# WHY YOUR COMMUNITY WILL LOVE MN BIN BATH:

## **Eliminate Smelly Odors**

This is professional cleaning. Water hot enough to vanquish harmful bacteria, just like a dishwasher. Both the inside and outside of bins. This also reduces rodent & insect infestations.

*We are especially beloved by communities with "trash cans must be stored in your garage" rules.*

## **We Provide Seamless, Convenient Service**

We arrive to your community the day after the waste hauler empties the bins, bring everything, do all the work, and leave your community's bins immaculate. Furthermore, we send one week before & one day before reminders to ensure everyone leaves their bins accessible for us.

*Customers do not need to be home for us to clean their bins.*

## **Exude High-End Luxury**

Clean surroundings improve how people perceive the entire community; and not only that, residents gain free-time and/or community maintenance staff has one less cumbersome task on their plate.

## **Our service is environmentally friendly.**

We only use Green Seal-Certified solutions, and we contain all wastewater from inside the bin that we then responsibly dispose of per local guidelines.
