Value Proposition

There are a lot of hot tub manufacturers in the world today, but there aren't very many that have over 55 years of hot tub manufacturing experience. With 55 years of experience comes a lot of long-term relationships with industry-leading suppliers for our spas. Our spas are built to run efficiently and withstand harsh cold climate conditions while giving you comfort and hydrotherapy wellness. We're a Midwest company that's here to provide reliable, hand-built luxurious hot tubs at affordable prices for families to enjoy for several years.

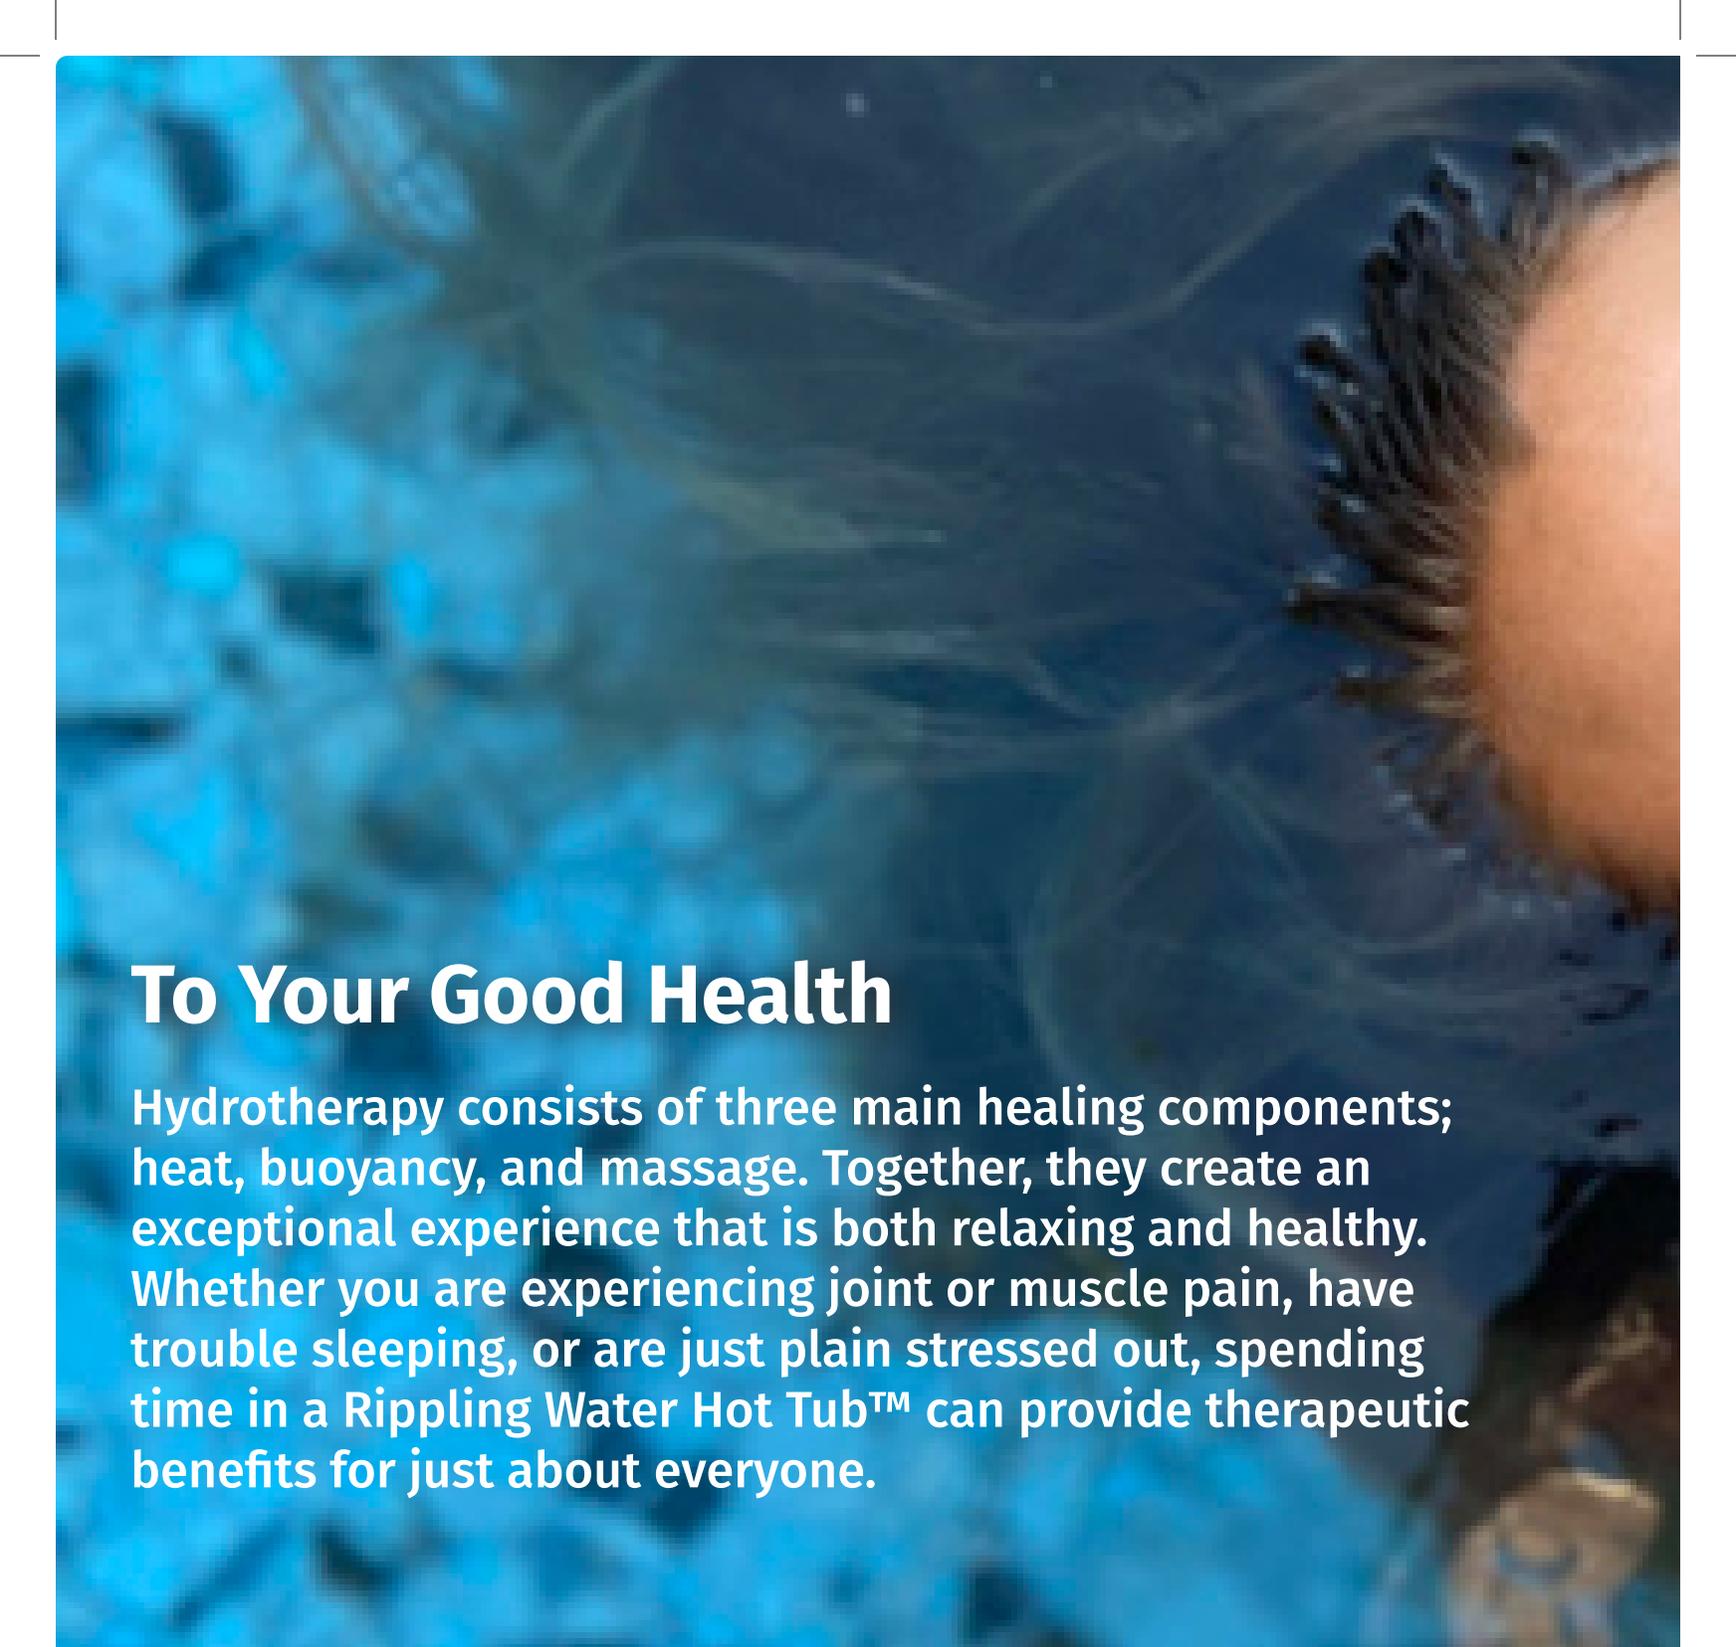

About Us

Rippling Water Hot Tubs™ evolved from the Midwest where water plays a big part in the lives of families. Given our shorter summers, the families in the Midwest enjoy the water, whether it's boating, water skiing, surfing, swimming in a pool, or soaking in a hot tub and enjoying the hydrotherapeutic massage it offers.

