

CrawfordSchools™

Pre-Primary · Preparatory · College

The Crawford Mission Statement

“To prepare young people to meet the challenges of the future.”

Crawford Schools achieve this by:

- Encouraging independent thought and teaching students to think, understand and apply, to challenge assumptions, and to embrace life-long learning
- Seeking to discover talent in every student, and praising effort and achievement on every front
- Selecting inspiring teachers who encourage students to maximise their potential.
- Continually reviewing and renewing our policies to ensure that the education which we provide remains innovative and appropriate
- Exposing students to a full spectrum of local, national and international contexts which will enrich and expand their respect for and understanding of their own and other cultures, and enable them to become effective global citizens
- Emphasising the importance of individuality and relationships with others to develop socially conscious young people who show mutual respect
- Developing leadership and team-play through a wide variety of sports and cultural pursuits at both competitive and social levels
- Implementing a school policy which is caring and empathetic, and which respects each child’s needs, dignity and rights where the link between freedom and responsibility is emphasised.
