

Learn More About Eastern White Pine!

Scientific Name: *Pinus strobus*

MATURE SIZE: Height 60–100 ft Width 60–75 ft

The Eastern white pine is an evergreen tree for landscapes with ample space. Its fine feathery needles, open canopy, and straight trunk get more picturesque with age. The soft texture of the foliage, the graceful horizontal branching, and the year-round evergreen color give it an aesthetic quality that few other large conifers can match. Trees are fast-growing and long-lived. The evergreen canopy offers year-round shelter for birds, mammals, and insects; cones provide winter food

HIGHLIGHTS

- Iconic evergreen tree
- Fast growing and long lived
- Excellent windbreak and provides year round privacy
- One of the largest native conifers to the great lakes region
