OWN YOUR OWN TRUCKING COMPANY! THE TRUCKING INDUSTRY IS A \$900 BILLION DOLLAR INDUSTRY IN AMERICA!

TRUCKING WILL NEVER SHUT DOWN! YOUR TRUCKING COMPANY CAN POTENTIALLY EARN OVER \$3,200.00 PER WEEK NET INCOME PROFIT! WORK FOR YOURSELF IN A SAFE AND STABLE INDUSTRY. USA TRUCKING CONSULTANTS LLC WILL HELP YOU START YOUR OWN TRUCKING COMPANY AND SUPPLY YOU WITH UNLIMITED CUSTOMERS!

Learn how to make good money in the trucking industry and become part of this 900 billion-dollar industry. USA Trucking Consultants LLC helps start new trucking companies. USA Trucking Consultants LLC focuses on helping create new successful trucking companies throughout the United States. USA Trucking Consultants have helped open successful trucking companies and have 20 years experience in the Trucking Industry. USA Trucking Consultants is the only company in America to help clients open up trucking companies in all aspects of trucking from start to finish, not just a part of the items needed to open a trucking company, Everything from A-Z.

Using the knowledge and relationships we have created over the last 20 years, USA Trucking will direct your path on how to be successful in the trucking industry. USA Trucking Consultants will help start your own trucking company and most importantly guide you for success in the trucking industry and not making the mistakes that many people make when they try to open a trucking company without having any knowledge, experience or relationships in the trucking industry and fail within the first 9 months.

The trucking industry has changed so much since we started in this industry 20 years ago years ago and we know how to adapt and grow to these changes because we have been in the trucking business for all those years. USA Trucking Consultants knows what works and what does not work in the trucking industry with our experience and knowledge in the trucking industry. Let USA Trucking Consultants show you what most trucking companies and trucking magnets do not want you to know as there is a lot of money to be made in this industry if done the correct way.

USA Trucking Consultants will consult your company on how to be successful in the trucking industry, and we can help your company grow from 2 tractor trailers to many tractor trailers and help expand your trucking company into a fleet. We will be your mentors and help you grow and succeed in the Billion dollar trucking industry. The Trucking Industry is one of the largest industries in America. USA Trucking Consultants will help you get set up to be a successful trucking company and start earning positive revenues.

A new trucking company can potentially earn a Gross income of over \$700,000.00 per year and approximately a Net income of over \$165,000.00 per year operating 2 tractor trailers, with an average startup cost of \$275,000.00 (That's with tractor trailers being paid for up front, No Financing which means your trucking company owns assets out right of over \$220,000.00 when you start with no loan payments.

USA Trucking Consultants has many direct relationships with shippers, brokers, vendors, drivers, etc. which we have created over the years, and we do not have a shortage of loads to run, in matter of fact we have so many loads to choose from that we pick the most profitable freight and lanes to run. The demand for freight being delivered on 53 foot flatbeds is in high demand. There is so much freight to be moved across the USA that is outweighs the supply of trucks that are moving the freight on a daily basis.

The trucking industry has changed so much in the last 10 years that we had to change the procedures for new trucking companies to be successful in the trucking industry, and we have adapted to the changes, but there is still so much money to be made in this \$900 billion dollar industry as long as you follow the correct procedures.

The owners of USA Trucking Consultants LLC have operated many trucking companies and have been driving semi trucks for over 30 years, so we know all aspects of operating a trucking company. USA Trucking Consultants does everything from A-Z to open and operate a successful trucking company for you, and will guide you in the correct way for a successful outcome in the trucking industry. USA Trucking Consultants will make sure your company will be FMCSA and DOT Compliant and hire the most qualified professional drivers delivering your freight. USA Trucking Consultants will run your trucking company in the most professional and efficient way and complete all of your day to day operations needed to be successful. USA Trucking Consultants will always be here for you with any questions you have. Now let's look at a few facts about the trucking industry.

