

BTS 80
BTS 75 V

Universal application, individual functions and assured quality

Whether standard, narrow or wide, whether LH, RH, or single or double action – dormakaba BTS 80 and BTS 75 V door springs are designed for all types of door.

A comprehensive program of accessories ensures that they can be used successfully with a wide variety of door constructions and floor coverings.

Thanks to a wide range of functions, which can be individually selected to suit different requirements, dormakaba BTS 80 and BTS 75 V floor springs offer maximum reliability and quality.

Certified to ISO 9001.

Benefits

For the trade

- Reduced stock requirements because of separate, interchangeable spindles.
- Slim product range offering all key functions.

For the installer

- Suitable for installation with LH or RH single and double action doors.
- Interchangeable spindles enable easy adaptation to structural conditions-even when retrofitted.

For the architect/specifier

- Concealed installation for maximum visual elegance.
- All essential functions provided.
- Proven, robust design capable of withstanding leaf weights of up to 300 kg (BTS 80).

For the user

- Constant, temperature-independant closing cycle.
- Highly efficient mechanism gives maximum user convenience.

Application and Installation

Accessories

Universal cover plate

Adaptable to right or left hand single action applications by simply snapping off the appropriate pre-blanked corner sections. For double action doors, the corner sections remain in place. The universal cover plate is available in stainless steel or satin brass (material thickness 1.5 mm).

Calculating the necessary length of spindle extension:
 Extension = X – Floor clearance (normally 8 mm)
 Collar height Z of the extended spindle inserts = Spindle extension length + 3 mm (collar height of the standard spindle insert)

Spindles

A range of interchangeable spindles is available to provide greater floor clearance if required (e.g. doors with thresholds, carpeted floors etc).

Special spindles available on application: e.g. with flat face profile and 3° offset or square section; spindles for non-dormakaba-specific accessories are also available.

dormakaba 2300 sealing compound

For filling cavities between the floor spring body and the cement box to protect against moisture penetration

Information about other accessories such as **door straps and top centres** can be found in the "Accessories for dormakaba BTS Floor Springs" leaflet

Specification Text

BTS 80

Universal non-handed floor spring conforming to DIN EN 1154 for single and double action doors up to max.300 kg leaf weight. With adjustable closing speed and closing action from approx. 175°, with hydraulically fully controlled closing cycle and backcheck. With integral pressure compensation feature for temperature-independent hold-open between 75° and 175° (removable). With adjustable hold-open start point and delayed action (end of delayed action range adjustable between 75° and 105°). Including cement box.

Standard and optional functions of the BTS 80

BTS 80

- 1 Adjustable closing speed
- 2 Hold-open range or delayed action range
- 3 Adjustment range – point at which hold-open begins, or end of delayed action range (approx. 75° to 105°).
- 4 Mechanical backcheck (from approx. 80°)

Hydraulic hold-open

The integrated hold-open function allows the door to be held open at any angle between 75° and 175°. The angle at which the holdopen function begins can be adjusted in the range of 75° to 105°.

Backcheck

The integrated mechanical backcheck function protects the wall and door from damage caused by excessively vigorous opening.

Delayed action

The delayed action function slows the door closing speed, thereby allowing disabled persons, mothers with pushchairs, staff with trolleys or hospital gurneys etc. to pass through the door without problem.

BTS 75 V

- 1 Adjustable closing speed in the range 175° – 15°
- 2 Adjustable closing speed in the range 15° – 0°.
- 3 Mechanical backcheck (from approx. 70°).
- 4 Fixed hold-open at 90° or 105° (option).
- 5 Adjustable spring strength (EN 1–4).

Closing speed

With two independently adjustable closing ranges (175° – 15° and 15° – 0°) the dormakaba BTS 75 V is ideally adaptable to different structural conditions.

Backcheck

The integrated mechanical backcheck function protects the wall and door from damage caused by excessively vigorous opening.

Fixed hold-open (option)

With the fixed hold-open function the door can be held open at an angle of 90° or 105°, depending on model.
Not suitable for use on Fire doors.
