## CLOVER™ CARTRIDGE

### Clover™ Cartridge

Featuring DeLaval's patented three-leaf clover shape, the Clover Cartridge system allows for a quick and easy change of all four liners in under one minute. The triangular profile provides a consistent, firm grip on each teat with uniform pressure, effectively reducing teat inflammation and maintaining low mouthpiece vacuum levels. The Clover Cartridge system consists of the liner cartridge, the reusable plastic shell, and the flexible milk tube that fits almost any modern milking claw. The Clover Cartridge fits average to large sized teats best. The short milk tube is available with a stiff "R" reinforcement or a soft "SR" reinforcement which helps to limit vacuum leakage during attachment.

**Clover Cartridge, Set/4 .....\$45.00**

5,000 milkings (\$0.90 per 100 milkings)

**Short Milk Tube, Set/4.....\$15.00**

5,000 milkings (\$0.30 per 100 milkings)

**Plastic Shell .....\$ 8.36**

Free shells with 12-month DeLaval liner commitment

**DeLaval**

*Sale price limited to two set/4 per claw*

### Clover+™ Liners

The same patented clover shape featured in the Clover Cartridge system, but in a standard one-piece extended-life rubber liner that fits DeLaval 06 Stainless Steel shells and DeLaval's new SH6 Plastic/Stainless hybrid shells. Liners are recommended for 2,500 milkings.

**Clover+ 12 mm SR, Set/4 Sale Price.....\$32.00**

**\$1.28** per 100 milkings

**Clover+ 12 mm SR, Set/4 Sale Price - Level 2 .....\$28.80**

**\$1.15** per 100 milkings

Free shells with 12-month DeLaval liner commitment

**DeLaval**

*Sale price limited to two set/4 per claw*

### HC-01 Liners

DeLaval's extended-life rubber formula in a price-fighting round liner that fits DeLaval 06 Stainless Steel shells and DeLaval's new SH6 Plastic/Stainless hybrid shells. Liners are recommended for 2,500 milkings.

**HC-01 12 mm SR, Set/4 Sale Price .....\$26.00**

**\$1.04** per 100 milkings

**HC-01 12 mm SR, Set/4 Sale Price - Level 2 .....\$23.40**

**\$0.94** per 100 milkings

Free shells with 12-month DeLaval liner commitment

**DeLaval**

**New!**

## SH6 SHELL

### SH6 Shell

DeLaval's newest shell for the US market strikes the perfect balance between lightweight and heavy duty. The wide stainless steel band provides extra durability but also adds just enough weight to help liners fold over during attachment.

It keeps the same basic dimensions as the industry standard DeLaval 06 Stainless Steel Shell, allowing for its use with a huge variety of liners on today's market without affecting the milking performance of the liner (besides the reduced weight).

**Each .....\$18.00**

Free shells with 12-month DeLaval liner commitment

# MC30 CLAW

## MC30 Claw with Valve

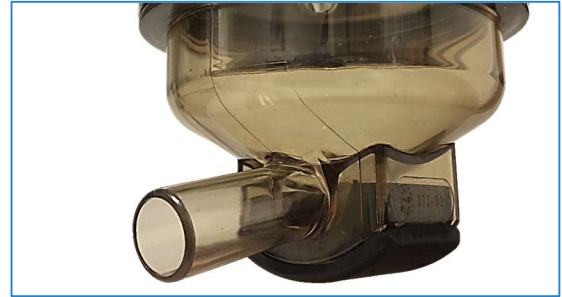

Modern dairy cows are producing far more than in years past, and they require a claw with a much higher flow capacity than previous generations. The MC30 achieves both a high flow rate and a significantly lighter weight than older claws, but it doesn't compromise on durability either. Low maintenance cost and easy disassembly also help to make this claw a smart upgrade.

Claw ..... ~~\$263~~ **\$150.00**  
*1-3 week lead time*

## MC30HD Claw without Valve

Many of the same benefits of the MC30, the HD version has a larger bowl for better visibility, milk capacity, and vacuum stability, as well as a much larger rubber bumper, making it well-suited to parlors. It is not offered with a shutoff valve option, unlike the standard MC30 claw, but it shares its lighter weight, higher flow rate, low maintenance costs and easy disassembly.

Claw ..... ~~\$270~~ **\$150.00**  
*1-3 week lead time*

# TEAT DIP CONCENTRATE

## Paradigm™ Concentrate

Paradigm marks another key step in the industry shift toward lower percentages of higher-efficacy iodine. Paradigm gets done with just a quarter percent of iodine what most 1% iodine dips on the market can't match. It also features ACT emollient technology, allowing it to excel at conditioning teat skin. Additional emollient can be added up to 10%.

Prices as low as: **\$4.77 per Finished Gallon\***  
*1-3 week lead time*

**Low Cost • No Maintenance • Worry-Free**

## IodoZyme® Concentrate

Known for its lightning-fast kill speed of mastitis-causing pathogens, IodoZyme is a superior pre-dip for a speedy prep routine. In addition to its' abilities as a pre-dip, IodoZyme can also be mixed at a higher rate for a powerful post dip, providing a 6% emollient package and DeLaval's Optimized Iodine Technology.

Prices as low as: **\$3.57 per Finished Gallon\***  
*(Pre-Dip)*  
Prices as low as: **\$7.13 per Finished Gallon\***  
*(Post-Dip)*