HERE ARE A FEW FACTS ABOUT THE TRUCKING INDUSTRY.

America has always been about being the biggest and the best; being on top of the hill was, and still is, almost always revered. Right or wrong, being number one - if only in size- has always been important to us. The tallest building, the fastest car, or the biggest pizza pies are all deemed significant. The trucking industry has not one to toot its own horn (pun intended), but it's become one of the largest and most critical industries in the U.S.A. It touches everyone's daily life. Everyone in the USA should know just how big it is. The scope of the trucking industry in the U.S. is hard to fathom. Trucking moves nearly 75% of all freight tonnage in this country, but when you look closer at the overall impact of the trucking in the U.S.A. - The numbers are staggering!

A FEW U.S. TRUCKING INDUSTRY STATISTICS:

900 Billion dollars in annual revenue
200 Billion dollars of all freight moved annually
490,000 tractor trailers are sold each year
56.9 Billion gallons of fuel are consumed yearly
25.4 Billion dollars in road usage and taxes are paid every year
816.3 Million miles are driven annually by class A tractor trailers

19.5 million Tractor-trailers are registered in the U.S. 9 million trucking employees, including almost 5 million class A truck drivers

WHAT DO THESE NUMBERS MEAN?

Trucking is larger than most U.S. industries in the U.S.A. (keep in mind, trucking is a \$900 BILLION dollar industry)

Other industries:

Food – \$800 Billion Dollars!
Pharmaceutics - \$550 Billion Dollars!
Motor Vehicles - \$500 Billion Dollars!
Beverages - \$160 Billion Dollars!

The annual miles driven by the trucking industry in this country are enough to go to the moon and back - OVER 100 TIMES! The 56.9 billion gallons of fuel consumed yearly by the trucking industry represents nearly 17% of the total fuel consumed in the U.S. How big is the trucking industry? If the trucking industry was a nation and the \$900 billion in annual revenue was their GDP (Gross Domestic Product). It would rank 31st - That's huge!

The trucking industry builds our cities and homes, feeds America, supplies our oil and motor vehicles and makes sure we have clothes on our back plus so much more. Is the size of an industry important? Yes extremely, an industry this large-especially one so closely tied to all industries in America. The trucking industry touches everyone in America! If we did not have trucking in America, America would shut down! The next time you pass a tractor-trailer on the highway; remember they are delivering goods for all of America. Trucking continues to be the dominant mode of transportation in the United States. In 2024, trucks moved 14.9 billion tons of freight, which is equivalent to 74.8% of all domestic shipments. The trucking industry has an optimistic future ahead: a combination of lower inflation, a growing housing market, a huge growth in the stock market and lower fuel prices has helped the industry expand 16.3% from 2023 and only continues to look more positive.

In March 2024 the industry growth reached 6.95 % from the previous year. The trucking industry is the life blood of the U.S. economy. 75% of all freight tonnage goes on trucks. Without the trucking industry and our truck drivers, the economy would come to a standstill. To move 14.9 billion tons of freight annually requires nearly 19 million Class A tractor-trailers and almost 6 million class A truck drivers. It also takes over 56 billion gallons of diesel fuel to deliver all the freight. Simply-without trucks, America stops! Trucking companies have added over 30,000 new jobs in the last 10 months, That's the 18 straight months of growth and the industry is expected to continue adding jobs over the next several years.

According to current labor analyst the trucking industry expects to have a shortage of 30,000 freight movers in the U.S. by 2028. The shortage could reach 60,000 by 2029. No large industry can afford to have their product sit. There is an average of 750,000 loads that need to be moved from point A to point B somewhere in America on a daily basis and there are just not enough trucks to move the freight. The bottom line is the trucking industry is getting bigger each day with more products needed to be shipped on a daily basis and a shortage of trucking companies to move the freight. Many analysts predict freight rates to jump by 15% in the next year. As you have read the trucking industry is very huge and getting bigger and a very profitable industry to get into if you knows how to start and manage a new trucking company. USA Trucking Consultants can help you be successful in the trucking industry as we have many years experience and can be a very lucrative opportunity if completed the correct way. Below is an overview and list of our services.

