DIRECTOR'S STATEMENT

JEANMARIE PAPELIAN

Executive Director

Dear ATP Supporters,

I am thrilled to share with you the remarkable achievements and milestones captured in this year's Annual Report as we celebrate the 30th anniversary of Armenia Tree Project.

Over the past three decades, ATP has evolved from a small grassroots initiative into Armenia's foremost environmental organization, driven by our unwavering commitment to sustainable forestry, community empowerment, and environmental education.

Our expertise in sustainable forestry has played a pivotal role in ensuring high survival rates and long-term sustainability for the forests we've planted. Beyond the environmental impact, these forests have become a source of economic opportunities for hundreds of rural villagers, creating a positive cycle of growth and empowerment within local communities.

In the face of adversity, ATP has stood strong in providing support to communities in need. During the blockade in Artsakh, we worked tirelessly to ensure food security for villagers. Furthermore, when our fellow Armenians arrived in Armenia as refugees last fall, we swiftly pivoted to assist them with basic necessities, showcasing our commitment to being a reliable pillar of support in times of crisis.

Our dedication to environmental education remains unwavering. We have successfully educated thousands of students and adults about the vital need to protect Armenia's unique genetic heritage in indigenous ecosystems. By fostering awareness and understanding, we are sowing the seeds for a future where environmental conservation is ingrained in the fabric of society.

As we mark our 30th anniversary, we take pride in the journey we've undertaken. As we begin celebrations throughout the year, it will be a testament to the collective effort and commitment of our supporters, staff, and volunteers. It is heartening to witness the positive impact we've made together.

None of our achievements would have been possible without the generous support of our donors. Your commitment to ATP's mission has been instrumental in driving our growth and impact. As we look ahead, we are excited about the possibilities and opportunities that the future holds, and we invite you to continue standing by our side in this transformative journey.

Thank you for being an integral part of ATP's success story. Together, we will continue to plant the seeds of a sustainable and vibrant future for Armenia. I hope you'll join us at one of our celebratory events, and if you visit Armenia, please include a visit to ATP in your itinerary.

If you have any questions about ATP's work, please contact me at jeanmarie@armeniatree.org.

