

RELIABLE

**KEEP YOUR VEHICLE
HEALTHY, RELIABLE AND SAFE
BY GETTING IT SERVICED REGULARLY**

How often should that be? How many miles can you drive your vehicle before fluids or parts need to be replaced depends on your driving habits. Those who drive in stop and go traffic put a bigger strain on their vehicle so that is considered "severe" driving. Your car will need to be serviced more frequently than those who zip along the highways with no need for frequent stops.

It pays to be consistent with your car's service! Many think it is okay to delay or even skip an oil change all together. This accelerates engine wear and can cause premature engine damage. Driving your car on fumes instead of filling up before the warning signal comes on isn't good for your vehicle either. Using the right fluids and the right parts are vitally important to keep your car from aging. The wrong weight oil or the wrong transmission fluid won't help your car stay young.

When our service advisors recommend work, it is because we want to keep your car reliable. When you come in for service, we can also let you know what needs to be done immediately and what can be postponed for a short time. That often helps our customers with their budgets. Having service and repairs done in a timely manner keeps your vehicle safe and reliable... and saves you money! The longer vehicle maintenance is put off, the more expensive everything costs and your vehicle will start to deteriorate. With proper care, virtually any car can be kept running as long as you want to keep it.

**If you want to keep your car from aging, keep it clean
and keep it serviced in timely intervals. You and your
car can have a long and happy life together!**

WE CAN TACKLE ALL OF YOUR CAR'S MAINTENANCE NEEDS!

We may not be football superstars but we are the superstars of auto service and repair! No matter the type of car you drive, our team of certified technicians has the knowledge and training to ensure it runs safely and reliably.

We know that just like in a football game where it takes each player doing their job correctly to have a winning team, it takes each component operating in peak efficiency to have a properly running car.

- **Fluids** – Your car relies on fluids to stay in the game.
- **Filters** – Filters block contaminants from entering your car's operating systems.
- **Battery & Charging System** – If this system fumbles you aren't going anywhere. We will keep it charged and ready to go when you are.
- **Belts and Hoses** – One snap or break could leave you on the sidelines. We'll make sure the belts and hoses are in good condition.

This is just a small example of all the systems that keep your car running properly. Whatever your maintenance needs are, we are here to help keep your car in the game!
