MENU2U plus

Combine a proven menu planning tool with cutting edge technology to enhance your senior living facilities food service operation and improve resident satisfaction.

More than a menu planner, **Menu2UPlus** is a savings program. It is an effective solution for reducing dietary costs and simplifying menu preparation without sacrificing quality.

With Menu2UPlus, you no longer need to spend time writing menus. Search a recipe database and customize menus based on a resident's likes and dislikes with capabilities to evaluate nutritional details for adhering to diet requirements. With both select and non-select pre-planned menus, your foodservice team is able to choose a regional menu and make modifications, which greatly simplifies a time-consuming process.

With access to daily menus and pricing, your team will know if an item increased in price, allowing them to make an alternate, lower-priced selection. Loaded with over 17,000 recipes, Menu2UPlus includes regional favorites from across the country, such as BBQ Beef, Enchiladas, Gumbo, Fresh Salads, Skillet Fried Potatoes, Salmon, Philly Cheese Steaks, Fish Tacos, plus thousands more!

No matter your need, our menu services accommodate independent, assisted living, post-acute, rehabilitation and personal care requirements.

“

Menu2UPlus has been an essential tool for Paramount Healthcare Dietary operations. We have been able to improve resident meal quality and save money in the process. We also integrate popular menus that decrease plate waste and increase resident satisfaction, while incorporating the IDDSI framework. Without the support of HPSI's Menu Services team we could not achieve the level of success we have experienced. I highly recommend their service.

GUY DESMOND MS, RDN, LD
Corporate Dietitian
Paramount Health Care

FEATURES

- Select Menus offer a system to customize multiple menu selections to enhance residents' choices and it works with multiple delivery options including table, tablet or print
- *Always Available* options are included with the select menus
- Cost management through Menu2UPlus is available with a locked formulary option for further cost reduction
- Menu costing capabilities to meet budgetary requirements
- Real-time food cost monitoring based on recipe and menu costing
- Nutritional details for all planned diets
- Scaled recipes can be printed on-demand for a specific census to reduce over and under production
- Automatic food order calculations
- Multiple reports designed to reveal optimum savings and identify areas for improvement
- Tray card integration with menu costing, inventory/order grocery lists, electronic medical record programs, and connects with several eProcurement platforms for efficient and accurate ordering
- Tray cards are customizable for allergies and dislikes

The Menu2UPlus Program meets the needs of a community providing Dining Services. The menu office is helpful with the process, willing to be flexible to meet the needs of individual communities and offers training for the staff in the communities. As a Consultant Dietitian, I have confidence that Menu2UPlus will support communities to provide the tools needed for compliance and consistent dining services provided to residents."

HPSI MENU SERVICES

HPSI dives deep into menu services for members who want to customize their menus and make them branded as their own. Our internal menu services team has been partnering with communities for over 25+ years creating compliant menus and training staff on best processes. A hallmark of HPSI's menu service is our customer service and swift response time to members' needs.

We offer ethnic menus that are available with therapeutic diets. The menus include the new International Dysphagia Diet Standardization Initiative (IDDSI) for swallowing disorders. HPSI is proud to be one of the first menu providers in the country to offer these diet consistencies as part of its menu offerings.

Therapeutic diets are available in the system as needed for all levels of Senior Living.

Menu2UPlus is your "one-stop shop" for menu services and cost control in Nutrition Services. Never before has there been a menu provider that provides tray cards, menu and production tools, a paperless menu selection feature AND a process for creating your food order!
