Winter Cereal Field Walk

Wednesday 23rd September 2026 | "Tosari"

You're invited to a field walk where we will inspect the latest wheat & barley varieties planted over a range of planting dates, seeding rates, crown rot inoculum & seed dressing treatments. We will also inspect new milling oats.

Delivered through GRDC's National Grower Network, the event is led by MCA Agronomy's Paul Castor and Brendan Burton.

We will have **Steven Simpfendorfer** from NSW DPI leading crown rot discussions as well as seed company representation from **AGT & Intergrain**

9:00 am- Meet at Tosari Shed

Join in discussions on

- **Wheat & Barley phenology & the Crop Flowering Calculator project**
- **Seeding Rates for wheat & barley**
- **Crown Rot & impacts of variety choice, starting inoculum levels, plant population & seed dressing**
- **New wheat & barley variety releases**

12: 00pm - Refreshments to follow
