

Learn More About Black Hills Spruce!

Scientific Name: *Picea glauca* var. *densata*

MATURE SIZE: Height 20–40 ft Width 10–15 ft

Black Hills spruce is a medium height evergreen tree with a dense habit and a broad, pyramidal form. It is a good, hardy addition to residential landscapes, or for use in windbreaks. New bright green foliage matures to blue-green. Provides winter cover, nesting sites and forage for wildlife.

HIGHLIGHTS

- Evergreen tree with low maintenance
- Winter interest
- Great as privacy screen or windbreak
- Adaptable to various soils
