

This portion of Shay Way is already built

These 4 lots were not included because there is already a road built accessing these lots (Lots 38, 39 & 40 are owned by the same owner).

This portion of Shay Way shown in purple to the intersection of Haywagon Trail is what is being proposed to be assessed. Approximate length of this section of road is 1,620'.

Within this red dashed boundary line would be the 136 lots that would be included in the assessment for the portion of Shay Way to be built to Common Road Standard, 24' wide, 5 1/2" of gravel
