

HYDROX™ | NEXT GENERATION TECHNICAL RACING SUIT

OPEN BACK KNEESKIN: 1.10.034
CLOSED BACK KNEESKIN: 1.10.044
JAMMER: 1.10.144

Constructed with our proprietary MemoryFlex™ fabric, the HydroX™ is designed to enhance the natural expansion and contraction of the muscles.

SWIMWEAR / TECHNICAL

BACKED BY SCIENCE

We worked with world-renowned scientist Redha Taiar whose concentration in biomechanics and anatomy enabled us to develop the HydroX™.

MEMORYFLEX™ FABRIC

The multidirectional weave of our proprietary fabric was designed to enhance the natural motion of the muscles. MemoryFlex™ fabric is woven in 3 dimensions allowing the muscles to function normally and the suit to retain its original form.

SMART MATERIAL

Enhances flexibility and compression throughout the stroke cycle and returns to its original shape.

CORE STABILITY

Allows for great flexibility and free range of motion while maintaining core stability and balance through the hips.

MADE FOR THE WATER

MemoryFlex™ fabric is a proprietary material that's interaction with water is hydrophobic, decreasing resistance caused by swimming. This allows water molecules to remain unhooked as they come in contact with the fabric.

STRATEGIC FABRIC PLACEMENT

On the female suit, from the lower back up, the threads of our fabric are placed in an upward direction, allowing for greater contention and less resistance. Similarly, the fabric has been placed in the downward position on both the male and female suits below the hips.

PRODUCT DESCRIPTION

Amplify your confidence in the HydroX™ - our latest innovation in competition swimwear. We perfected the most essential details of the race suit, starting with the fabric and the way it interacts with muscle. The threads of our proprietary MemoryFlex™ fabric are positioned to optimize the natural expansion and contraction of the muscle, providing consistent compression for the highest performance. MemoryFlex™ is a smart material that will return to its original shape throughout the stroke cycle, enhancing flexibility and compression. Simply the best, FINIS HydroX™.

Designed in partnership with associates in Italy, France, the United States and Asia