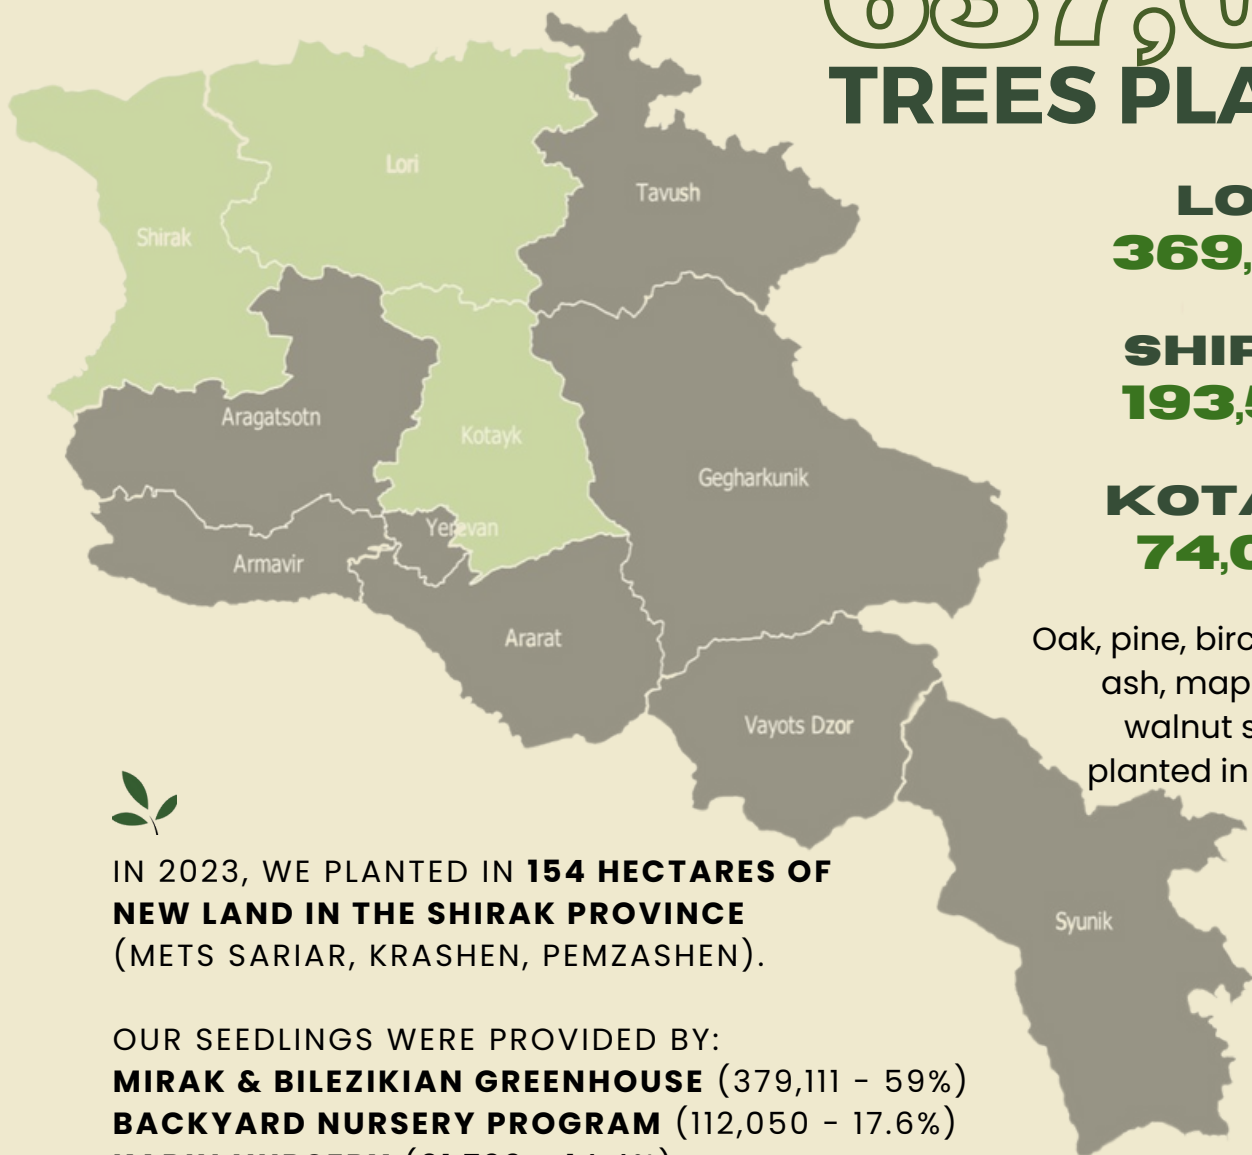

WE PLANTED OUR 8 MILLIONTH TREE

We planted our 8 millionth tree at the end of 2023 at the Avedisian School with students from Artsakh, ATP staff and guests!

Thank you for continuing to support our mission, and enabling us to continue greening Armenia.

FORESTRY

637,000
TREES PLANTED

LORI
369,420

SHIRAK
193,500

KOTAYK
74,080

Oak, pine, birch, apple, pear, ash, maple, sorbus, and walnut seedlings were planted in these regions.

IN 2023, WE PLANTED IN **154 HECTARES OF NEW LAND IN THE SHIRAK PROVINCE** (METS SARIAR, KRASHEN, PEMZASHEN).