Hand-built and designed for hydrotherapy, comfort, wellness, and reliability at affordable prices. Our mid-western work ethic and decades of experience can provide you with the best-built spas around. Even though our spas are sold around the world, they will always be built right here in the Midwest.

To Your Good Health

Hydrotherapy consists of three main healing components; heat, buoyancy, and massage. Together, they create an exceptional experience that is both relaxing and healthy. Whether you are experiencing joint or muscle pain, have trouble sleeping, or are just plain stressed out, spending time in a Rippling Water Hot Tub™ can provide therapeutic benefits for just about everyone.

Year Round Fun

Hot tubs are designed to maintain the temperature you set them at and as a result your hot tub is always ready and waiting for you. While lowering the temperature on a Rippling Water Hot Tub™ helps beat summer heat, there are few moments in life that come close to the sheer pleasure of being surrounded by warm bubbling water on a crisp, cold night.

Reduce Stress, Headaches & More

A warm water massage stimulates the body to release endorphins that can significantly reduce stress, Rippling Water Hot Tubs™ hydrotherapy jets can dilate blood vessels to help prevent headaches. In addition, when it comes to falling asleep faster and getting a good night's sleep, the National Sleep Foundation clearly states that *“soaking in a hot tub before retiring to bed can ease the transition into a deeper sleep.”*

