing consistent and tidy progeny across a range of cow types. The ET product of a cow we unfortunately lost too soon to misadventure by Voewood Lawfirm, T084 is sleek coated, well muscled bull with a very tidy sheath design in a good frame. He boasts an impressive run of EBV's particularly in growth and IMF. He is a versatile bull and his progeny throw back to a more ultrablack type phenotype.

Belview T084 is represented by lots: 15, 37, 43, 45 & 53

BIMBADEEN TIVOLI T017

BIM21RT17

Pc/Pc ED/ED

The top priced bull at the 2023 Bimbadeen sale Tivoli has left a mark on our herd. A complete outcross of genetics, he was selected for his impeccable structure, sleek coat, length and presence. He is a son of the impressive Bimbadeen Memphis sire and boasts a line of impressive females in his pedigree that deliver year after year.

Bimbadeen Tivoli is represented by lots: 7, 12, 14, 35, 42, 44 and 48

BELVIEW TAILOR MADE

BEL22RT006

Pc/Pc ED/ED

A Suhn's Business Line son out of well used and loved Belview Darcia P098. Used as a yearling and sold in the 2024 sale, a neat bull with good sheath design, thickness, length and beautiful skin.

Belview Tailor Made T006 is represented by lots 52 & 54

Also a purchase from the Bimbadeen 2023 sale he has introduced some fresh genetics into the herd. An incredibly thick, well muscled bull with a placid, teddy bear temperament that he has passed down into his progeny. A very easy bull to have in the sire paddock.

Bimbadeen Temple is represented by lots: 9, 22, 25, 38, 51 & 55

BIMBADEEN TEMPLE 081

BIM21RT81

PcPc ED/ED

Used as an ET and an AI sire selected for his traditional Australian bloodlines and phenotype, sleek coat and unrelated genetics to our herd. We have retained a number of females and a V bull who is heading into his 2nd working season. We love their moderate, thick frames, distinct brangus features, soft skin, quiet natures and correctness. He is the sire of the 2024 sale topper, Belview Trifecta T145 and has 4 sons in this years sale. They are consistent across differing cow lines and their raw scan data on EMA and fats were particularly impressive this year.

Bonox 806 is represented by lots 3, 4, 5 & 21

BONOX 806

35913R806

PcPc ED/e

Purchased from Triple B in 2021 Quarantine has a higher brahman percentage than our typical sire at 44%. He has been used extensively throughout our herd and his calves are growthy in a generous frame with impeccable skin. He has a blend of Australian and US genetics in his pedigree, he displays length and sire appeal. His sons embody his correctness and presence and he was the sire of the 2025 Belview sale top priced bull Belview Uluru U297. After many years of service Quarantine has now been retired as a Belview sire, he remained perfectly sound and mobile through his working life and has carried this quality down into his daughters we have retained.

BBB Quarantine is represented by lots: 1, 34, 40 & 58

TRIPLE B QUARANTINE

BBB19RQ388

Pc/Pc ED/ED

For data information on the following reference sires please use their ID in the Brangus database or click on the link provided in their progenies pedigree on the database:

BELVIEW SPECTRUM S034 BEL21RS034 PcPc ED/ED

First used as a yearling, S034 unfortunately never found himself in front of the camera lens. A Belview Gold Rush N077 son, Spectrum displayed a long body, soft and sleek in the skin, well muscled on strong legs and feet. He has left behind some outstanding progeny. A very quiet bull that was always working, even when he wasn't suppose to be!

Belview Spectrum S034 is represented by lots 6, 8, 10, 16, 26 and 27

BELVIEW TOP SECRET T023 BEL22RT023 PcPc ED/ED

A business line son out of Belview Ellie L020, used for 1 season as a yearling before being onsold, Top Secret is a tidy thick set bull with tidy underline.

Belview Top Secret T023 is represented by lots 2, 19, 23, 39, 50 & 60

BELVIEW SHOWMAN BEL21RS026 PcPc ED/e

A son of Belview Yaffa E40, described in Belview Poseidon P052's notes, by Belview Real Deal M060, who was the product of an Embryo purchase from Telpara Hills. Showman is just that, a bull with growth, great skin and presence with good carcass data to back it up.
