WELCOME

With a successful 2025 season under their belt, AR Nineteen Motorsport returns to the grid stronger than ever in 2026, competing in both the Monochrome GT4 Series, part of the GT4 Australia Championship sanctioned by SRO Motorsports Group, and the APC Enduro Championship within the Hi-Tec Oils Super Series.

The 2026 Monochrome GT4 campaign will feature six rounds across Australia, beginning with a Media Day at Phillip Island before racing through Shell V-Power Motorsport Park, Queensland Raceway, Hidden Valley Raceway, Sydney Motorsport Park and concluding at the iconic Sandown Raceway.

Alongside this, AR Nineteen will contest the five-round APC Enduro Championship within the Hi-Tec Oils Super Series, featuring three-hour endurance events at Queensland Raceway, Sydney Motorsport Park, Winton Raceway and the season finale at Calder Raceway.

Now one of the biggest contenders in the GT4 and endurance paddocks, AR Nineteen Motorsport combines elite performance, precision engineering and a relentless drive for success. This proposal outlines the exclusive opportunities and exposure available to sponsors partnering with Johnny, Jamie and Mark across a dynamic, high-profile national racing season.

After making a powerful debut in 2025, AR Nineteen Motorsport has cemented its place as a rising force in Australian GT and racing. Formed through the merger of Johnny Nikolovski and Jamie Arratoun's Aranik Racing and Mark Griffith's Nineteen Motorsport, the team united decades of experience, technical expertise and an unrelenting passion for competition.

Aranik Racing, led by Johnny and Jamie, built its reputation in Australian GT racing between 2015 and 2019, campaigning factory-built 458 Ferraris against some of the nation's most accomplished drivers. Their commitment to precision, performance and professionalism became the foundation for the team's continued success.

Adding to that pedigree, Mark Griffith brings extensive experience from multiple Australian GT campaigns and national endurance championships. Having led Nineteen Motorsport to numerous strong finishes, Mark's deep understanding of high-performance machinery, race strategy and long-format competition continues to drive the team forward.

Now, heading into the 2026 Monochrome GT4 Series and APC Enduro Championship, AR Nineteen Motorsport stands as a cohesive, established team, blending experience, innovation and a shared determination to dominate on the track once again.

OUR DRIVERS

Business partners Johnny Nikolovski and Jamie Arratoon bring more than 30 years of experience across property development and business ventures but their shared passion has always been motorsport. After returning to the GT racing scene in 2025, the duo successfully launched AR Nineteen Motorsport's Mercedes-AMG GT4 campaign, demonstrating precision, consistency and strong competitive form throughout the season.

Joining them is long-time mate and fellow racer Mark Griffith, a veteran of over 70 Australian GT races. As the driving force behind Nineteen Motorsport, Mark has built a respected reputation in endurance racing, with success across the Australian GT Championship, GT Trophy Series and the Australian Endurance Championship. His depth of experience, technical insight and strategic mindset continue to be a cornerstone of AR Nineteen's performance both on and off the track.

DRIVE DAYS

AR Nineteen Motorsport invites you and a select group of guests, friends and staff to an unforgettable, high-performance driving experience at our Premier Super Car Drive Day Event, located at the iconic QLD Raceway track.

Live out the ultimate supercar fantasy as you take on hot laps around the race track, experiencing the thrill of pure speed and precision handling. Seated in the Mercedes-AMG GT4, you'll be fully immersed in the specialised world of racecraft, feeling the power of 400kW, the G-forces of late braking, high-speed cornering and the grip of slick race tyres. From being strapped into a professional race harness to communicating with the driver through a team radio, this is a true purpose-built race car experience. These exclusive events offer an intimate passenger experience, with one-on-one interaction and conversation with the drivers.

As part of the Drive Day experience, AR Nineteen Motorsport will host a VIP trackside corporate area, where you and your guests can enjoy premium food, drinks and exclusive access to Johnny, Jamie and Mark in a relaxed and engaging setting.

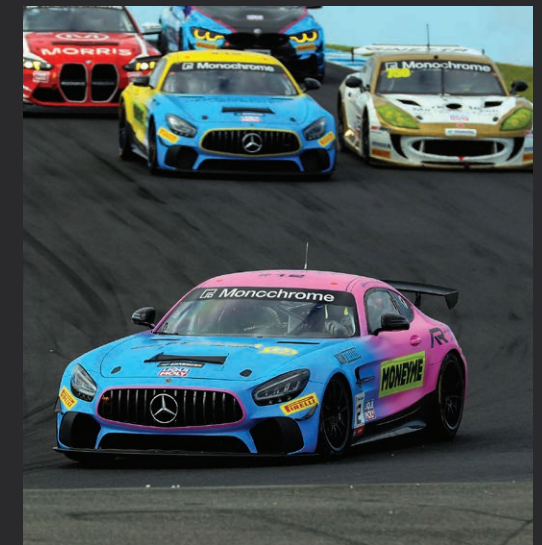

RACE EVENTS

The Monochrome GT4 Australia Series returns for 2026 faster, bigger and louder than ever, alongside AR Nineteen Motorsport's campaign in the Hi-Tec Oils Super Series APC Enduro Championship.

