Bowling Green Gripper

2.5m lengths

20 / carton (50m)

5kg / carton

PRODUCT SPECIFICATIONS

Bowling Green Gripper was developed specifically to install outdoor sports surfaces over a padded underlay.

It is ideal for areas requiring a low profile, high strength gripper that is resistant to moisture, rot, termites and fire.

Such areas include Double-Bond or Direct Stick installations in night clubs, hotels and casinos or any areas subject to regular extraction cleaning which may cause the floorcovering to shrink away from the perimeter.
