Current Experience

Daniel has experience in managing a diverse case load including clients with brain injury, cervical spine injuries, orthopaedic, musculoskeletal and neurological injuries, neurodiversity, cognitive challenges and complex psychological and psychiatric impairment. Daniel is recognised for his advocacy on behalf of his clients, evidence-based practice and pragmatic oversight in management of complex needs and high-risk challenging cases. Daniel works using a client-centred approach and with strong evidence based clinical reasoning, tenacity, attention to detail and high standards of professionalism. He brings both clinical and management skills to the case management role in developing, co-ordinating and monitoring packages of treatments and care. Daniel is skilled in fostering collaboration across services and multidisciplinary teams and liaises with a wide range of external teams including care teams, local authorities, safeguarding and child protection services, addiction services, medico-legal teams and professionals both in the private and NHS sector. Daniel remains steady and professional in the face of challenging behavior. He maintains boundaries whilst continually promoting rehabilitation and striving for the best possible outcomes for the clients.

Previous Experience

A significant part of Daniel's career has been spent in leadership and rehabilitation roles supporting adults and children with complex neurological conditions, including brain injuries and neurodevelopmental disorders. In his previous role as Rehabilitation Team Leader, Daniel managed a team of ten rehabilitation assistants supporting a client with extensive 24/7 care needs. He ensured treatment plans were implemented in line with CQC standards, provided training and supervision, and delivered hands-on cognitive, physical, and social rehabilitation. As a Case Manager, Daniel has recent experience of working with Client's with Acquired Brain Injury with sight loss and a long term client with a brain injury after Medical Negligence with a co-morbidity of Autism.
