

Diaper Shirt Pattern Printing Instructions

Before beginning to print, make sure your printer is set to print at 100%. There is a 1-inch square provided on each pattern to use to confirm accurate sizing.

Print out all pattern pieces. Put the pieces together, matching triangles and dotted lines, to reconstruct the garment pattern. Use this as a guide to cut your own pattern--from interfacing, muslin, or even poster board for a hard pattern easy to be traced onto your designer fabric.
