DorteK GRP doors

Engineered for hygiene, strength and longevity

GRP (Glass Reinforced Polyester) is an extremely tough, clean, water resistant material ideal for demanding environments where performance and hygiene are crucial.

Our range of GRP doors are built to last and do not suffer the day to day wear that can be caused by the movement of trolleys and equipment.

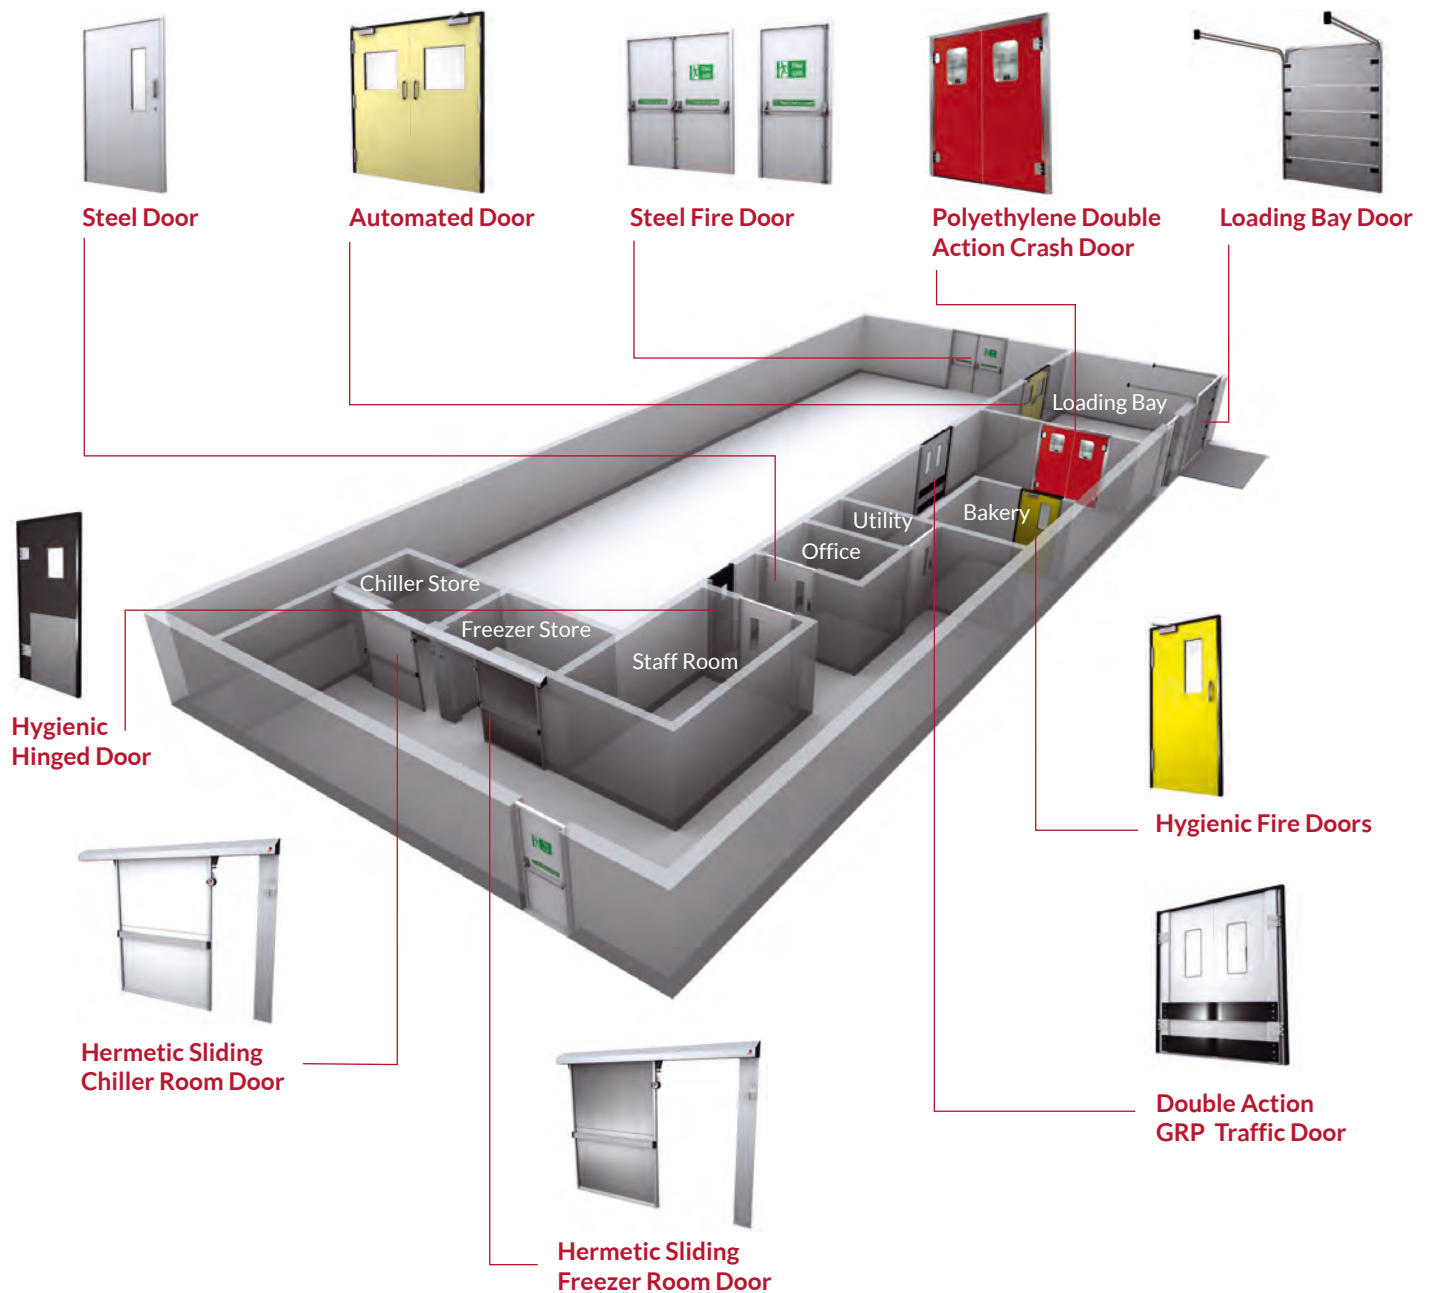

Designed & constructed to industry leading standards, all our doors comply with the latest fire, DDA, hygiene & safety standards.

Key features:

- Fully encapsulated seamless design
- Free from ledges, voids, holes and crevices
- Easy to clean and disinfect
- Fire, water and chemical proof
- Strong, stable, lightweight, low maintenance
- Will not rot, rust, swell, crack or delaminate.

Innovative solutions for a range of Retail applications

Dynamic door systems for:

- ✓ Hygiene and cleanability
- ✓ Fire protection
- ✓ Energy savings and conservation

- ✓ Safety and security for personnel, products and equipment
- ✓ Operational efficiency and door life cycle

- ✓ Increased productivity
- ✓ Access control
- ✓ Durability in high traffic areas

Product Selector

Product Selection

Dortek doors are designed with safety, style and functionality in mind. Our doors are available in a range of standard or custom sizes, colours and configurations to suit your environment.

Installation & Servicing

All installations and service calls are carried out by our own fully-trained engineers. Please contact us to find out more about our range of service contracts.

Double Action GRP Traffic Doors

- Dortek's GRP swing crash doors have been designed for high traffic retail applications
