

HUMERUS BRACING

PART#	Model	SIZE	LENGTH	CIRUMFERENCE
621060011	Regular	Small	25 cm	18-26 cm
621060012	Regular	Medium	27 cm	26- 34 cm
621060013	Regular	Large	29 cm	34 - 42 cm
621060014	Regular	XLarge	32 cm	42 - 50 cm

* Measurement:
Circumference arm proximal.

ALLARD (SWEDEN) HUMERUX HUMERUS ORTHOSIS

This humerus orthosis is based on the well-known principles of a "Sarmiento orthosis", an even circular soft tissue compression. The three circular bands are tightened independently of each other. The orthosis' anchorage over the shoulder area means that it fits well in place without slipping down. The strap that goes under the opposite arm has a removable padding for increased comfort. This provides a comfortable orthosis that is easy to apply and easy for the patient to accept. The material of the orthosis allows the skin to breathe and reduces the risk of irritation. The orthosis has two thermoplastic plates that can be adjusted by heating if necessary and the shape can be adjusted with a scissor. This is not necessary in most cases. The orthosis provides free movement of the elbow joint. The orthosis has an inner sleeve to protect the sensitive skin when tightened. The textile materials are tested in accordance with Öko-tex standard 100 and do not contain latex.

Recommended Range Of Application:

Indicated for the treatment of diaphyseal humeral fractures, postoperative treatment of fractures and control of the instability of the fractures focus during the consolidation process.

ELBOW BRACING

BREG (USA) TENNIS ELBOW STRAP

A padded forearm band to provide focused compression for patients with tennis elbow and golfer's elbow.

Features

- Durable elastic material
- Redesigned for easier strapping

PART	SIZE	Forearm Measurement
VP30604-010	XSmall	8" - 9" (20 - 23cm)
VP30604-020	Small	9" - 10" (23 - 25cm)
VP30604-030	Medium	10" - 11" (25 - 28cm)
VP30604-040	Large	11" - 12" (28 - 30cm)
VP30604-050	XLarge	12" - 14" (30 - 36cm)

*Circumference taken at widest part of forearm

Indications:
Medial and lateral epicondylitis.

BREG (USA) HEX (HYPEREXTENSION) ELBOW BRACE

The HEX Elbow Brace controls range of motion and protects against hyperextension, making it the ideal brace for use during high-level activities. With its half-wrap bicep sleeve, the HEX is easy to apply and remove.

The posterior straps prevent the brace from migrating, maximizing the product's effectiveness.

Features

- Slip-on half-wrap bicep sleeve.
- "X" anterior straps with strap-lock buckle.
- Adjustable hinges to control desired ROM (0° - 40° extension /45°-90° flexion)
- Half Airmesh for breathability and half Neoprene for compression.
- Additional elbow foam padding to protect olecranon process.

PART#	SIZE	ARM MEASUREMENT
14482	Small	9" - 10.5" (23 - 27 cm)
14483	Medium	10.5" - 12" (27 - 30 cm)
14484	Large	12" - 13.5" (30 - 34 cm)
14485	XLarge	13.5" - 15" (34 - 38 cm)

*Circumference taken at mid-bicep

Indications:
Chronic Elbow Injuries, elbow hyperextension, elbow tendonitis, post-Elbow Dislocation.