OUR SEEDLINGS WERE PROVIDED BY:
MIRAK & BILEZIKIAN GREENHOUSE (379,111 - 59%)
BACKYARD NURSERY PROGRAM (112,050 - 17.6%)
KARIN NURSERY (91,733 - 14.4%)
KHACHPAR NURSERY (54,106 - 8.5%)

OF THESE SEEDLINGS, **69% WERE BARE ROOT**, AND **31% WERE CLOSED ROOT**.

FOREST ALLIANCE

In 2022, Armenia Tree Project, SHEN, and "My Forest Armenia" founded the Forest Alliance of Armenia to advocate for the protection and restoration of forest ecosystems and to support the increase of forest cover in Armenia.

Through the Alliance, we aim to speak with one voice to government officials and public policymakers, as well as to raise awareness among the general public about the importance of forests, the dangers they are facing, the possible solutions for forest conservation, and the necessity to increase forest cover.

The priorities of the Forest Alliance of Armenia are:

1. Designation of new lands for afforestation
2. Conservation and restoration of natural forests
3. Sustainable management and protection of planted forests from the Soviet era
4. Put a stop to the indiscriminate burning of grasslands, that negatively affect natural regeneration and biodiversity

On December 13th, 2023, the Forest Alliance hosted their second roundtable meeting, "The Status of Armenian Forests, Reversing the Process of Deforestation." The goal was to discuss active cooperation between private and public sectors in achieving Armenia's ambitious commitment to double its forest cover by 2050 under the INDC Paris Accords within the frameworks of 2015 UN Framework Convention on Climate Change.

ATP also hosted the Chief Advisor, the Lori region governor, the Head of the Municipality and their delegation in Margahovit, to present our organization's large-scale greening and environmental education programs. ATP also presented Mirak nursery's plans to increase seed production to help meet Armenia's goal by 2050. The trip ended with a tree planting by all guests at the nursery!

NURSERIES

MIRAK NURSERY & BILEZIKIAN GREENHOUSE

In 2023, over **379,111 seedlings** were provided:

352,499 came from the Mirak Nursery
26,612 from the Bilezikian Greenhouse

The beehives at Mirak Nursery also produced over 88 pounds of honey!

KARIN NURSERY

163,715 trees grown!

4,648 were supplied to Community Tree Planting sites, 91,733 were supplied to the Forestry department, and 3,943 were sold.

We added new species of tropical, decorative, and evergreens!

KHACHPAR NURSERY

134,247 total trees and shrubs were grown!

14,549 trees were supplied to Community Tree Planting sites, 54,106 were supplied to Forestry, and 3,239 were sold.

We also grafted 5,000 fruit trees in the cold room and moved them to the Betty Nursery.

NURSERIES

THE BETTY NURSERY IN CHIVA

53,624 trees were grown! 15,590 trees were supplied to Community Tree Planting sites, and 441 were sold.

We also increased the number of clonal rootstocks of drupe and drupaceous trees by 17,627!

2022 plans for 2023	Actual
Karin 2,000	100,312
Khachpar 17,000	71,894
Chiva 7,000	16,031

COMMUNITY TREE PLANTING

75,482
TREES PLANTED

in Yerevan and 9 other regions in Armenia

23,919 seedlings planted in Spring: **175 sites (57 new)**
51,563 seedlings planted in Fall: **156 sites (70 new)**

