The Hotel Canaletto Distinction

First in the world: Hotel Canaletto is the **first hospitality facility worldwide** to join the national **"HOTEL ARMONY SYSTEM"** project.

The technology: The hotel has adopted the **EHG sanitization system** by the Italian company **Pureairion**, extending it across the property's areas.

System Numbers and Installation Structure

A total of **53 EHG devices** are currently active, distributed as follows:

- **43 devices** dedicated to **guest rooms**.
- **10 units** for **corridors** and **transit areas**.
- **Specific systems** for the **hall, corridors, reception** and **breakfast room**.

24/7 control: Device **management** and **monitoring** are **continuous and constant** throughout the day.

Benefits and Objectives of the System

Deep sanitization: The system continuously eliminates **mould, bacteria, viruses, VOCs** and all types of contamination, including **formaldehyde** and **fine particulate matter**.

Invisible comfort: The technology is **silent, discreet** and does not affect the **aesthetics of the spaces** or the **daily experience of guests**: no **invasive noise** and no **perceptible odour**.

Adaptability: The devices are **differentiated** and **selected** according to the **size** and **function** of each specific area: **guest rooms** and **common areas**.

Special Attention to More Sensitive Guests

More protected environments: Indoor air quality is a particularly important element for guests who are **immunocompromised, asthmatic**, or affected by **allergies** and **respiratory sensitivities**.

Reduction of airborne contaminants: The system helps maintain more controlled environments by reducing the presence of **mould, bacteria, viruses, VOCs, formaldehyde, fine particulate matter** and other contaminants that may affect the **perception of comfort** and the **quality of the stay**.

Well-being during the stay: The goal is to offer a more attentive hospitality experience, with continuously sanitized spaces designed also for those who require greater attention to **air healthiness**.

Quality and Certification

Philosophy: This choice focuses on **health protection** and the **biological quality of the air**, understood as a fundamental part of guests' **well-being** and **stay experience**.

Official guarantee: The **effectiveness** and **safety** of the system are guaranteed by the **IAQ-ASE legal certification** and by the official certification of the international body **BUREAU VERITAS**, under the supervision of **ATTA — Association of Environmental Toxicology Technicians**.

Informational note: The system does not replace medical treatments, prescriptions or personal healthcare advice, but contributes to maintaining more controlled indoor environments in terms of air quality.

INSPECTION CERTIFICATE

BV Job Nr: 25.SF.13106538.139

Chrono: M63035/26/MN/mn

BV Client: SEF SOLUTIONS SAGL

Supplier: PURE AIR ION

Manufacturer: PURE AIR ION

Inspection requested by: SEF SOLUTIONS SAGL

PURE AIR ION® EHG® Sanitation Technology

Scope of inspection:

➤ Particulars:

The scope of the inspection was to witness the sampling performed by a testing laboratory to be analyzed to verify the sanitation in locations where PURE AIR ION EHG devices are installed, according to the Method Statement No **Certificato IAQ-ASE Disciplinare Tecnico rev.01**.

The activity was performed by **Bureau Veritas** according to the **Procedure M63030/21/MN/mn Rev.1**

The test was conducted and the results were certified by

IZSV Istituto zooprofilattico Sperimentale delle Venezie – Sede di Vicenza

Laboratorio accreditato UNI CEI EN ISO 17025:2018 (ACCREDIA 0155L/8)

The sampling was performed by the above mentioned laboratory, in presence of Third Party Agency Inspector on 09/04/2026 at

HOTEL CANALETTO

Calle de la Malvasia - Castello 5487 - 30122 - VENEZIA – Italia

➤ Conclusion

Considering the samples have been identified in presence of the TPA Inspector and the identification has been verified at the analysis stage, the undersigned, Inspector to Bureau Veritas, certifies the Testing Laboratory conducted the analysis on the coupons sampled in the above mentioned circumstances and the results are reported on the below document.

- IZSV report no. 26BAT-A/1217

➤ Annexes to this certificate:

- Continuous Active Sanitization Report no. SEF_PA126417
- IAQ-ASE Certificate n° IT_26417_01

The undersigned, inspector to Bureau Veritas, based on the review of the annexed documents, certifies that the present document has been issued referring to the above mentioned activity performed in presence of the TPA and certified by a competent testing laboratory, according to the Client Method Statement.