Market Opportunity:

\$900+ billion U.S. trucking industry

Constant freight demand (recession-resistant)

Fragmented market with room for consolidation

Growing need for reliable regional and long-haul trucking companies

Operational Strategy:

To ensure smooth operations and reduce risk, the company will implement Full DOT, UCR, IRP, and IFTA compliance management, Professional fleet and driver onboarding, Strategic lane selection and fuel cost control, Telematics and fleet management software and all day to day operations needed.

USA Trucking Consultants LLC presents a turnkey trucking business opportunity in America's \$900 billion transportation industry. With operations since 2015 and leveraging 20+ years of industry expertise, this comprehensive program guides entrepreneurs through every aspect of launching and operating a successful trucking company.

Complete Business Solution:

This opportunity provides end-to-end support for new trucking ventures, handling all critical components from initial setup through ongoing operations. The program addresses the primary challenge facing new trucking companies - the lack of industry knowledge and relationships that often leads to failure within the first nine months.

USA Trucking Consultants provides a Three-Tier Support System:

- 1. Business Setup: Complete FMCSA and DOT compliance assistance, regulatory guidance, and operational framework establishment**
 - 2. Load Dispatch Services: Full-service freight booking through established industry relationships and broker networks**
 - 3. Administrative Operations: Daily paperwork processing, payment facilitation, and back-office support.**
-

Market Opportunity:

The trucking industry dominates freight transportation, moving 14.9 billion tons annually (74.8% of all domestic shipments). Recent industry growth of 16.3% from 2023 reflects strong market conditions driven by economic expansion, housing market growth, and favorable fuel pricing.

Earning Potential:

Average trucking company can potentially earn over \$3,000 weekly, with two-truck operations generating gross revenues exceeding \$700,000 annually and potential net income over \$160,000 per year. The business model scales from individual operations to fleet expansion.

Ongoing Support:

Clients receive continuous mentorship, operational guidance, driver recruitment assistance, and fleet expansion planning. The company maintains established relationships with shippers, brokers, and industry partners to ensure consistent freight availability.

This opportunity suits entrepreneurs seeking entry into the transportation sector with comprehensive professional support and proven industry expertise. All backend logistics and regulatory requirements will be professionally handled, allowing owners to remain hands-off if they desire, USA Trucking Consultants will run all day to day operations if needed.

USA Trucking Consultants LLC will operate and run all day to day operations. After your trucking company has been started, USA Trucking Consultants will book all of your freight to drivers and obtain and sign all documentation for shippers and brokers to haul freight with your company, processing your payments so all paperwork is completed for payment to your company, communicating with drivers, finding drivers when needed, and will never charge you any more fees to help your company grow to add more trucks. You will always be able to contact someone from USA Trucking Consultants for any consultation or questions you might have. USA Trucking Consultants will complete all the necessary steps as your consultants.

The process takes about 6-8 weeks to complete everything needed to open a new trucking company. USA Trucking Consultants would recommend starting a new trucking company with 2 trucks as this is good number to start off in the trucking industry. After 6 months of your trucking company hauling freight, then you can start expanding your trucking company with more trucks. USA Trucking Consultants can help you be successful in the trucking industry and help you do all correct steps needed to start a new trucking company and getting your trucking company licensed with the FMCSA, DOT, securing professional truck drivers, supply you with all the freight to run all of your day to day operations, Plus much more. USA Trucking Consultants has three functions in its company. The first function is to get your business set up to start hauling freight (MC&DOT# Drivers, etc) The second function is to book all of your freight through our dispatching service as we employ many dispatchers who are highly trained, qualified and will always book the most profitable but efficient loads running the best lanes possible.

