THINNR

BOOST

Thinnr Boost, an FDA-registered, homeopathic, OTC medication, is a scientifically designed formulation that targets key aspects of weight loss, hormone balance, and overall well-being. It is formulated to help promote hormonal harmony, the regulation of cortisol levels, and improved detoxification processes critical for effective fat loss. Formulated to aid in stimulating lipolysis, protecting muscle tissue, enhancing endurance, and boosting metabolism, Thinnr Boost provides a holistic approach to sustainable weight management. Additionally, it alleviates irritability, reduces gastritis, and supports gastrointestinal health, ensuring a comprehensive solution for achieving long-term wellness goals.

CORTISOL AND STRESS MANAGEMENT

Thinnr OTC incorporates ACTH, Adrenalinum, and Pituitarum to regulate cortisol levels, effectively reducing stress-related weight gain and irritability. By addressing cortisol imbalances, Thinnr helps mitigate a common barrier to weight management and promotes emotional well-being.

DETOXIFICATION

Adeps suillus and Chelidonium support liver and gallbladder detoxification, while Pituitarum enhances kidney function for comprehensive toxin elimination. This detoxification process ensures the body effectively processes and removes harmful substances, aiding weight loss and overall health.

FAT LOSS AND METABOLISM

Adrenalinum, Thyroidinum, and ACTH work synergistically to stimulate fat breakdown and boost metabolic rate. These ingredients enhance the body’s ability to burn fat efficiently, supporting sustainable weight loss.

GI AND HORMONAL SUPPORT

Calcarea carbonica, Chelidonium, and Pituitarum improve gut health and regulate hormones, alleviating symptoms like gastritis and promoting balanced digestion. This dual action fosters a healthy gastrointestinal system and supports metabolic harmony.
