

Learn More About Pagoda Dogwood!

Scientific Name: *Cornus alternifolia*

MATURE SIZE: Height 15–25 ft Width 20–30 ft

Pagoda dogwood is an excellent native plant for the four-season garden. The unique horizontal branching pattern has a distinct tiered habit, often catching snow in the winter. Clusters of white flowers show up in spring, dark green foliage turns a beautiful burgundy-red in fall, and blue-black berries. Butterflies, game birds, small mammals, songbirds, and water birds are attracted to pagoda dogwood. Pagoda dogwood makes an attractive small tree or large shrub in a shade garden or for naturalizing.

HIGHLIGHTS

- Stunning landscape small tree built for ideal curb appeal.
- Illinois native species that supports wildlife and adds to biodiversity.
- unique tiered branching resembling a pagoda, hence its name.
- Manageable and small sized tree.
- 4 season interest.
