

SAIL™ Predictive Analytics Solutions for Brokers and Consultants

Artificial Intelligence + Claims Data = Actionable Insights

Finding the right solution for your clients can be extremely challenging, particularly with little or no access to claims data.

Making sure the group is **rated accurately and providing the correct funding options** to your clients makes all the difference, which is why Brokers and Consultants partner with Gradient AI to better inform and guide their clients.

Why Gradient AI's SAIL™ Predictive Analytics Solution?

Brokers and Consultants select Gradient AI because it empowers them to:

- Share high-cost pharmacy data to explore PBM alternatives and reduce group pharmacy spending.
- Optimize stop loss considerations
- Better understand risk due to mergers and acquisitions
- Leverage our predictive modeling capabilities to project future risk
- Negotiate with insurance carriers on underwriting pricing

SAIL™ provides a greater level of transparency into a group's health risk, enabling Brokers and Consultants and their clients to tailor group health solutions to the specific composition of the employer group.

Improve Risk Assessment with SAIL™

Gradient AI combines the power of machine learning with medical, prescription, and lab data, delivering predictive insights to identify risk and project claims with greater speed and accuracy.

To find out how you can leverage Gradient AI's expertise to help you better maintain group health risk and control costs, contact us.