Our dispatchers will always be in contact with you as the owner and always be in contact with your driver to make sure everything is running smoothly or take care of any problems that might arise. The third function is to complete all and any of your paperwork such as, contracts with customers, collecting all of your rate conformations and BOL's (Bill of Ladings) so you can get paid on a daily basis. Processing and submitting all of your paperwork to get paid, keeping track of drivers logs and receipts, Completing all of drivers miles and figuring out payroll, making sure all drivers DOT files are kept in order and kept up to date along with making sure all drivers are updated on random list for all drug and alcohol mandates with FMCSA, removing or adding drivers from insurance as needed and making sure your company is compliant with all FMCSA (Federal Motor Carrier Safety Association) and DOT (Department of Transportation) regulations plus much more.

There are alot of requirements and documentation needed from FMCSA and DOT to start up a new trucking company, but USA Trucking Consultants with do all of the work to start your trucking company so you do not have to make the mistakes that many new trucking company owners make when they try to start a new trucking company without knowing anything about the trucking industry. USA Trucking Consultants LLC and partners have been in the trucking industry for almost 20 years and we know how to set up successful trucking companies. USA Trucking Consultants knows what works and what does not work in the trucking industry. We know how to start a trucking company without making costly mistakes!

The trucking industry has changed greatly in the last 10 years, and USA Trucking Consultants have adapted with those changes and we will adapt to any new changes that will come up with FMCSA and DOT regulations

to operate a legal trucking company in the USA. Years ago any new trucking company with a brand new authority (DOT # & MC #) can get loads from any shippers or brokers. As of 2021 most shippers and brokers require trucking companies who deliver their freight have a minimum of 10-12 months on their common authority. There are a few shippers or brokers who will go with your new company but it's only about 20%

Since these changes have been made and we have adapted to these changes, USA Trucking Consultants have determined that it is much better to have all new trucking companies with new authorities lease on to our partner company for the first 10 months. After the 10 months your company will be able to haul freight from shippers and brokers on your own authority with access to 100% of all freight that needs to be delivered and not worry about getting denied for freight, which means your company will make much more money. 8 of 10 shippers or brokers will not go with new trucking companies if their authority is not more than 10 months old and that means that any new trucking companies cannot obtain the best paying loads for at least 10 months. If your trucking company does not have access to the all the best paying freight then your company will not make as much. Again we have solved this problem by having your trucking company lease onto our (partner) trucking company for the first 10 months. Then after 10 months of your trucking company having its authority, Your Company does not have to lease onto our company as your company will be eligible to book all loads from shippers and brokers and not only 10% - 20% of the loads available, you will have access to 100% available.

The company that you will lease onto charges 10%, but your company will make much more earnings and profit by leasing to the partner company for just 10 months because your company will have access to 100% of all loads we currently have access to, compared to only 20%. After 10 months, we will start booking your loads under your own authority and you will not pay 10% and receive the full 100% from all the freight your company hauls minus the dispatch fee. Again we feel this is the best way to start earning profits as soon as you start the trucking company. How much can you earn? USA Trucking Consultants has access to thousands of loads of freight that need to be moved on a daily basis throughout the nation. USA Trucking Consultants have relationships with many shippers and brokers and has access to many loads, meaning your new trucking company will have access to the thousands of loads we have access to. Once your company is set up and your truck is ready to start hauling freight we will find the most profitable loads for you which includes the best lanes to haul freight which is very important.

Once USA Trucking Consultants books your loads and make sure all contracts are signed with the shippers or brokers, we will receive what's known as a rate confirmation. This is just a document verifying the price they are going to pay your trucking company to haul their freight from point A to point B, there will also be important details in that rate confirmation such as what the commodity is that your hauling, the pickup and drop address, if the load has to be tarped, chained or any other special instructions regarding the load.

Once that load is delivered at the receiver, the receiver will then sign off on the BOL (Bill of Lading) which we will receive from the shipper, then the driver will scan the BOL inside their truck and send it to our dispatcher so we can process the BOL, Rate confirmations and all other documentation will be completed so your company can get paid the next day as these funds go directly into your bank account which only you will have access to.