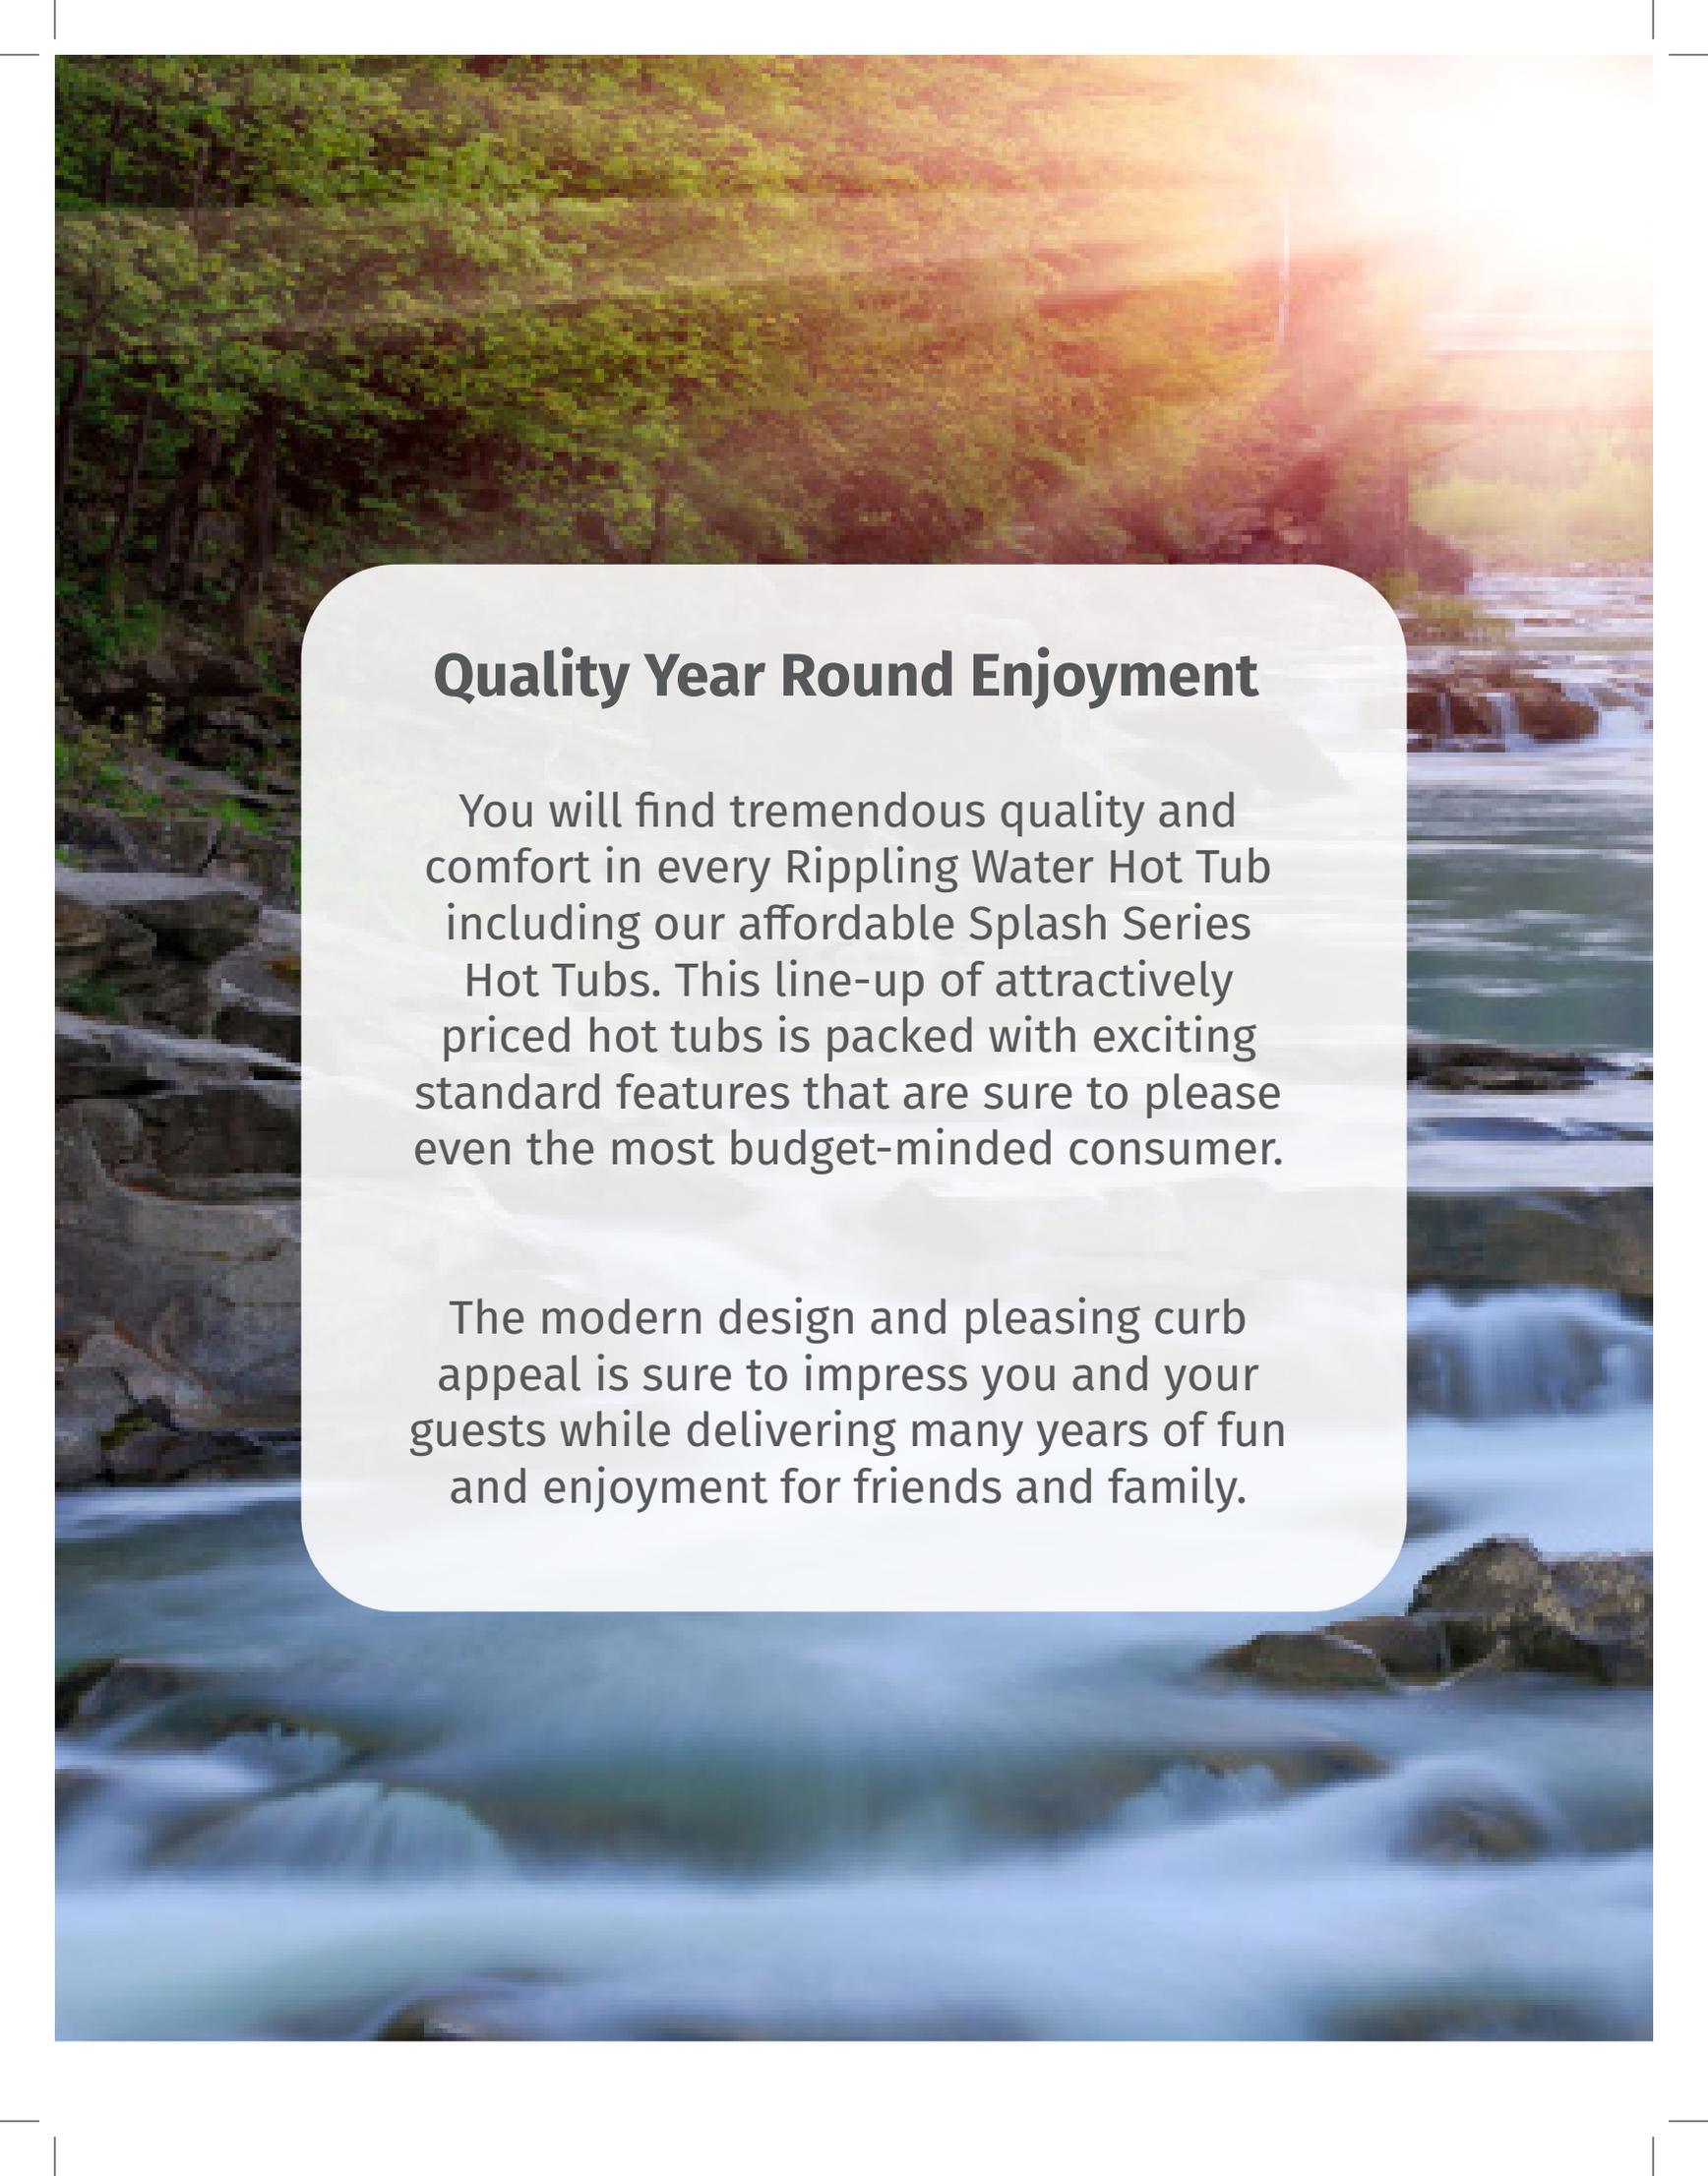

Relieve Muscle & Joint Pain

The use of hydrotherapy hot tubs by athletes has skyrocketed and Rippling Water Hot Tubs™ are now set to lead the way in offering these benefits to a broader audience. A popular sports magazine said it best: ***“Your skin and muscles loosen and relax from the increased blood circulation.”*** adding that, if muscles are injured: ***“A soak in a hot tub increases blood flow to the injured area, bringing nutrients to help repair the damage.”***

More Time With Family & Friends

A recent survey of swimming pool owners revealed that many only enjoy their pools a few dozen times a year and