

Favours Day Nursery Ltd Policy and Procedure

Sleep

At Favours Day Nursery we aim to ensure that all children have enough sleep to support their development and natural sleeping rhythms in a safe environment.

The safety of babies' sleeping is paramount. Our policy follows the advice provided by The Cot Death Society and Lullaby Trust to minimise the risk of sudden infant death syndrome (SIDS). We make sure that:

- Babies are placed on their backs to sleep. If a baby has rolled onto their tummy, we turn them onto their back again unless they are able to roll from back to front and back again, on their own, in which case we enable them to find their own position
- Babies and toddlers are never put down to sleep with a bottle to self-feed
- Babies and toddlers are monitored visually when sleeping looking for the rise and fall of the chest and if the sleep position has changed
- Checks are recorded every 15 minutes and as good practice we monitor babies under six months or a new baby sleeping during the first few weeks every 10 minutes until we are familiar with the child and their sleeping routines, to offer reassurance to them and families
- Babies and children are never left to sleep in a separate sleep room without staff supervision

We provide a safe sleeping environment by:

- Monitoring the room temperature
- Using clean, light bedding or blankets and ensuring babies are appropriately dressed for sleep to avoid overheating
- Only using safety-approved cots and other suitable sleeping equipment (i.e. mats) that are compliant with British Standard regulations
- Using a firm and flat mattress in conjunction with a clean fitted sheet
- Only letting babies sleep in prams if they lie flat and we have written permission from the parent
- Enabling babies to sleep outdoors, where appropriate and with parent permission
- Not using cot bumpers or cluttering cots with soft toys, although comforters may be given where required
- Keeping all spaces around cots and beds clear from hanging objects i.e. hanging cords, blind cords, drawstring bags
- Ensuring every baby and toddler is provided with clean bedding labelled for them and working in partnership with parents to meet any individual needs e.g. if a child prefers to sleep in a sleeping bag, we will ask parents to bring one from home
- Cleaning all bedding as required and at least weekly
- Transferring any baby who falls asleep while being nursed by a practitioner to a safe sleeping surface to complete their rest
- Having a No smoking or vaping policy

We ask parents to complete forms on their child's sleeping routine with the child's key person when the child starts at nursery and these are reviewed and updated at timely intervals. If a baby has an unusual sleeping routine or a position that we do not use in the nursery i.e. babies sleeping on their tummies or in a sling, we will explain our policy to the parents and not usually offer this unless the baby's doctor has advised the parent of a medical reason to do so. In such cases, we would ask parents to sign to say they have requested we adopt a different position or pattern on the sleeping baby's form.

We recognise parents' knowledge of their child with regard to sleep routines and will, where possible, work together to ensure each child's individual sleep routines and well-being continues to be met. However, staff will not force a child to sleep or keep them awake against his or her will. They will also not usually wake children from their sleep.

We create an environment that helps to settle children that require a sleep, for example dimming the lights or using soft music, where applicable. We will maintain the needs of the children that do not require a sleep and ensure they can continue to play, learn and develop. This may involve taking children outdoors or linking with other rooms or groups of children.

Staff will discuss any changes in sleep routines at the end of the day and share observations and information about children's behaviour when they do not receive enough sleep.

Sleeping twins

We follow the advice from The Lullaby Trust regarding sleeping twins while working with parents to maintain sleep routines and well-being.

Further information can be found at: www.lullabytrust.org.uk

Information from the NHS:

Sleep is very important to a child's wellbeing. These are hours of sleep based on age, as recommended by the Millpond Children's Sleep Clinic:

Age of child	Daytime	Night time
3-5 months	4-5 hours	10-11 hours
6-9 months	3 hours	11 hours
10-17 months	2 hours 30 minutes	11 hours
18-23 months	2 hours	11 hours 30 minutes
2 years	1 hour 30 minutes	11 hours 30 minutes
3 years	Up to 45 minutes	11-12 hours
4 years		11 hours 30 minutes
5 years		11 hours
6 years		10 hours 45 minutes
7 years		10 hours 30 minutes

Staff will not wake a sleeping child unless necessary within the guidelines above. For example, a child aged 2 will not be woken up until they have had at least 1 hour 30 minutes of sleep. If a child is close to the next age bracket the nursery manager may be able to discuss gently decreasing the limit. Evidence shows that sleep is just as important as healthy eating and exercise for children to develop. Those who don't get enough sleep are more likely to be overweight or obese. This is because they tend to crave and eat sugary or starchy food during the day to give them energy to stay awake. Younger children who are persistently sleep-deprived seem irritable and overactive, seek constant stimulation and don't concentrate well. Such symptoms can be mistaken for mild ADHD (attention deficit hyperactivity disorder).
