1" STANDING SEAM
SNAP LOCK NAIL STRIP

SENTRY METALS LLC
ROOFING AND BUILDING CONTRACTORS

FEATURES

- Snap lock and nail strip design make installation quicker than traditional clip style panel systems.
- Budget friendly! Panels are fastened directly to the roof deck without the need for clips which saves the homeowner money on labor and material prices.
- Good for attaching solar roof accessories. Engineered clamps grip the ribs of the panel to provide attachment points eliminating or limiting the need to drill into the roof deck.
- Hidden fasteners! Fasteners never need to be replaced and aren't visible to provide a clean modern look.

PANELS MADE ON SITE

Our panels are made on site with our portable panel machine.
We make all of our own standard and custom roof trims locally at our shop.

DESCRIPTION

Our 1inch Standing Seam snap lock nail strip panel is a hidden fastener system that features an integrated "nail strip" built into one side of the panel and a snap lock design on the other side.

This design reduces labor and eliminates the need for clips which makes it our most economical Standing Seam panel. Extremely durable and great for any aesthetic.

AVAILABLE IN

- 24 gauge steel and .032 Aluminum *(coastal applications)*
- A wide selection of colors and finishes