10 years ago you can start a new trucking company with financing and very little down. But the trucking industry has changed so much that we no longer recommend starting a new trucking company unless you have all the funds upfront to pay for 2 tractors and 2 trailers without any financing. This is the only way a new trucking company can succeed in the trucking industry at this time. Without having any truck or trailer payments a new trucking company can start making a positive cash flow within the first 6 months of operation. USA Trucking Consultants also recommends having a minimum of \$20,000.00 on standby for any extra cost you might incur within the first 6 months. These 2 expenses are the most costly with opening a new trucking company but your trucking company can earn profits immediately. Your trucking company will

own these trucks and trailers as tangible assets which means that you will have close to \$220,000.00 of paid equipment or assets your company owns. Below is the start up cost and potential earning cost.

Once your Federal common authority is active (MC#, DOT# BOC) which takes about 6 weeks to complete, USA Trucking Consultants can start booking loads for your company. The time frame of 6 - 8 weeks to start your trucking company has nothing to do with us or our performance as this is how long it takes for the FMCSA (Federal Motor Carrier Safety Association) to go to every state in the lower 48 and advise them that your opening a trucking company and you must be assigned a BOC -3 agent, along with other documentation needed for your IRP, IFTA etc. In the meantime while we are waiting for your authority to go active we will start completing all the other steps that need to be completed.

Once USA Trucking Consultants starts the process and you have received your DOT# and MC# we will secure your trucks and trailers from the many dealerships we have access to. USA Trucking Consultants will make sure we find you're trucking company a good truck with low miles and a warranty. A Semi truck is made to last a million miles or more but the trucks we will secure for your trucking company will be 2 or 3 years old with under 350,000 miles which will last years, as long as you take care of the truck with doing PM's (Preventive Maintenance which we will take care of) One of the most important items in trucking is a good reliable truck because if you truck keeps breaking down then obviously you cannot pick up and deliver freight and if your truck is always down you cannot earn a profit (If Your Wheels Are Not Turning, You're Not Earning) USA Trucking Consultants will research many trucks and trailers to locate the best truck and trailers for your company. The cost for a good truck will range around the average price of \$70,000.00 - \$75,000.00; the cost for a trailer is approximately \$30,000.00.

USA Trucking Consultants will secure all of your IRP documentation (International Registration Plan) UCR (United Carrier Registration) and IFTA (International Fuel Tax Agreement) HUT (Heavy Use Tax) Being a first time trucking company owner, obtaining the correct paperwork and having all the proper information for IRP, Insurance, VIN Verification plus many more documents needed is very important when going to register your vehicles in your states CMV (Commercial Motor Vehicle department) it consist of many forms and documents which we will prepare for you as it can be very confusing for first time business owners.

Once your trucks and trailers are registered with your authority and insurance is active and we have completed all the other necessary steps to start you're trucking company, USA Trucking Consultants can start booking freight for your trucking company. USA Trucking Consultants has access to databases of hundreds of shippers and brokers that we work with and our dispatchers will book your freight with the most profitable freight that needs to be delivered on a daily basis. Every day there are hundreds of thousands of loads that need to be moved across the USA. USA Trucking Consultants will only run the most profitable loads available but they must be the most efficient loads available as there is a lot to booking the correct loads and the best lanes to run freight, as some lanes are much better paying than other lanes to run, we know what lanes to run and what lanes to stay out of because there are a lot of bad lanes. Our dispatchers are highly trained to only run the best lanes as possible.