jetted bathtubs are also used infrequently! In contrast, a Rippling Water Hot Tub™ is easy to use and is designed to consistently maintain the water temperature set by the user. As a result, it's always ready and waiting to be used for fun and relaxation. 24 hours a day, 7 days a week, 365 days a year!

Quality Year Round Enjoyment

You will find tremendous quality and comfort in every Rippling Water Hot Tub including our affordable Splash Series Hot Tubs. This line-up of attractively priced hot tubs is packed with exciting standard features that are sure to please even the most budget-minded consumer.

The modern design and pleasing curb appeal is sure to impress you and your guests while delivering many years of fun and enjoyment for friends and family.

FEATURES & OPTIONS

Soft Touch™ Controls

State-of-the-art digital electronic control with LCD temperature and filtration readout. All functions are located at your fingertips.

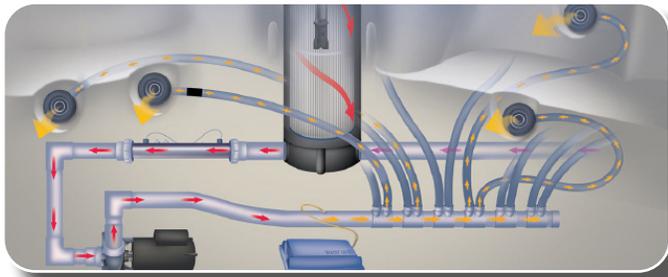

Sunset Lights Package

At the touch of a button, you can make your water dance with intense magenta, orange, green, blue, and violet - or just allow the system to gradually move from one beautiful color to another. Transform the mood as you enjoy dramatic dances of changing colors - a spectacular light show whether in or out of the water!

