

Condamine

Winter Cereal Field Walk

Wednesday 9th September 2026 | "Noonameena"

You're invited to a field walk where we will inspect the latest wheat & barley varieties planted over a range of planting dates, seeding rates, crown rot inoculum & seed dressing treatments.

AGT, LongReach and Intergrain will be on hand to assist in discussions .

Delivered through GRDC's National Grower Network, the event is led by MCA Agronomy's Paul Castor and Brendan Burton alongside hosts Sam and Ben Taylor

2:00 pm- Meet at Field Site (follow signs)

Join in discussions on

- **Wheat & Barley phenology & the Crop Flowering Calculator project**
- **Seeding Rates for wheat & barley**
- **Crown Rot & impacts of variety choice, starting inoculum levels, plant population & seed dressing**
- **New wheat & barley variety releases**

5: 00 pm- Refreshments to follow