10,852
FRUIT TREES
PROVIDED

to

1,032
FAMILIES

Tavush, Syunik, & Gegharkunik

FRUIT TREES

2,377,048

**POUNDS OF FRUIT
HARVESTED**

ALMOND

APPLE

APRICOT

CHERRY

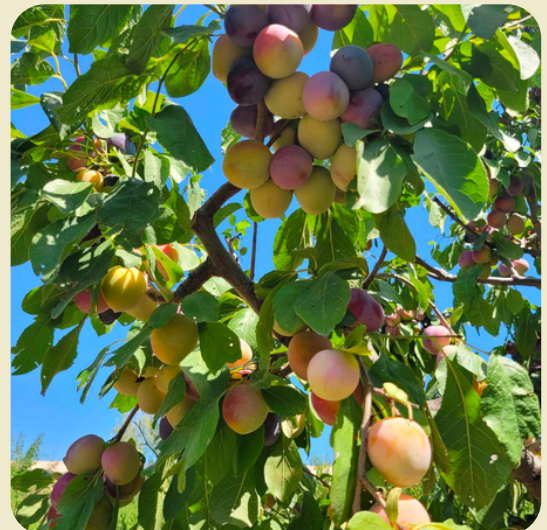

PEACH

PEAR

PLUM

SWEET CHERRY

WALNUT

BACKYARD NURSERY PROGRAM

In spring 2023, as part of the EU4Environment: Green Community, Resilient Future program, 26 additional families joined the 124 BYN program, bringing our **total to 150!**

During the spring and summer months, visits were conducted to BYN members, in order to monitor the germination and survival rate of seeds and cuttings, and to give our professional advice.

16,005 trees were produced from our Backyard Nursery Program, of which 205 were planted in Community Tree Planting sites, and 15,800 were used for forestry plantings.

In October 2023, **Karen Aghajanyan, displaced from his home in Artsakh, joined ATP as a BYN monitor in Armenia.** Karen had previously served as the coordinator of our **Backyard Greenhouse program in Artsakh** in the Askeran district. In Askeran, Karen had helped establish 24 backyard greenhouses, which served as crucial contributors to the food security and self-sustainability of villagers during the blockade. Karen noted, “During the blockade, ATP was able to send potato and vegetable seeds to us, and the greenhouses began to emerge as a beacon of sustenance, providing nourishment to many when food was scarce.”

Karen looks forward to working with Backyard Nursery Program participants. He says, “I appreciate the job opportunity and to be able to visit provinces daily and meet people, many of whom have been refugees. We share a unique understanding of each other’s experiences. Helping them becomes a way for me to find some people and purpose.”

ENVIRONMENTAL EDUCATION

Our Environmental Education department expands its reach every year with the goal of strengthening the knowledge and practical skills of our future environmental stewards in Armenia and in the Diaspora, to be creative problem solvers, thinkers and advocates for change!

Our student beneficiaries learn the importance of protecting their natural homeland, encouraging them to be the environmental stewards and sustainability advocates of tomorrow.

In 2023, **11,160 students and teachers were educated from over 198 educational institutions!**

Other highlights included:

- Renovating the alternative student greenhouse at the Michale and Virginia Ohanian Educational Center in Margahovit, and having eco club students paint a mural on the back wall!
- Establishing 5 more eco clubs, bringing our total to 38 in different regions of Armenia
- 500 students from border communities took part in the Mobile Lab classes
- 6 Building Bridges groups from the U.S., Canada, and Poland (over 200 students) took part in tree planting during their visit to Armenia
- "Grow Together", an initiative that teaches students to cultivate oak seeds using a hydroponic method, grew its reach to over 500 students in the U.S. and Armenia.
- "30 Trees for 30 Years" was established to help celebrate ATP 30th Anniversary. Schools participating in this fundraising program receive a poster of a tree with empty leaves. Each leaf costs \$30, and once the school fills up the tree, each participating student will receive a personalized certificate from ATP!

OUTREACH

In 2023, we spread our reach across 100 schools, youth clubs, and NGOs across the U.S., Armenia, and other countries around the world! Through outreach strategies, we are able to increase engagement, and create a community around our cause. We launched our “30 Trees for 30 Years” fundraising campaign, and created the “Astghik” certificate to welcome new babies to the world! ATP’s tree certificates have always been popular gifts to honor special occasions such as birthdays, weddings, anniversaries, and baptisms. Our new Astghik certificate is the perfect way to recognize the birth or baptism of a little one.

As we begin our 30th anniversary celebrations, we’ll be hosting a number of events throughout the U.S. and Armenia. We invite you to join us, celebrate our milestone and achievements, and help support our organization’s future. If you have any questions, please email us at info@armeniatree.org.

