

Tubelite® TU24650 Storefront

Dual cavity pour and debridge ultra-thermal barrier

Tubelite's dual cavity pour and debridge ultra-thermal barrier storefront line has been expanded and enhanced with the addition of TU24650 Series 2" x 6-1/2" profiles.

The dual cavity pour and debridge ultra-thermal barrier decreases U-Factors and increases CRF by over a single P&D pocket when using the same size and type of insulated glass. Azon's Lancer® mechanical lock provides long-term resistance to shrinkage of the polyurethane barrier. The glass plane matches that of our 4-1/2" system depth for a pleasing reveal on the exterior and interior sides of the frame. A wide variety of standard anodized and painted colors are available to complement any project with warranted protection, as well as street appeal.

Our TU24650 Series Storefront products are subjected to thorough testing by an independent laboratory, ensuring that you get the highest quality storefront framing products that the industry has to offer.

Tubelite® TU24650 Storefront

Dual cavity pour and debridge ultra-thermal barrier

Thermal-Block
HIGH-PERFORMANCE THERMAL FRAMING

System Features:

- TU24650 Series Storefront is recommended for use on taller ground floor applications and can span openings up to 14 feet high without steel reinforcing. Framing has 1/2" bite for use with glass or panels up to 1" thick. Verticals can be steel-reinforced for high performance against strong wind loads. Tubelite 3700 Series operable windows can be glazed into the storefront framing pocket for natural ventilation.
- This system has dual cavity pour and debridge ultra-thermal barriers for high performance, but is also available as T24650 single pour and de-bridge thermal system, or as E24650 non-thermal framing.
- Members can be assembled using screw spline or clip joinery, and framing is compatible with Tubelite's Medium and Wide Stile Thermal-Block® Doors.
- Our TU24650 Series Storefront products are subjected to thorough testing by an independent laboratory, ensuring that you get the highest quality storefront framing products that the industry has to offer.

Performance Test Standards

Air Performance	ASTM E 283
Water	AAMA 501 and ASTM E 331
Structural	ASTM E 330
Thermal	AAMA 1503
Thermal Break	AAMA 505 and AAMA TIR-A8
Acoustical	AAMA 1801 and ASTM E 1425

Tubelite® TU24650 Storefront Product Specifications

Application: Low to mid-rise commercial buildings including retail, office, healthcare, schools, etc.

Description: 2" x 6-1/2" dual P&D outside or inside flush glazed storefront, front set glass.