Navigation/ELD/Tracking units are wired into your truck and this system will always allow you to monitor your truck via the internet and will always give you the exact location of where your truck is currently located. This system also records how many miles your truck has driven in each state which will be needed by your accountant so they can calculate your IFTA (International Fuel Tax Agreement) gas tax due every quarter. As of December 2018, The FMCSA implemented new HOS (Hour of Service) guidelines for all trucking companies and drivers cannot use paper logs to show their hours of driving or HOS, everything must be ELD Compliant (Electronic Log Device) This device takes care of the driver's logs for you and can be reviewed online. All Class A truck drivers by law can only drive 11 hours a day and only work a total of 14 hours a day (Working but not driving) Once a truck driver has driven 70 hours in a 7 or 8 day period they must take a 34

hour break before they can start driving again. This device will monitor the hours for your trucking company so when the driver gets pulled into a weigh station (Which they will) the driver can just show the logs and HOS through their ELD system online.

USA Trucking Consultants will also help you obtain gas cards for your trucks that can be used at all the major truck stops (Pilot, Flying J, TA, Loves, Hess) The gas cards will also keep track of all statements online so you know how much gas your trucking company has used in all the states your trucks drove through in the last, 30, 60, 90 days which you will need to pay your IFTA taxes quarterly. The gas cards are much better than paying cash for gas as you will get an approximate rebate on each gallon of diesel fuel that is purchased and receive a rebate of about 10 - 20 cents per gallon as with cash, but you will always be able to monitor and track online how much gas expenses your trucks are going through. Your drivers will never have access to any funds for gas, they must always use the gas cards and these cards can only be used for diesel fuel at these truck stops only. If needed you can also give out cash advances and buy supplies such as oil, or antifreeze, etc. on these cards. These cards can be set up online from your computer and you can turn off the gas cards any time you desire from your computer.

As you can see there is allot to opening a successful trucking company and you might be a little overwhelmed, don't worry, USA Trucking Consultants LLC will handle everything for you and guide on how to open a new trucking company and be successful! USA Trucking Consultants does everything from A-Z, so your trucking company will not make the mistakes that many make when they first open a trucking business. USA Trucking Consultants are your consultants for success for as long as you need us.

Now let's talk Profits!

KEYS TO SUCCESS:

As for any business there are keys to success that must be followed to be successful. The number one key in the trucking business is to always keep your trucks moving and hauling freight, as we say in the trucking business "If the Wheels are not Turning, you're not Earning" We will make sure your wheels are turning. The most crucial items to be successful and profitable in the trucking industry are to get good trucks and good drivers. When it comes to finding good paying loads and obtaining the freight, this will not be any problem. Your trucking company will be a nationwide carrier and we have access to thousands of loads that need to be picked up from all parts of the USA on a daily basis, but we mostly run in the Southeast, Midwest and North East, United States. We pick and choose what loads are the most profitable. The drivers we hire always must have experience with no accidents or any major violations and clean background; we have no problems finding the drivers.

APPROXIMATE PROFITS:

USA Trucking Consultants focuses on running flatbed loads (53 foot flatbed trailers) as flatbed loads pay the most per mile compared to Dry van and Refer (Refrigerated). Flatbed loads consist of lumber, steel, pipe, construction material, machinery, coils and any type of building or construction items. Flatbed loads average \$2.40 - \$3.10 a mile. We will not book any loads under \$2.30 a mile for a roundtrip run, most drivers can legally run about 570 -650 miles per day with deadhead miles (non-loaded miles). We try not to run more than 120 miles deadhead miles. When we hire drivers for your company we hire them under the terms of drivers working Monday through Friday, with driving 2 weekends per month and drivers come home for 2 weekends per month. When a driver works weekends they will earn your company an average of \$1,600 - \$1,800 more per week and we always try to find drivers who want to stay out over the weekends all the time but we realize that drivers need home time and to get good drivers and to keep good drivers we need to make sure they are happy. The most important part of running a successful trucking company is Good Trucks and Good Drivers!!