Check out our highlights from 2023!

ARTSAKH

We are proud of our work in Artsakh over the years. Before the war, we planted in more than 40 school yards, churches, and community sites. During the 2020 war, our Yerevan office served as a donation site for tools and humanitarian assistance. Some staff members served in the army.

In 2021, we created the Artsakh Greenhouse Program that provided 49 families with greenhouses in their backyards. These 49 families from Artsakh, once beneficiaries of our flourishing greenhouses, are now displaced in Armenia and in urgent need of essentials—food, bedding, clothing, heating devices, and more. Thanks to your past support, we've started delivering these items and creating employment opportunities, but the need is immense, and time is of the essence.

Through our Artsakh Refugee Aid program, you can empower and assist in rebuilding the lives of the 49 displaced families of the Artsakh Greenhouse Program. ATP is raising funds to provide tailored essential aid, create sustainable employment opportunities, and has high hopes to help them reestablish backyard greenhouses.

FINANCIAL REPORT

Armenia Tree Project had a record-breaking 2023 fiscal year reaching over \$2.6 million in revenues. Donors generously showed their overwhelming support for ATP's two Artsakh initiatives.

In the Spring, 90 tons of seed potatoes were delivered to residents in the Martuni region of Artsakh through a collaboration between ATP, the Tufenkian Foundation, and the Armenian Missionary Association of America. This enabled families to grow their own food during the ten-month blockade. In the Fall, ATP provided humanitarian aid to 49 displaced Artsakhi families as well as hired 4 Artsakh refugees in ATP's nurseries.

