

Favours Day Nursery Ltd Policy and Procedure

Allergies and Allergic Reactions

At Favours Day Nursery we are aware that children may have or develop an allergy resulting in an allergic reaction.

We aim to ensure allergic reactions are minimised or, where possible, prevented and that staff are fully aware of how to support a child who may be having an allergic reaction.

Our procedures

- All staff are made aware of the signs and symptoms of a possible allergic reaction in case of an unknown or first reaction in a child. These may include a rash or hives, nausea, stomach pain, diarrhoea, itchy skin, runny eyes, shortness of breath, chest pain, swelling of the mouth and/or tongue, swelling to the airways to the lungs, wheezing and anaphylaxis. Staff are trained in appropriate treatments for allergies and anaphylaxis, the differences between allergies and intolerances and that children can develop allergies at any time, especially during the introduction of solid foods.
- Before a child is admitted to the setting we obtain information about special dietary requirements, food allergies and intolerances that the child has
- We have ongoing discussions with parents and, where appropriate, health professionals to develop allergy plans for managing any known allergies. We ask parents to inform staff of any allergies or intolerances discovered after registration
- We share all information with all staff involved in the preparing and handling of food, including at mealtimes and snack times and keep an allergy register on Dayshare
- Where a child has a known allergy, the nursery manager will carry out a risk assessment with the parent prior to the child starting the nursery and/or following notification of a known allergy and this assessment is shared with all staff. This involves displaying photos of the children along with their known allergies in food areas
- All food prepared for a child with a specific allergy is prepared in an area where there is no chance of contamination and served on equipment that has not been in contact with this specific food type, e.g. nuts, gluten
- Food or drink that contains a known allergen for that child will be served on a red plate / bowl / cup, to identify the risk to all staff
- The manager, chef and parents will work together to ensure a child with specific food allergies receives no food at nursery that may harm them. This may include designing an appropriate menu or substituting specific meals on the current nursery menu
- At each mealtime and snack time we ensure staff are clear who is responsible for checking that the food being provided meets all the requirements for each child
- Seating is monitored for children with allergies. Where deemed appropriate, staff will sit with children who have allergies and where appropriate staff will discuss food allergies with the children and the potential risks
- If a child has an allergic reaction to food, a bee or wasp sting, plant etc. a paediatric first-aid trained member of staff will act quickly and administer the appropriate treatment, where necessary. We will inform parents and record the information on a serious accident form
- If an allergic reaction requires specialist treatment, e.g. an EpiPen, then at least two members of staff working directly with the child and the manager will receive specific medical training to be able to administer the treatment to each individual child.

Food Information Regulations (FIR) 2014

We incorporate additional procedures in line with the FIR, including displaying our weekly menus, attaching them with our newsletter and daily details on our online system identifying any of the 14 allergens that are used as ingredients in any of our dishes.

In the event of a serious allergic reaction and a child needing transporting to hospital, the senior on duty will:

- Call for an ambulance immediately if the allergic reaction is severe. Staff will not attempt to transport the sick child in their own vehicle
- Ensure someone contacts the parent(s) whilst waiting for the ambulance and arrange to meet them at the hospital
- Arrange for the most appropriate member of staff to accompany the child, taking with them any relevant information such as registration forms, relevant medication sheets, medication and the child's comforter
- Redeploy staff if necessary to ensure there is adequate staff deployment to care for the remaining children. This may mean temporarily grouping the children together
- Inform a member of the management team immediately
- Remain calm at all times and continue to comfort and reassure the child experiencing an allergic reaction. Children who witness the incident may also be well affected by it and may need lots of cuddles and reassurance. Staff may also require additional support following the incident
- Where a serious incident occurs and a child requires hospital treatment, Ofsted will be informed

This policy is updated at least annually in consultation with staff and parents and/or after a serious incident.
