

Puberty Pausing Medication Ban

By Andrea Brookes March 2025

This is a story we expected to read concerning the consequences of banning Puberty Pausing medications (otherwise known as Puberty Blockers) from transgender kids. The article, although pretty much just relating the story from the GP, cannot help but through in some "balance" by referencing the Cass Report. However, it does not in any way mention that this report has been condemned by virtually every specialist scientific, medical, research and governmental organisation across the world as well as most recently in a Federal court of the USA where it was discredited when the government tried to use it in defence of one of their transmissiac* pieces of legislation.

*transmisia is the correct term as it means hatred of, transphobia means fear of.
