

# Unleash the power of truth in decoding with the Bench Tree Sapphire™ system.

**Are you looking for a decoding solution that helps ensure precision and accuracy while offering genuine insights?**

**Look no further than Bench Tree's Sapphire system, combining cutting-edge technology with built-in AI intelligence to provide surveys up to**  
**75% faster than competitors.**

**Together, we can re-shape the MWD decoding landscape.**

Bench Tree's Sapphire system is designed to deliver the highest level of data integrity, going beyond conventional systems by incorporating powerful AI algorithms. This continuously improves decoding as the job progresses and helps the drilling team optimally place the wellbore. When combined with Bench Tree's 3D-I directional module, you can unlock the power of our Adaptive Survey solution, completing surveys up to 75% faster than the competition.

With these capabilities, the Sapphire system unleashes lightning-fast decoding, untangling complex signals with unrivaled accuracy. Its intuitive interface and user-friendly design make decoding a breeze, empowering you to focus on the job at hand.

Bench Tree can act as your trusted companion, revolutionizing the way you decode information. Sapphire unlocks hidden patterns, identifies trends, and provides actionable insights, helping you make informed decisions faster.

Join the growing list of companies who already rely on Sapphire to navigate the complexities of mud pulse decoding in difficult wells and save valuable time and resources.

**Contact your local Bench Tree representative today and experience the convergence of truth, integrity, and reliability with AI-powered decoding from Sapphire.**