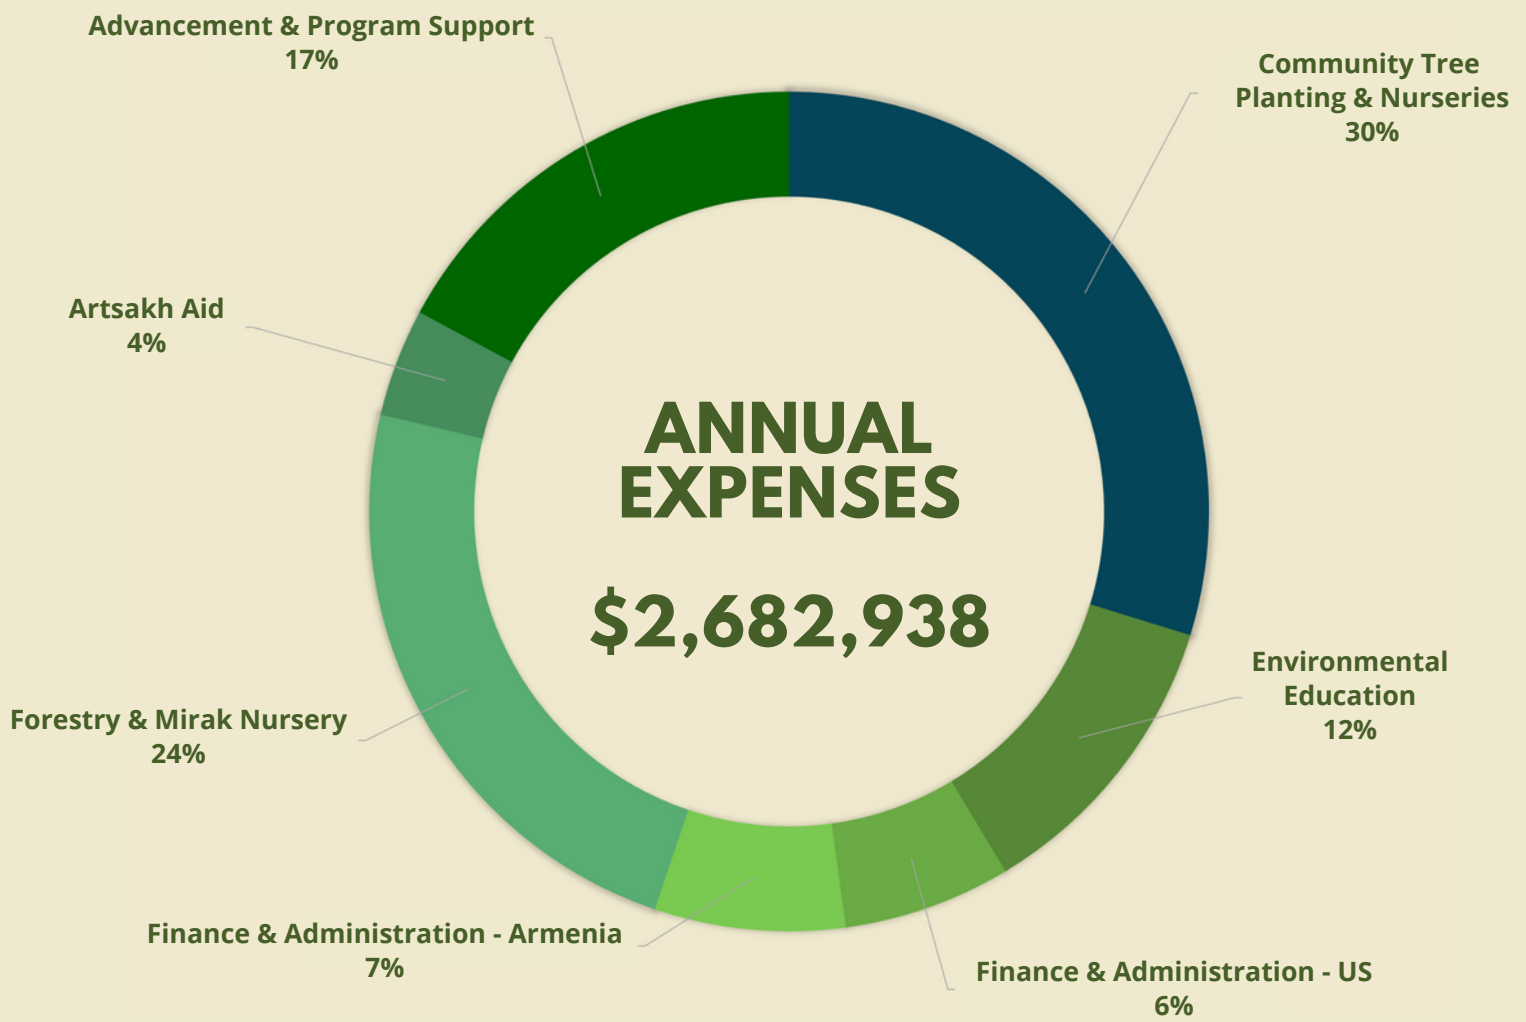

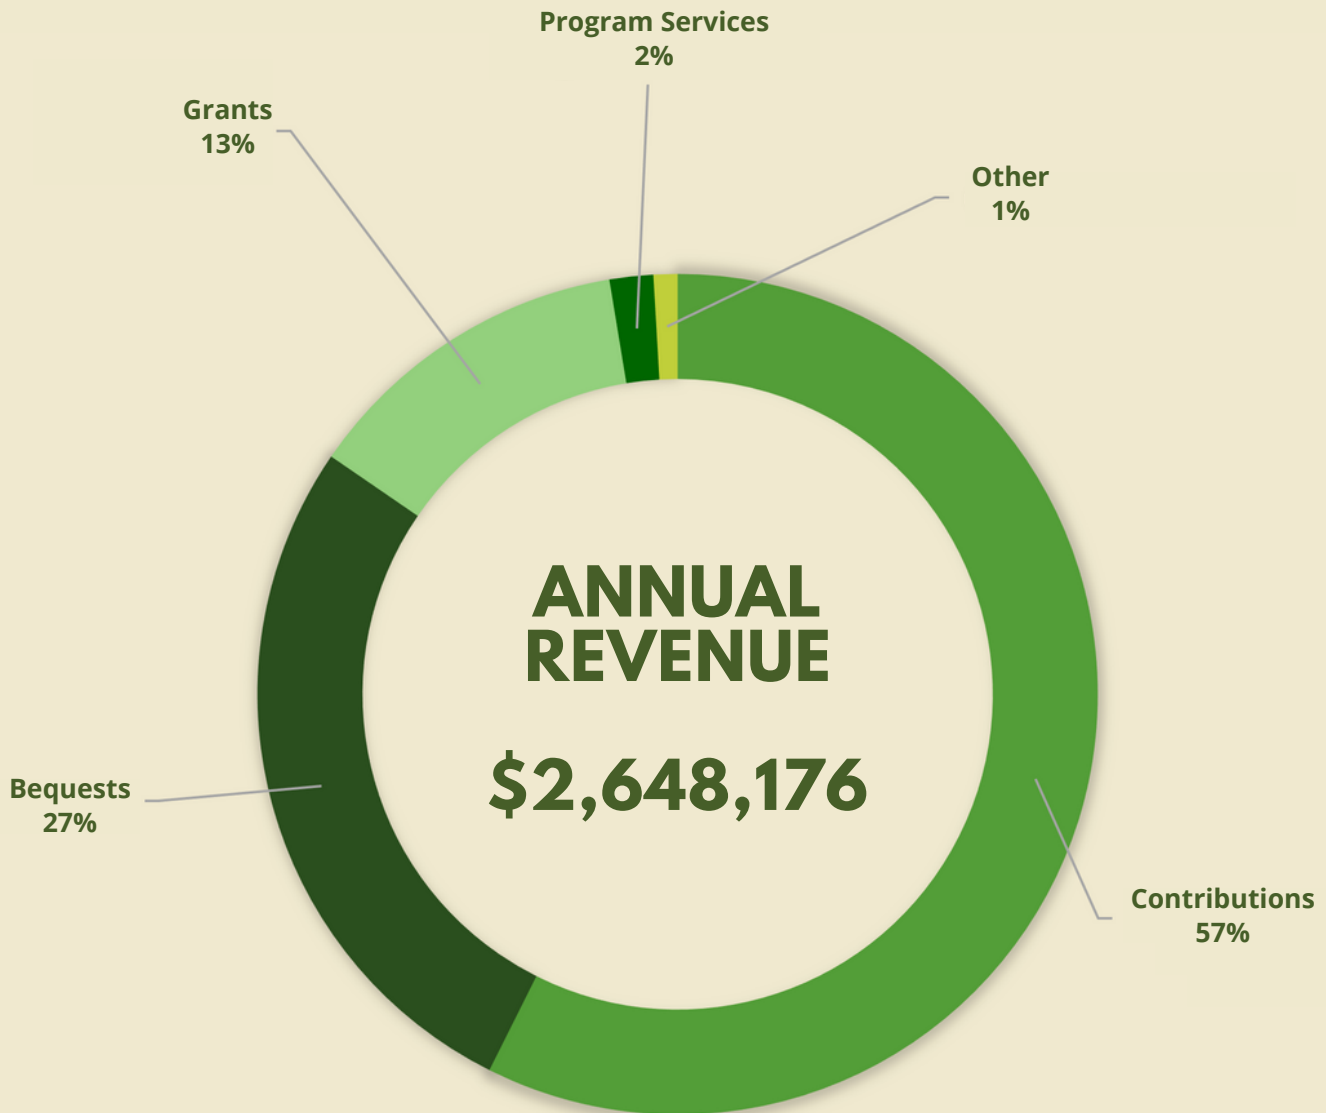

Despite the continued rise in inflation, ATP was able to keep its overall spending within 3% of the budget.