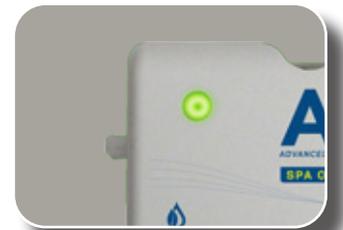

Filtration

Rippling Water Hot Tubs™ top-load filter systems allow for easy access to the filter cartridge for cleaning & replacement. Bulky filter canisters can take up precious hot tub space and also force the hot tub owner to drag a dirty filter sideways back through the spa, allowing filtered contaminants to reenter the water. A top-load filter allows for verticle removal of the cartridge filters element and also takes up less space.

Ozonator

All Rippling Water Hot Tubs can be equipped with the Del Ozone Natural Spa Sanitizing System. This system utilizes the latest ozone technology and injects ozone consisting of three oxygen atoms, directly into the spas plumbing system to kill bacteria in all water lines. The ozone saniization is completely biodegradable and 100% natual with the only byproduct being oxygen.

Energy Saver System™

Heat is generated by the spa's power equipment inside the cabinet. This heated air is captured and returned to the spa's water. This continually helps maintain the water temperature without running the heater as often. The heat recovery system save you money by reducing electrical cost.

Polar Insulation™

All Rippling Water Hot Tubs™ come with our double layer Polar Insulation System™. A thick layer of polystyrene foam and a heat reflective thermal-blanket on the wall and floor retain heat within the cabinet.

SYNTHETIC WEATHER GUARD™ CABINET

- THICK LAYER OF POLYSTYRENE FOAM BETWEEN THE FRAME AND CABINET
- HEAT REFLECTIVE THERMAL-BLANKET FOR MAXIMUM CABINET HEAT RETENTION

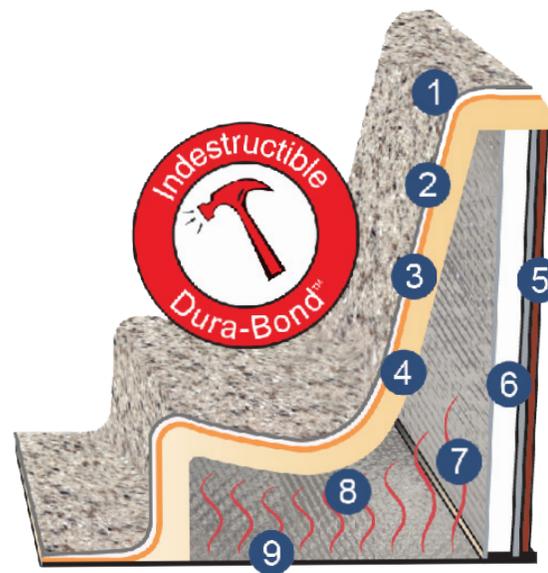

Durabond™

This four layer, patented strengthening process combines the beauty of Lucite Plus Acrylic™ with a layer of ABS for shell strength and integrity. Then a double strengthening material is applied. This high density material has all the strengthening properties of fiberglass without the environmental concerns.

SHELL STRENGTHENING SYSTEM

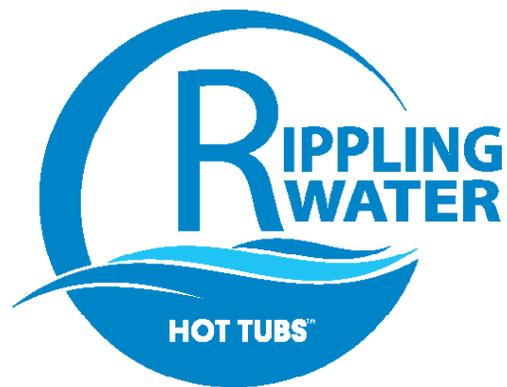

1. Acrylic Plus™
2. ABS
3. Dura-Bond™ with Foam Insulation
4. Polyethylene Foam
5. Classic Wood Frame
6. Polystyrene Insulation
7. Radiant Foil Insulation
8. Thermal Air Barrier
9. Moisture-Resistant Polyethylene Flooring

Maintenance-Free Weather Guard™ Cabinet

Our synthetic cabinets with reversible panels are known for their rich, beautiful appearance and long lasting durability. Fully removable access panels make service a breeze.
