

Clinical Facilitation: Essential Skills and Principles

Creating
The
Future

Whether in a hospital, clinic, or academic setting - empower yourself to provide high-quality clinical facilitation!

Designed for healthcare professionals at all levels, our “Clinical Facilitation: Essential Skills and Principles” online course equips you with the tools necessary to excel in facilitating nursing and midwifery students in clinical settings.

DURATION

10 hours of self-paced eLearning. Interactive modules, case studies, reflective exercises, and self-assessment enhance learning.

ASSESSMENT

Engage with videos, case studies, and self-assessment activities. Complete quizzes in each module for successful course completion.

LEARNING OUTCOMES

- Understand regulatory requirements and stakeholders' roles in clinical facilitation.
- Identify facilitator responsibilities and their impact on student experiences.
- Utilise adult learning principles and teaching methods effectively.
- Develop skills for facilitating students during Professional Experience Placement (PEP).
- Assess student learning and provide tailored feedback.
- Embrace reflective practice and critical thinking for professional development.
- Promote wellbeing for both students and facilitators.

COURSE UNITS:
