

Hulse, Playfair & McGarry

Funeral, Cremation and Celebration of Life Services
Services de Funérailles, de Crémation et de Célébration de la Vie

Our Family Serving Yours Since 1925

We believe that our greatest strength and most valuable asset is our team of dedicated licensed funeral directors and support staff. Many of our staff are actively involved in local communities and professional associations. We are here to offer our services to alleviate the stress of our client families at a very difficult time of life.

Product Selection Guide

Casket Selection Guide

We have a wide range of Caskets to provide great value at any budget.

Casket value is based on the type of wood and the quality of the material and workmanship.

A casket, or some type of container, is required in all situations.

Burial Vaults are, in most cases, optional.

Cremation urns are selected by many families as a mean of permanent memorialization.

All caskets are manufactured by Victoriaville & Co.

Steel Casket Selection

Metal caskets can be made from base steel of various gauge thicknesses, stainless steel or precious metals. In fact, copper and bronze are renowned for their timeless beauty and elegance. Most metal caskets are referred to as "corrosion resistant", "protective" or "sealed" caskets. They are assembled with a thick rubber strip along the entire length of the lid, thus creating a sealed enclosure preventing outside elements from penetrating the casket.

When it comes to metal caskets, you can pick and choose a unique look by combining features such as colours, finishes and customization options.

Outer Burial Containers / Concrete Vaults

Why choose an Outer Burial Container?

In most areas of the country, provincial or local law does not require that you purchase a container to surround the casket in the grave. However, many cemeteries as part of their by-laws may require you to have such a container. Either a grave liner or burial vault will satisfy these requirements.

Operating a modern cemetery requires heavy equipment such as backhoes and tractors. A strong durable vault provides greater protection from the weight of the equipment as well as the elements of the earth.
