Custom Bollard Products: Overview

CMPI offers stainless steel bollard covers (or sleeves) in a variety of sleek designs that make a great fit for any property that needs enhanced security. Stainless resists rust and corrosion and retains a "like-new" appearance for years. Whether for security purposes, a decorative effect, or both, our bollard products are a stylish choice and can be constructed to any specifications or shapes that you require.

Fixed-In-Place

- Permanently install in secured areas
- Cover existing bollards that need a face lift
- Corrosion resistant & low maintenance
- Customizable cap and finish styles

Removable

- Easily installed or removed
- Grant or restrict vehicle access
- Custom designed for each client
- Many bollard, cap, and baseplate styles

LED Lighted

- Perfect for illuminating outdoor areas
- Accentuate & protect pedestrian walkways
- Can cover existing bollards or stand alone
- Use our design options or fully customize

Utility Access

- Front access locking door bollard
- Conceal electrical wiring or switches
- Secure but easily accessible for staff
- Constructed to fit customer requirements
