Busy Arusha is an essential part of safari life here in northern Tanzania and most travelers pass through at some stage. Whether you're on your way out on safari or here for a little longer, you'll catch a glimpse of streets filled with energy and color.

If you've never been to Tarangire (and even if you have) you're in for a real treat. Tarangire is filled with giants – baobab trees all across the park, as well as elephants, lots of them. But that's just the beginning. Of the big cats, you'll probably see lions, and cheetahs and leopards are around, too. And it's impossible to miss the wildebeest, giraffes, hippos, buffaloes and zebras. Your backdrop for all of this is one of the prettiest in northern Tanzania, with a memorable mix of river woodland, open plains and rolling hills. And some vantage points to take it all in.

It can get busy, but it's a vast area where you can easily find some solitude.

Visiting the Unesco World Heritage-listed Serengeti is one of the best things you can do on safari. This is a park filled with some of the biggest populations of wildlife in Africa. Here in the Serengeti, there is a very good chance that you will see lions, leopards, cheetahs, elephants, spotted hyenas, buffaloes, zebras, giraffes, wildebeest and so many other species. The endless horizons of the savannah grasslands are the perfect backdrop for seeing so many animals. And there's no better safari image than the sun setting deep red behind a silhouetted acacia tree deep in the Serengeti.

Ngorongoro Crater

Your day in and around Ngorongoro Crater could just be one of the most memorable of your whole safari. You'll explore the crater rim and then drive down onto the crater floor, where the critically endangered black rhinos are the stars of an astonishing wildlife show. You'll almost certainly see large-tusked elephants, at least one of the Ngorongoro's four lion prides, and wandering clans of spotted hyenas. It also just happens to be one of Africa's most beautiful corners, a hidden world where you'll be surrounded by steep, deep-green crater walls, a salt lake, forests and hippo-filled waterways.