USA Trucking Consultants put's a large emphasis on dispatching the most profitable freight for our clients, meaning the most profitable and efficient loads available but most importantly the best lanes to run in the best parts of the country. Allot of people get caught up in running the best paying loads available which is a big mistake because there is no good paying freight coming out of the destination location. There is a science to booking the correct freight! The owners of USA Trucking Consultants have had their Class A CDL Drivers license for over 30 years and have drove semi truck flatbeds for over 1 million miles. USA Trucking Consultants has knowledge in all aspects of opening a new trucking company but most importantly securing the most profitable freight in the best lanes. USA Trucking Consultants mainly focuses on freight in the South East, Mid West and North East. It all starts with that very first load you book on Monday that will determine the profits for the rest of the week.

PROCEDURES:

Once you're ready to move forward and sign contracts, the process will start and takes about 6-8 week to get everything completed but now you will be ready to start making money with your new Trucking Company. Once your company is ready to start hauling freight USA Trucking Consultants will run all of your day to day operations and book all of your loads for a cost of 6% per truck per week, which is really cheap for all the work we do as we will be your consulting partners for as long as you need us and any advice you need.

The Consultants fee for USA Trucking Consultants LLC is \$15,000.00, with \$10,000.00 down and \$5,000.00 due after 30 days of us working with you to start your new trucking company. Once the first down payment of \$10,000.00 has been paid, USA Trucking Consultants will start immediately working on starting your trucking company. After you have paid the final balance of \$5,000.00 there will not be any more consultants' fees.

PROFIT/EXPENSE:

Approximate Net Profit for New Trucking Company starting with 2 trucks

Starting a new trucking company with 2 trucks is the most cost efficient and stable way to run your trucking business when you first get started in the trucking industry and as time goes on you can always add more trucks. Once your trucking company is operating and starts hauling freight with 2 tractor trailers, your trucking company should average approximately 6300 miles per week with 2 drivers, one driver per truck (After Dead Head Miles) 1 driver will stay out over the weekend and 1 driver will come home on the weekend.

6300 miles @ \$2.40 per mile (Low End) = \$15,120.00 Per Week. These figures are just approximate as every week your earnings will be different because you will be running different freight and different lanes every week and all rates are different per load. These numbers are on averages as weekly flatbed rates and fuel surcharge change weekly.

APPROXIMATE GROSS PROFITS FOR 2 TRACTOR TRIALERS WEEKLY = \$15,120.00

*Approximate Drivers pay – 28% - \$4,233.00

* Approximate fuel cost - \$3.60 per gallon (After rebate) – 8.5MPG = \$2,657.00

*Approximate lease fee @10% - \$1,512.00 (10 months only)

Approximate Weekly trucks and trailers insurance payment - \$900.00 (Paid monthly)

*Approximate dispatch fee @5%- \$907.00

* Approximate Weekly trucks maintenance fees - \$550.00

* Approximate weekly factoring fee at 2.9% = \$449.00

* Approximately weekly toll expenses - \$200.00

* Approximate Weekly IFTA, HUT tax, software - \$50.00

* Approximate Weekly Misc. fee - \$400.00

- Approximate Weekly Average Gross Earnings = \$15,120.00
- Approximate Weekly Average Expenses = \$11,908.00

Approximate Weekly Average Net Earnings for Profit = \$3,262.00

(After 10 months your trucking company will not pay lease fee which is a \$1,512.00 savings per week)

**cost for insurance is different in all states and can be paid in full upfront if you choose*

The Net Profit above is approximate weekly average and could be more and could be less. USA Trucking Consultants will not make any representations or guarantees on how much any trucking company can make. The figures above are from averages per week and do not constitute a guaranteed amount. Every week earnings will be different. This summary is just informational.

APPROXIMATE START UP COST: - (PURCHASING TWO TRUCKS AND TRAILERS)

\$145,000.00 – Approximate cost of 2 tractors, high rise sleepers with warranty and owning them outright

\$60,000.00 – Approximate cost of 2 - 53 foot spread Axle flatbed trailers, owning them outright

\$20,000.00 – Approximate cost for operating funds (As needed only)

\$15,000.00 – USA Trucking Consultants Fee (\$10,000 due upon signing contract balance owed after 30 days)