The GT4 calendar features six adrenaline-charged rounds across Australia, from Phillip Island Grand Prix Circuit to Shell V-Power Motorsport Park, Queensland Raceway, Hidden Valley Raceway, Sydney Motorsport Park and Sandown Raceway.

The APC Enduro Championship within the Hi-Tec Oils Super Series will see the team contest five national rounds, delivering high-profile three-hour endurance battles at Queensland Raceway, Sydney Motorsport Park, Winton Raceway and Calder Raceway throughout the 2026 season.

Both championships deliver extensive national and global broadcast coverage and Livestreaming on Youtube. Monochrome GT4 rounds are broadcast live on Channel 7 and 7plus. The Hi-Tec Oils Super Series airs nationally across AVE, Fox Sports, SBS, Kayo.

THE CAR

The Mercedes-AMG GT4

The Mercedes-AMG GT4 is based on the Mercedes-AMG GT R Coupé production sports car (combined fuel consumption: 13.1 l/100 km | combined CO₂ emissions: 299 g/km). It stands out for its advanced safety features and weight-optimised design. The lightweight and extremely rigid aluminium space frame ensures exceptional performance and durability on the race track.

Torque

630 Nm

Acceleration

0-100 km/h in 3.6 seconds

Output

400 kW (544 hp)

Since its debut in 2018, the Mercedes-AMG GT4 has been a key part of Mercedes-AMG's customer racing portfolio, serving as the ideal entry point into the world of GT racing.

EXTERIOR

Champion appearance

Unmistakably AMG, typically GT. The Mercedes-AMG GT4 features a flat front section with a slanted grille and a natural fibre-reinforced front bumper. The wide splitter, lateral flics and Gurney flap on the bonnet work together to generate optimal downforce on the front axle, enhancing stability and aerodynamics.

Dominant wing

The muscular rear proportions of the Mercedes-AMG GT4 are complemented by an adjustable rear wing, designed for an optimal balance between low drag and high downforce. The GT3-based rear track rod enhances durability, particularly for endurance racing conditions.

LED light package

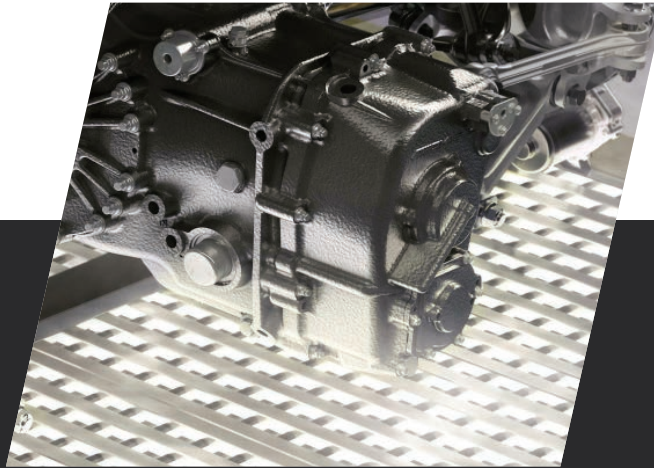

Incorporating the design language of the current AMG GT road cars, the Mercedes-AMG GT4 features high-performance LED headlights, significantly improving track illumination. This provides a crucial advantage in low visibility and nighttime racing, ensuring both safety and performance.

PERFORMANCE

Engine & Electronics

The Mercedes-AMG GT4 is powered by an AMG 4.0-litre V8 biturbo engine (3,982 cm³), delivering 400 kW and 630 Nm of torque. Designed for long service intervals and strong performance reserves, the engine benefits from an optimised cooling system to maintain reliability under racing conditions. At its core, a competition ECU ensures precise engine management, while innovative torque control enhances driveability and precision on the track.

Racing Gearbox

The Mercedes-AMG GT4 features a sequential 6-speed racing gearbox, configured in a transaxle layout on the rear axle for improved weight distribution. Pneumatically operated, the gearbox provides rapid gear shifts, while a mechanically adjustable self-locking differential allows fine-tuning for different racing conditions, optimising handling and traction.

Suspension & Braking

The double wishbone suspension with adjustable dampers (compression and rebound) ensures precise steering feedback, outstanding agility and excellent traction. The racing braking system features self-ventilating composite brake discs, an enlarged brake air intake and dimensionally stable brake air lines to maximise cooling efficiency. Additionally, an optimised front brake disc enhances stopping power and durability under extreme racing conditions.

2025 MAJOR SPONSORS

MONEYME

MoneyMe is one of Australia's leading digital finance platforms, offering fast, flexible and tech-driven lending solutions. Known for innovation and simplicity, MoneyMe empowers Australians with personal loans, credit products and car financing designed for modern lifestyles. Their commitment to speed, performance and precision mirrors the values of motorsport, making them a natural partner both on and off the track.

This proposal is intended as a discussion document, outlining key concepts and opportunities for a mutually beneficial marketing partnership and customer engagement program. It is not a formal agreement, but an invitation to explore how we can collaborate to create real value.

If you're interested in learning more about our sponsorship packages or would like to discuss a tailored partnership, we'd love to connect. Let's work together to build a relationship that drives success, both on and off the track.
