Hello,

I'm a Web Designer with Project Management experience in the marketing space. With a solid foundation in front-end technologies, SEO, and client-focused web design, I'm confident in my ability to deliver visually compelling, high-performing websites that support your clients' business goals.

In my current role as a Senior Web Designer at Townsquare Interactive, I lead the design and development of high-quality websites for small to medium-sized businesses, ensuring alignment with both brand identity and industry standards. My daily work involves HTML5, CSS3, Photoshop, and SEO optimization — all core components of the role you're seeking to fill. I'm also adept at collaborating with cross-functional teams, providing technical support, and guiding clients through design decisions to ensure user-focused results.

My experience also includes QA testing and digital marketing campaign management, which have further sharpened my analytical thinking and attention to detail. I take pride in my ability to manage time effectively, learn independently, and maintain clear and responsive communication with both clients and team members — qualities that are clearly valued at IntuitSolutions.

The opportunity to join a well-established, collaborative agency like yours — and grow with a team committed to quality, creativity, and client success — is very exciting to me. I would welcome the chance to contribute to your innovative projects and deliver the highest quality of service to your clients.

Thank you for considering my application. I look forward to the opportunity to speak with you further.

Sincerely,  
Samantha Rockefeller