As Armenia Tree Project celebrates its 30-year anniversary in 2024, it will continue to expand its tree planting initiatives, assist communities, and educate students. With a budget increase of 16%, your support is needed now more than ever. I invite you to join ATP in its 30th year of greening Armenia and providing economic opportunities for the people of its homeland!

Armenia Tree Project is included in the 501© 3 ruling of its fiscal agent, the Armenian Assembly of America, tax identification number 52-1614093.

ATP Partners Circle

SPECIAL THANKS TO OUR DONORS!

Armenia Tree Project extends our deepest gratitude to the following partners who supported our mission by contributing to ATP in 2023. Together we plant, grow and nurture seeds of hope for our homeland and our people.

In an effort to reduce costs and save paper for this year's report, we are listing donors who gave \$500 and more. This list does not include donations from third party websites such as Facebook.

In 2023, more than **1,000** partners supported us at the under \$500 level. Your generous donations fuel our growth and deepen our impact and for that we thank you.

Gifts and Giving

The Armenia Tree Project is able to continue its mission because of the generosity of its donors. There are many pathways for a donor to support the important work ATP conducts through its programs and initiatives. Through its work, ATP is improving the lives of the people of Armenia, by ensuring the environmental sustainability of Armenia's diverse ecosystems by restoring its forests, and also by providing vital economic opportunities in remote and border villages where few opportunities exist. Each year, ATP creates hundreds of jobs that assists families to improve their standard of living, while protecting and conserving Armenia's ingenious ecosystem.

FORESTRY FUND

ATP's Forestry Division has become the largest division within the organization. Each tree is propagated, grown, and when it is ready, it will be planted during forest planting seasons. Each year the Mirak Nursery and the Bilezikian Greenhouses propagate over 370,000 new seedlings to be planted. As one of the largest employers, ATP hires from the local villages, and has full time employees working year-round in its nurseries, and over 450 employment opportunities each spring and fall. The income they make working for ATP is enough that they do not need to leave their villages to find work out of the country.

BACKYARD NURSERY PROGRAM

Since its creation, the Backyard Nursery program has given participants increasing financial stability, preventing them from being forced to leave their homes to find work in other countries. ATP chose to develop this program in remote villages of Armenia to build economic development for families who receive minimum income from month to month, helping to stabilize remote border villages. As the program becomes more popular, and more families join the program, there are more opportunities for donors to sponsor a BYN family.

COMMUNITY TREE PLANTING SITE

Sponsoring a Community Tree Planting Site gives donors an opportunity to revitalize an entire community, by greening a village or town. Every site provides a unique opportunity for a donor to give back to the people of Armenia. The size and scope of the sites can vary, and so can the impact. For instance, it can provide a small hot and dry village, with a green pavilion that provides shade and a respite from the hot sun, or provide an outdoor classroom to a school, during the hot summer. Additionally, ATP has planted at many well-known sites throughout Armenia, changing the social landscape and protecting the environment.

LEGACY GIVING

Making a legacy gift to the Armenia Tree Project through your will or living trust is one of the simplest ways to support our work. Through the ATP Oak Society, your legacy gift is a way to ensure that ATP fulfills its long-term commitment to ensure a sustainable Armenia, while creating jobs throughout the country and stimulating Armenia's economy.

No matter how big or small your legacy gift, this is an opportunity to pledge a greater level of support in the future than might be possible during your lifetime. The ATP Oak Society provides you the opportunity to make a gift through your will or living trust. Bequests such as this are essential to achieving ATP's mission. Bequest provisions are simple to establish and ensure that your intentions are carried out quickly, with fewer complications for your family and loved ones. By making a bequest to ATP, you provide one of the greatest levels of support to our organization. Although it is not required, making us aware of your request is helpful. By informing us of your wishes, we can recognize you today for your thoughtful generosity and plan for ATP's future.

For more information about how to support, please contact ATP's Chief Development Officer, Nanor Shirikjian, by phone at 617-926-8733 or via email nanor@armeniatree.org.
