1 1/2" STANDING SEAM SNAP LOCK CLIP

SENTRY METALS LLC
ROOFING AND BUILDING CONTRACTORS

FEATURES

- Able to withstand the worst mother nature has to offer.
- Great for attaching solar roof accessories. Engineered clamps grip the ribs of the panel to provide attachment points eliminating or limiting the need to drill into the roof deck.
- Snap Lock panels make installation quicker than mechanically seamed panels.
- Perfect for low sloped roofs.
- Hidden fasteners! Fasteners never need to be replaced and aren't visible to provide a clean modern look.

PANELS MADE ON SITE

Our panels are made on site with our portable panel machine.
We make all of our own standard and custom roof trims locally at our shop.

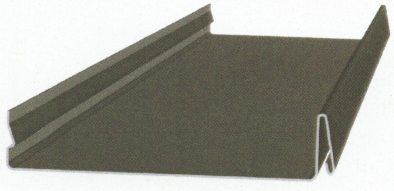

DESCRIPTION

Our **1.5 inch Standing Seam snap lock clip** panel is a hidden fastener system. It uses a concealed metal clip that holds the panel in place but also allows for thermal panel movement.

This design makes this system very durable and provides **superior wind uplift resistance.**

AVAILABLE IN

- 24 gauge steel and .032 Aluminum *(coastal applications)*
- A wide selection of colors and finishes
