

Built to a standard size, our roof mounted systems include:

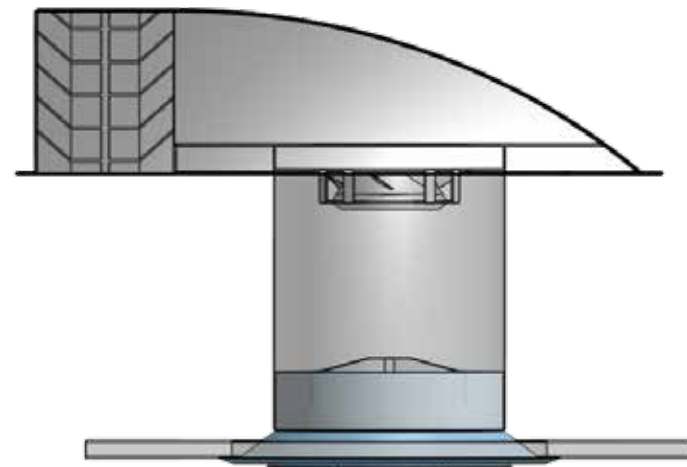

- Custom designed rear facing intake hood with a built in two stage Air Intake Grille
- A compact 10 inch 24v fan and duct with a built in air diffuser
- The fan is wired to a potentiometer so as to regulate the air volume and noise.
- Ceiling panel with a stylish cover and air directional input.

These systems are designed to introduce fresh air to a wheelhouse or cabin where Air Conditioning might not be possible or advisable.

STANDARD INCLUSIONS:

- Fan Housing from Fibre Reinforced Plastic.
- Synthetic Impeller - Corrosion Proof.
- Sealed maritized motor 316 stainless steel fasteners
- IP44 Rated
- Ceiling diffuser
- Flexible ducting pre mounted to fan
- Powder coated to required colour
- Install kit complete with everything to fit up to your vessel

Pricing: \$3420.00 + gst

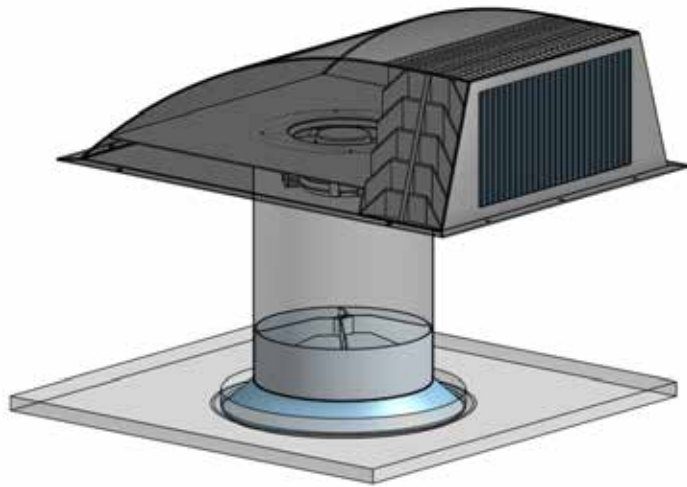

NB: All export projects are quoted in USD