- All doors are lightweight, durable and easy to operate
- Their strong, hard-wearing and long lasting construction requires minimum maintenance
- The smooth, non-porous gelcoat finish makes them easy to clean and resistant to water and cleaning chemicals
- 180 degree swing hinge system
- Lockable door options available for extra security
- Doors come fitted with polypropylene bumpers to guard against aggressive traffic and prevent damage to the door face.

Double Action GRP Fire Doors

- Fire tested up to 240 minutes in accordance with BS EN 1634-1:2014
- Smooth hygienic, easy to clean GRP surface
- Lightweight and user friendly, ideal for heavy traffic
- Easy to open using floor springs
- Fitted with polypropylene bumpers as standard
- Triple glazed firelite safety windows - tested up to 3 hours
- Significant cost savings – no need for a fire shutter
- Can be linked to a fire alarm management system.

Automations

Our automations are designed to provide safe, efficient and convenient access.

Our systems can be connected to many types of activation devices from a basic push button to a fully-integrated building management system.

Steel Doors

- Powder coated finish for protection against harsh or corrosive environments
- Standard frame and bespoke design profiles available
- Grade 13 hinges and security dog bolts supplied as standard
- Over panels and side panels supplied with solid, glazed or louvered panels
- Range of vision panels, thresholds and glazing options
- Fire rated up to 4 hours - tested to BS EN 1634-1:2008
- SR1, SR2, SR3 and SR4 security doors tested to LPS1175 - anti-drill, anti-pick, anti-bump & anti-snap.

Product Selector
